June 12 2021

This is an unofficial compilation of:

*** ESTB's 1-36**
*** Ron's posted research notes from the Esperianism Institute forum**
*** A scan of one of Ron's handwritten notebooks that was posted on the Esperianism Institute forum**
*** A transcript of Ron's first podcast episode**
*** Facebook posts containing official Ron's Esperianism statements**

Since this document contains materials that so far have been exclusive for the Esperianism Institute, a suggestion is to mainly circulate it between Esperianism Institute members, and in relation to that the ESTB's currently cost 36 * 1.99 = 71.64 USD and the membership costs $50 a month, it could at least be good to ensure that the recipient has at least donated between $50-$125 to Ron at one time or another, but use your own ethics and judgement.

I can also use the attention that this document possibly gets to inform or remind that there also exists translated Esperianism/New Era Scientology materials in French, Italian, Russian and Swedish, so ask around on the Esperianism Institute forum if you possibly might have use for such.

ESPERIANISM TECHNICAL BULLETIN

ISSUE # 1

RELEASED 08 OCTOBER 2020

SCIENTOLOGY IS DEAD

When & W Where to Use: Is to be read, studied, and applied by all Esperians upon its release.

When & Where Not to Use: N/A

The Purpose: Is to explain how Scientology has become degraded and has lost its effectiveness and provide an alternate and more workable route to achieve the original goals and purposes of Scientology.

Summary: As much as I hate to say this Scientology is completely dead in the water and the fault is all my own I must admit.

It has been a long time coming and it was only a matter of time before it became degraded and altered like many of the subjects and practices that have come before it here on Earth.

I do not think we will ever know all of the specifics or the players involved because that is often the point when it comes to twisting something good in favor of those who would seek to ether benefit from it or to control if for their own interests entirely.

And this is exactly what has happened to the practice and belief system of Scientology over the last few decades and it does not appear that this will stop until the entire thing is destroyed entirely.

That is unfortunate because when Scientology was founded it was based upon a pure and honest desire to have all spiritual beings go free from the trap that we all find ourselves in and to become more powerful then we ever believed possible.

To a degree that was accomplish in part because the information that we are all immortal spiritual beings with an infinite capacity for growth and power was put out there into the cosmos for all to hear and learn from.

While those efforts may have been greatly blocked and interrupted it is time that we do it all over again and give this thing we know as Scientology a makeover so that we can get the show on the road once again and help those who would take advantage of the wisdom that myself and many other now have to offer.

Before I explain how that is to be done it is important that I provide the reasons why we will be doing what we will be doing and how we have arrived at this point so that it never happens again.

THE REASON FOR SCIENTOLOGY'S DECLINE

Scientology is dead. While much of the original Scientology philosophy and basics are still effective on a stand-alone basis when the scene is taken as a whole this begins to quickly break down and you can see that Scientology is in a condition that is worse than it has ever been.

The fact that there are next to no organizations outside of the the Church of Scientology, almost no fully trained practitioners (and those are often of questionable skills and ethics), and stats that are so low you cannot even call them stats is more than enough proof of this.

Successful delivery of Scientology has always consisted of equal part tech, admin, and ethics in that exact same order!

None one inside or outside the church today can balance these properly or is trained enough on them to bring about the stability necessary to have growing stats and true expansion.

In my own review and experience with both the independent Scientology field and the Church of Scientology they are both so full of lies, greed and corruption that honest and consistent progress with individual cases can no longer be made.

It has come to a point that the original essence and ability to properly apply the technology as L. Ron Hubbard originally wrote it has been lost in translation and to time.

Lack of training. There is a HUGE lack of training these days and often the training that is received is not properly done or the individuals that are delivering it are only partially trained or of questionable ability and integrity.

Too large an emphasis put on processing only. Too many have gone up the Bridge and are almost completely untrained.

Even worse they are often put on a Solo Course and then the upper-levels without first doing Academy Courses and becoming an actual auditor.

Even if a person is in a solo session they themselves are considered to be a PC so one needs to be a trained auditor in order to handle their own case in session.

Halted progress. It was once said “a person will stagnate at the same exact point on the Bridge in which they are not trained” and this still holds true today.

It means that if you are Clear and not a trained Dianetics or Grades auditor then you are not operating as a Clear in life and might as well not even be one.

So it is just as important to be trained up to the same level one has been processed on as it is to be processed on that level.

A lack of ethics. There are next-to-no ethics being applied today and those those that do are being enforced or not done properly at all.

Many fail to realize how important ethics tech is to Scientology and because of mishandling in the past shy away from ethics without realizing that ethics done improperly is NOT ethics.

There was always a distinct difference between ethics and justice procedures in the handling of cases and unfortunate there are very few beings who have the ability to keep the two separate.

And when they are not kept this way ethics does not work and only becomes another form of punishment on those who do not deserve it.

No justice in the field. Some data came to my attention the other day about an individual by the name of Johnathan Burke who is the phony Class IX attempting to run an org called the Advanced Organization of the Great Plains.

One would normally applaud this guys efforts but he is so out-ethics that if were actually a turd it would be of the dried-out white variety.

You see this guy dumped his wife of many years that had helped him to build this org and do the tech over a text for his young secretary that had come to work for the org.

He then canceled all of their mutual bank accounts so his wife did not have any money.

I am sorry but no normal person in their right mind would think this is alright and who in the hell would want a guy like this running an org?

It beats me but what is even more disturbing is the fact that absolutely NO one has taken this guy up on any type of justice action and he is still actively out there auditing PC's to a no result.

It is a failure on our part to let things like this slide and it does nothing but damage everyone's chances of making it up the Bridge but almost no one seeks to put any type of justice or ethics in no mater what one may do.

It is often excused as being someones case but there is case and then there is case.

We have always handled evil intentions and purposes with Expanded Dianetics for a reason and that reason is because the person is partly insane and needs special handling.

Long story short we do not need insane people in any important capacity within in org or group structure because it is so damaging that often we cannot estimate afterword the damage that has been done.

Secrecy. Many treat the tech and their next processing session like a crack deal! Slinking around like their life depended upon it and if they are caught the Men in Black are going to cart them away or lock them in the basement of the Church of Scientology.

Failing to realize that no part of the tech or Scientology has to do with lies unless it is handling them in session and if we fail to be transparent about what it is we do and who we are we miss out on the utilization of our greatest tool.

Word of mouth promotions!

Fake auditing. Some out there claim they can audit while they cannot and others just lie about it in part and are a lot more slick about it.

The justification that I have often heard is that this is them "doing the best they can with what they have" but that is never the case because they end up demonstrating out-points and a failure to do certain actions that are part of "what we already have."

Which I can partially understand as anyone who is passionate about he tech would do what they could and "fake it until they make it" but it is so much easier to be truthful about what one can or cannot do and be willing to give the things they cannot a go with someones permission.

We have individuals like Trey Lotz from Los Angeles California who is preventing real progress up the Bridge and claims he can deliver an OT VIII that is known to not exist while charging PC's $200 for fifteen minute sessions.

Don't forget the great Ray Robles of Freezone fame who can outdo him with an OT IX but fails to lists on his website a single Rundown from the actual Scientology Bridge as services that he offers and holds a yearly Reg/ing cycle called the Theta Alliance.

There many others but it would take all day to list all of the fake auditors or partially trained ones that profess to know what it is they are doing.

It is often tough with so much misinformation to make a choice on who or what processing to get as a result.

Not evolving with the times. It is important for any group to evolve with the times and circumstances it finds itself in to survive long term.

With Scientology many have taken the Keeping Scientology Working Series to the idiotic extreme and it prevents many from taking the steps necessary to modernize the tech.

All of Dianetics and Scientology is a WORKABLE THEORY and all theories either change, evolve, or are discredited as being false with time as something better comes along and that something better has already come along.

It is ESPERIANISM!

We have failed as a group to evolve with the times and it has almost gotten to the point to where we may lose the tech entirely unless we modernize it for the times and technological society we find ourselves in.

There are simply many things that can be done much more efficiently with things such as the Internet and Computers.

The cost of services. I am going to say this so you can put the blame on me but the cost of services is so out-dated that it is almost laughable to think what some get paid for sitting there and listening to someone speak all day.

Then many think that they should live some type of exorbitant lifestyle because they are auditors but the reality is that almost all of the wealth in our country at this time in owned by approximately one percent of the population.

With ninety-five percent of the rest not having one-thousand dollars in savings at any one time so where the money and time necessary for auditing these days is supposed to come from is a mystery!

The services in the Church of Scientology are structured much like a multilevel marketing scheme and that is just no longer viable in this day and age.

What is needed is the delivery of more economical services that are not based upon the survival or paycheck of another individual or group because this leads to sub-par results and delivery.

No L. Ron Hubbard. Until my arrival back on the scene no part of Scientology has gone right and there is no reason to believe that it will without me here or in the future.

I am back and putting things in order once again but I am not going to be able to do all of it myself and the important thing is that I am here and getting the job done.

Now many may not believe in the concept of reincarnation as they are reading this and that is OK.

You can simply look at me as the only guy who had the ability and willingness to step up and to set things right.

Without an active research terminal for tech at all times the chances of succeeding in making it out of the trap are next-to-none.

Experience has showed us this many times over the last few decades and it would be foolish to continue to act as if it has not.

How to Use: This bulletin can be used by any individual who is interested in doing so.

It is simply read over and studied enough times so that a person fully understands its content and each individual out-point that we are currently faced with in the original subject of Scientology.

RELEASED 08 OCTOBER 2020

ESPERIANISM

AN ADVANCED MENTAL-SPIRITUAL TECHNOLOGY

W&W to Use: This information is for general use at any time.

W&W Not to Use: There is no place this data cannot be used.

The Purpose: The purpose here is to explain exactly what Esperianism is and to give a brief overview of what it can do so that an individual can begin to put it to good use.

It is not meant to fully explain what the subject is as it is too broad but it should work to give a general idea so that a person can understand it and begin to make the transition from scientology to its successor.

Summary: Esperianism is an entirely new word that is formed from the acronym ESP (standing for extrasensory perception), the word Esper (1. A person who practices the development of psychic ability. 2. A spirit or of spirits.), and ism (represents a specific practice, system, or philosophy.

It literally means "The belief and practice that one is an immortal spiritual being with greater or lesser extrasensory perception" and that we all come from different spiritual terrestrial families that have given us different spiritual traits.

It includes a science where a technique called phasing (raising one's spiritual frequency or harmonics) is utilized to handle and address physical, mental, and spiritual ills or difficulties.

While the philosophical portion of the subject deals with the individual spiritual lines and and the effects they have on individuals in present time.

It is the successor of the religious philosophy and science that was developed by L. Ron Hubbard and while there are many similarities between the two it is a stand-alone philosophy and science of its own.

We will not get into the details of Scientology as the information on that subject can be obtained and studied quite easily but it is fair to mention that many of the techniques and theories that are found in Esperianism get a lot of their inspiration from that subject.

The purpose of Esperianism is to streamline the application of and to rectify many of the flaws that can be found in many of the theories of Dianetics and Scientology and to make them viable in a fast-paced technological society.

At least this applies to the technological or scientific application of the subject which has been previously mentioned as phasing.

The philosophical discoveries themselves are completely new and based upon information that was not available during the life of L. Ron Hubbard and do much to explain why we are here and why there were so many problems with the original subject.

Esperianism is quite easy to understand when you put it in simple terms such as these.

Decades of experience and scientific research on the spiritual nature of man have shown us that we are immortal spiritual beings that are composed of three distinctly different electromagnetic energies that have the capability of affecting one another and producing the reality and universe that we find around ourselves.

Those energies that we know of as physical energy, thought energy, and spiritual energy are all just varying harmonics of each other that intersect at certain points and can interdependently affect one another at the same time.

In the past the way this was viewed is that a spiritual being has the ability to record and then recall later anything that had been done to them in this life or a previous one and all that was necessary was to help the individual or spiritual being to relive a moment that was causing difficulty in the present time to be able to erase and resolve that difficulty.

And while this produced incredible results and miracles in the lives of individuals who had undergone this type of counseling beyond any expectation or thing that mankind had seen before - it still was not enough.

The same individuals then went on to either have other difficulties that would never be resolved or later in life began to deteriorate into an even worse state than when they had begun.

After extensive research into the subject of Scientology and the various techniques that were being used it was discovered that the cause of this was that the traumatic experiences individuals went through in either this wife or another as a spiritual being had counterparts that were composed of the other two out of three electromagnetic energies.

Upon having a person in a counseling session locate the traumatic incident that happened to him in this lifetime or another (physical energy), then its counterpart in a previous universe or another(mental energy), and finally it's third counterpart not in any universe entirely(spiritual energy) - these traumatic incidents began to erase and their associated difficulties disappeared for good.

The above-mentioned of this life or another, a previous universe or another, and completely outside of any universe entirely correspond to the three ranges of electromagnetic energy that were mentioned before as being physical energy, mental energy, spiritual energy.

It is basically how you can locate and differentiate the three types of experiences or incidents when undergoing or utilizing phasing techniques that will be fully explained in additional bulletins.

They also correspond to the body-mind-spirit composite that not only Scientologists but many other belief systems have become accustomed to over the many eons and millennia of Mankind's experience.

It was further discovered that utilizing phasing techniques to take each individual incident and raising its harmonic frequency would cause said incidents to erase (even though that is not really the proper term because they are then converted to individual experience) and it not only caused preexisting problems and illnesses to go away but had the ability to raise the intelligence and general well-being of a person remarkably and quickly.

Each spiritual being that is inhabiting a body has a certain allotment of electromagnetic energy that has been dispersed all throughout the past and up into the present time with the universe being approximately 800 quadrillion years old.

So the basic theory here is that all a being has to do is mentally locate during that 800 quadrillion year period all of the incidents with the dispersed electromagnetic energy and raise the harmonic in them to once again match their own and free it up for use again by the being.

This in turn would completely free the spiritual being from any difficulties that they have and enable them to accomplish whatever it is they desire in the future.

How to Use: The information here can be read, studied, and distributed widely to all those who are interested in the practice and application of Esperianism.

Those who are already familiar with the subjects of scientology or Esperianism can begin putting this data to use by using any phasing technique on themselves or others while maintaining a proper balance between the three tiers of electromagnetic energy that are physical, mental, and spiritual energy.

For those who are not familiar with the subject or just beginning they should read other ESTB volumes that pertain to phasing and all that is needed in order to put those techniques into practical application.

Once they are comfortable they should go ahead and apply what they have learned through a bit of trial and error in order to gain the experience necessary to be a good Phasing practitioner.

ISSUE # 3

RELEASED 10 OCTOBER 2020

PHASING

MODERN DAY MENTAL-SPIRITUAL PROCESSING

W&W to Use: The information in this bulletin can be used by anyone who is able to understand and apply it correctly at any time.

W&W Not to Use: Information on phasing should not be used by anyone who does not fully understand the data or is not familiar with the basics of processing which is the predecessor to phasing.

The Purpose: Here you will find an in-depth explanation of what phasing is and how you can use it to raise the electromagnetic and spiritual frequencies of yourself and others in order to produce an increase in intelligence, well-being, and a resolution of long-standing problems or difficulties.

This is not meant to be an exhaustive study of the subject and more advanced information will come at a later date but here any individual will be able to find the basics necessary in order to begin phasing on themselves and others today!

What this technology and technique can produce in the lives of people is so important that it should be put into practice immediately by those who are interested and brave enough to do so.

If you run into any trouble there is always an Esperianism practitioner out there somewhere who will be more than happy to help you clear up any misunderstandings and get started.

The sooner the better!

Summary: Phasing is literally the "dividing up of" certain thoughts, feelings, actions, and experiences in this life and throughout eternity (if one believes in that sort of thing) and then utilizing "mental or spiritual" energy in order to bring these into harmony with our self in the present time and to erase any difficulty associated with them.

This is possible because we and everything around us is composed of physical, mental, and spiritual energies that are each of a higher frequency than the other.

Say somebody had a pain in their foot and was asked to mentally think about the pain in their foot again and again until the pain in the foot eventually resonated at the harmonic or level of thought and ceased to hurt them physically.

You could then have them think again and again of the spiritual pain that is caused by injuring a foot and the mental pain would cease to exist and since you cannot really experience spiritual pain the whole entire thing would go away and no longer bother them.

A person may wonder "how is all of this possible" and how can a person accurately cause themselves to create these vibrations or frequencies and the answer is quite simple.

Anyone can do this by simply "thinking about it."

In the above example a person thinks about mental pain so therefore creates mental pain and if they thought about spiritual pain would then cause spiritual pain (not really but the concept of it).

The trick here really has to do with electricity. The same way that the positive end of a battery will always flow electricity to the negative part of the battery you have the same thing taking place here from spiritual energy to mental energy to physical energy.

This occurs because thought energy is greater than physical energy and spiritual energy is greater than thought and each one has a greater electromagnetic potential so what happens here is spiritual energy erases mental energy and then the mental energy erases the physical energy because each is of greater electromagnetic potential.

It was not known until recently what the full characteristics of this spiritual energy were and it was believed that addressing only mental and physical energy in the mind could solve Mankind's problems but this turned out not to be the case.

Elsewhere it has been mentioned that the predecessor and much of the basis for Esperianism comes from the practices of Scientology and Dianetics and in those practices it was believed that we are composed of a body, mind, and spirit (called a “Thetan”).

The word Thetan just means spirit or spiritual being. It was adopted to avoid the negativity associated with the word spirit or soul that was in use by other religions and believe systems at that time.

Another word was also used which is **Static** and it was meant to describe the nature and characteristics of a spiritual being.

Meaning “being everywhere and nowhere at once with the ability to be everywhere and nowhere at once” “with no mass, no wavelength, and no position in space or time.”

If you mixed omnipresent with omniscient you would have the right meaning for what a Static/thetan or spiritual being is.

From this point forward a spiritual being is just going to be referred to as an **Esperian** so as not to cause further confusion and it is meant to be a combination of all of the above for the purpose of this bulletin.

Further definitions will be provided once they are fully available.

THETA-STATIC THEORY

Given that a static or spiritual being is nowhere and everywhere all at once and really only has the ability to think or imagine a thought and then perceive that thought it would appear that what we know of as creation and the universe is created and takes place between the electro-magnetic bands of Theta (another word for thought energy) and Static.

Essentially a spiritual being puts out a thought and then it vibrates against or resonates against the harmonic of static (which can be both stationary and in motion at the same time) and we then have whatever was originally thought of persisting mentally or in a person's memory.

Overtime if enough of these mental memories or pictures and thoughts are combined a physical manifestation of them is then created in what is known of as the physical universe.

This can also be a combination of multiple different spiritual beings at once and this is what forms "general reality" more or less. It all takes place between thought and static you see.

So we have all gotten into the unfortunate circumstance of having actually thought ourselves down into this trap and not knowing until recently that the only way out was to reverse this process to free ourselves mentally/spiritually it appeared we would all be stuck in it forever.

It is very important to understand how this information was finally discovered and at which point these three different types of energy intersect and how they operate interdependently of one another.

To understand this I will have to go into a bit of history on something we call in an e-meter or electropsychometer.

Which is essentially a device where a person holds a set of aluminum cans and a small amount of electricity (about 2.5 volts) is run through the body and when asked certain questions we are able to measure the difference in current and how large an actual thought or memory was within a person's mind.

This device was pretty much exclusively used in Scientology counseling sessions and information on it can be found all over the internet if an individual feels so inclined to go into deeper detail.

For the sake of keeping this explanation simple we can say that an e-meter was used to measure the mass of a particular thought and more importantly it would register a falling needle that was located on the front of the e-meter to indicate how much of this charge had been dispersed by asking certain question or questions.

About 18 months ago myself and other independent Scientology practitioners begin to notice that at a particular setting on the e-meter an unusual observation could be made.

It was that no matter what question was asked or how the person undergoing counseling responded a consistent 0.05 dial fall was noticed on the dial at all times.

It indicated that we had run into some sort of uniform measurement and it was later discovered that this was in fact the measurement of thought itself at 0.014 of a Watt and this was taking the measurement of the meter used which was running at 2.5 Volts (don't recall the amps

at the moment but I consulted the manufacturer at the time) and determined that 0.05 a dial fall was 2250 Ohms of electronic resistance.

I simplified this down to 1 by dividing it by 5 which was 500 ohms and putting this in the ohms formula came up with the final figure of 0.014 of a Watt of energy.

So on further analysis of this question we set out to determine the practicality and application of this information in phasing.

It was soon discovered that any traumatic incident has a central point that is in balance or equilibrium at exactly 0.014 of its total space.

In other words you could simply have a person recall a traumatic incident and then locate the equilibrium point and that said incident would dissolve and disappear although at the time we did not fully understand why this was occurring.

This was possible because each physical incident at 0.014 of its total space was being erased by a companion incident in thought that has an equilibrium point of its own and further research discovered that there was also a third intersection point between thought and spirit with its own equilibrium point.

It appears that the equilibrium points of thought and spirit are multiples of the physical universe measurement but it is difficult to determine at this time because these are such small amounts and measurements but time will give us the exact numbers.

So while many believe that only physical and mental or thought energies existed and were able to effect us the evidence, data, and research has shown otherwise.

All three of these must be balanced and accounted for in order to understand how phasing is so effective in changing human behavior, troubles, and illness for good!

Taken from a strictly electromagnetic perspective you can see how much each individual traumatic experience has built up physical, mental, and spiritual energies around us that we carry with us on a day-to-day basis and affect our judgment and behavior.

This all sounds good in theory but the best way to actually prove these points is to demonstrate them to each individual themselves and let them learn through practical application.

Although before that is possible there is one other very important concept that is necessary to understand and that is **Approximation**.

It will be the single most important tool you will ever use when it comes to phasing and understanding the mind, life, and the universe.

How to Use: There are two different aspects to Approximation and the first one is basically the ability to simply think something mentally in order to resonate at a similar or "approximate" wavelength in order to discharge or get rid of something.

This takes place automatically so there's no reason to really go into how to do it because it occurs by someone simply thinking something similar to what they are addressing.

The second and more important part of this is the actual technique of approximation and this is used to locate things to address with phasing.

If someone cannot locate the things necessary to resolve a problem there is no point even trying and they would only be spinning their wheels in an attempt to do so.

Approximation is done like this.

A person sits down in a quiet place or where they do phasing on a regular basis and they grab a sheet of paper so that they can list down answers to the question(s) that they will be asking themselves or another person.

They then get an idea of the difficulty or problem they have that is affecting them.

Say someone gets a stomach ache on a regular basis you can word the question such as "stomach ache," "problems with stomach," or even something like "why does my stomach hurt all of the time?"

The words are not really important and all that is needed here is an approximate answer that is descriptive of the difficulty the individual is currently having.

In the next step the person repetitively asks themselves or the person they are phasing with the above-selected question they chose and list down each individual answer on the piece of paper.

This is continued until the person gets an answer that causes them to laugh out loud or feel much better about themselves or the situation that is going on.

It will generally cause them to brighten up immediately and when this happens the person should put an X next to the answer that produced this result.

Next ask the main question that was selected at the beginning three times but no more than three times and then stop.

The person should then look at the answer with the X that cause them to feel better about things and look at the previous three answers and the three answers that follow the X answer on the list.

Over 95% of the time the answer with the X next to it will be the one that we are looking for and what is being looked for is whether or not that particular answer to the main question can explain or satisfy why all the rest of the questions or items on the list have occurred or are occurring to the individual.

In another words it is the only single answer that completely explains the difficulty the person is currently having.

If for some reason the answer with the X next to it is not the one that satisfies all of the other questions on the list it will be one of the three answers before or after this answer.

It is important to know that the X answer to the question that causes a good reaction can happen one or sometimes two questions in at the beginning and in this case you simply ask the main question three more times and then follow the above instructions.

The mind can be a very tricky thing at times and for many it is very difficult to sort through what is going on with them because they are so introverted into what is happening.

In order to solve this we use the tool of Approximation to assess the difficulty and each time the answer that satisfies all the rest of the answers on the list will be the one that is necessary to address with phasing to resolve or alleviate said issue.

THE PROCESS OF PHASING

There will be many different phasing techniques and areas of address in the future but one singular technique that could be used on any person(s) at any time you will find here.

After using Approximation in order to assess for something to address with phasing you can follow this process.

1. "Can you locate an incident in this life or a previous one regarding (answer gotten from approximation step)?"

2. "Can you locate an incident in a previous universe or another regarding (answer gotten from approximation step)?"

3. "Can you locate an incident that is outside of any universe entirely regarding (answer gotten from approximation step)?"

4. "What do all three of these incidents have in common?"

Step four can be asked one or multiple times until all three of these incidents erase or blow.

If you do not know what "blow" is you will find out sure enough when utilizing this technique.

It is worth mentioning that when approximating for an item to run you can also use approximation again to assess exactly how many incidents are connected to the answer of your main question in the first approximation step.

Checking periodically after a few sessions to see how many are remaining.

This is a very accurate form of doing this technique but one also can simply run the above until the difficulty is resolved but to be 100% certain it would be best to make sure all incidents are erased.

That is how phasing is done and there will be much more on this subject in the near future.

Please use it and use it well!

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 4

RELEASED 13 OCTOBER 2020

REINSTATEMENT OF FAIR GAME

W&W to Use: This should be used by all Esperians at all times.

W&W Not to Use: The data found here should never be used as an ethics action, a punishment, or for retaliation at any point in time.

The Purpose: To explain why in this day and age **Fair Game** is necessary and how to properly apply it without the unethical mistakes of the past and to teach one to use the **Fair Game Formula** safely and confidently.

Summary: For a person who may not know Fair Game was an old Scientology policy that was later canceled because it caused way to many problems.

The label was reserved for and place upon those who were viewed as enemies that could cause considerable harm to the practice of Scientology and it literally meant that any means possible or available could be used to destroy that person.

If a person had been declared Fair Game one could attack their family, friends, and the dog in an attempt to make certain that they could never harm Scientology or Scientologists.

Unfortunately while this type of mentality is very effective against those who are legitimate enemies it soon began to be used on those who did not deserve it and were simply not liked or were not contributing enough to the movement by those applying it.

When one deals with the root of insanity on a daily basis (which Scientology did) this was bound to happen and it did.

So it was discontinued because it needed to be but is is once again necessary to implement a form of Fair Game because we are living in increasingly troubled and evil times.

Although this version is going be quite different in Esperianism and there will even be a formula provided to ensure that the decision to label someone Fair Game is correct and ethical.

WHY IS FAIR GAME NEEDED?

There are two groups of people and they are Esperians and non-Esperians.

They also both have completly different set of ethics, morals, and goals.

Many of these may be the same at certain points but the truth is that a Christian is not an Esperian and does not have the same values and outlook on life.

They are going to approach life and deal with circumstance based upon these views that have shaped them and nothing will change that.

After all it is what makes them who they are and a person would be foolish to think otherwise.

Much the way a wild animal will always be an animal no matter how much you feed or train it.

Naturally this makes the two groups at best competitors and at the worst enemies because of these differences and there are still some parts of the world where being a Christian or Muslim will get you killed.

As Esperians we possess the single most powerful mental-spiritual technology the world has ever seen and it poses the best solution to Mankind's advancement and survival into the future.

This makes every other group our enemy in some way and at some point in time because the belief systems they adhere to are based upon faith and not on science like Esperianism which mix just as bad as oil and water.

That is not to say that faith based systems are bad or the people who practice them are but they are not based and on facts and where opinion and belief is confronted with facts there is always some type of conflict that results.

Every single time and let us not delude ourselves that it does not because this can be seen everyday with politics and religious and that is why many do not discuss either.

One of the major failures with the practice of Scientology was that the value of others was placed above active members of the group and religion because they were family or friends and this was a fatal error.

Does one really believe a Christian is going to choose the life of an Esperian over one of their own members given the unfortunate choice or during a natural disaster or war?

Not a chance in hell and it would be stupid to ever believe that and it is time to start putting our own before others because that is what all these groups do and it is necessary in order to survive and thrive to do the same.

And a HUGE difference is that if asked one can honestly admit this and not have to hide it or say otherwise and it is only what is fair and right.

Many a time has as a person shunned a member of our group that was in good standing for a friend or family member who could not give two shits about what it is we do.

For those who have been around long enough to see the magic of this technology we use to do this has always bewildered me and is a massive no-no!

This is why Fair Game is so important these days and it is not about attacking others but is about making it FAIR for all Esperians and those who belong to our group.

The way this is done is through the use of the **Fair Game Formula.**

Fair Game Formula

Step One.

Ask yourself and determine if:

A person is an Esperian.

or;

A Non-Esperian.

Step Two.

Find out if they are:

Not attacking you.

If they are not attacking you either ignore them, leave them alone entirely, or support them if you believe in their cause.

or;

Attacking you.

If so attack them by using equal or greater force if necessary in order to stop the attack entirely.

Step Three.

When being actively attacked determine if:

It is necessary to use equal or greater **ETHICAL** force to end the attack.

This is any action that is honest, correct, and within the law or otherwise considered to be morally acceptable.

or;

It is necessary to use equal or greater **UNETHICAL** force to end the attack.

Sometimes the law is not available or justice cannot otherwise be served then by fighting fire with fire.

This is any action that is dishonest, incorrect, or outside of the law and would otherwise be considered to be morally wrong.

When carrying out unethical actions it must be seriously considered if this in the only option and route left in order to stop an attack as they often have long-lasting consequences and this is only recommended as a last resort.

This dose not mean to go out and break the law to solve problems or end an attack but sometimes one must break the law in order to stop lawbreakers and commit violence in order to stop violent men.

It is the duty of good honest men and women to make sure this never occurs and when it does to fully support and protect the confidences of those that have had to go to such extremes for the safety and security of all.

The way to do this is to apply the **Fair Game Formula** in our lives and encourage others to do so as well.

It is vitally important to the future of us all.

How to Use: This data and formula should be studied and used but all members, potential members, and all individual in good standing with Esperianism.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 5

RELEASED 14 OCTOBER 2020

SUPERSEDES

THE ESPERIANISM TECHNICAL BULLETIN

W&W to Use: Can be used by anyone at any time.

W&W Not to Use: N/A

The Purpose: Here is the story of how The Esperianism Technical Bulletin came about and what is and does.

Summary: For a period of about eighteen months to two years the Independent Scientology field referred to new technical research being made as New Era Scientology and during that time many Hubbard Communications Office Technical Bulletins were issued under that title.

At the top of those issues could be found the designation of **supersede** and this meant that while these new technical issues did not cancel any of the previous ones that came before them they were considered to contain more effective and efficient information and were to be used instead.

When it was discovered that the whole field was looking at an entirely new science with Esperianism it was decided to replace the old system completely and to use a new format for technical bulletins in the form of the Esperianism Technical Bulletin.

They are not written in any particular order of importance but instead are released as research is being made so that anyone who would like to come along later can simply read and study them in order to understand the subject fully.

These bulletins cover all technical, administrative, and ethical aspects of the science of Esperianism.

How to Use: Read, study, and understand this data fully in order to apply it. That is all.

TECH ADMIN AND ETHICS IN ESPERIANISM

W&W to Use: To be distributed and read by all interested individuals.

W&W Not to Use: N/A

The Purpose: To explain the balance between tech, admin, and ethics that is necessary in order for Esperianism to be successful.

Summary: With any science or movement you have things develop along the lines of a technology is created and applied, which leads to it being administered in some fashion in order to expand and grow it, and then some type of ethics or morals is developed in order to maintain those two when needed.

With Esperianism many are jumping ahead and trying to apply things on an administrative or ethics basis when it is not currently needed.

Without the development and application of the technology that is going to form the basis of all Esperianism these other two are absolutely pointless.

In order to have an administrative staff members we first need to developed and use enough phasing techniques in order to change enough lives and generate enough revenue that we even need to hire staff in the first place.

And without enough members in the Esperianism movement there is no need to use ethics on troublemakers as the group would be small enough that they would stand out whatever they do anyway and it would not be needed.

So moving forward let us concentrate on using and developing the tech necessary to grow big enough to have to use ethics tech to maintain it all or we will all just be spinning our wheels.

Tech first. Admin Second. Ethics last. In that exact order people. Trying to do otherwise will only cause you to fall on your face and we would not want that but history has shown this to be true.

It may be technology will allow us to depart from the classical roll of administrative and ethics personnel altogether and we can simply apply phasing technology in order to change lives, the planet, and the entire universe.

Or so I hope!

How to Use: Read and study it until understood and then put the data into practice.

ISSUE # 7

RELEASED 15 OCTOBER 2020

THE RISING F/N

W&W to Use: Should be studied by those who have experience with an e-meter and who are curious about what this read is.

W&W Not to Use: Should not be studied by those who do not have experience with an e-meter until they gain that experience.

The Purpose: To show how the Rising Floating/Needle was discovered and what it means to a person's case and in phasing.

Summary: While I was researching certain phenomena about eighteen months ago I discovered that at a particular sensitively setting on the e-meter we could get uniform reads no matter what question we asked a person or how they responded.

I have already went into quite some detail on this in **ESTB 10 October 2020 Volume One Issue # 3 Phasing – Modern Day Mental Spiritual Processing** and there is no need to go into it again here but you can find the relevant information there.

In using the meter at sensitivity setting necessary to observe the uniform wavelength of though it was observed that the needle would do a strange thing on the dial and that was it would

rise, rise, rise three times or more and then would blowdown to the right and would go into a floating needle.

If one would sit there in front of the meter and observe the person on it this pattern would continue again and again until something else was picked up and run or the phasing session was ended off altogether.

At the time this was thought to be and indication that there was no more physical, mental, or ESPECIALLY spiritual or static energy left on the particular item that had been addressed in phasing but this was incorrect.

When looking into the uniform wavelength of thought it was realized that each Fall as we know it on the dial of the meter was the equivalent of 1/100ths of a Division of Tone Arm action and that 100 of these would equal a full Division of TA but five or six of them would produce the blowdown that was following each set of rises.

This indicated that mental charge was so minute electronically that it would only blow off in 5/100ths a division and no more.

So this only left STATIC charge which it appears cannot be measured by any known mechanical means at this time but it is not necessary to do this in order to produce a result.

The way this is done is by phasing until one sees the above phenomenon and then they can move onto the next phasing question or item to be run.

What we are actually observing here is a STATIC F/N or and F/N within an F/N.

Basically we can see that all static charge is F/Ning THROUGH an F/N of thought energy and can therefor conclude the static charge has been handled.

So the definition of a Rising F/N can be better explained as an F/N within and F/N.

How to Use: Read, study, and then apply once fully understood.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 8

RELEASED 19 OCTOBER 2020

A BASIC DEFINITION OF APPROXIMATION

W&W to Use: Can be studied and applied at any point.

W&W Not to Use: N/A

The Purpose: A brief explanation and definition of approximation can be found here. It is not meant to be an in-depth study and the more complicated aspects of how to apply it can be found in other bulletins.

Summary: APPROXIMATION is basically a value or quantity of something that is close to but not completely the same as another similar value or quantity.

So weighing two oranges where one orange is slightly heavier could be said to be an "approximate" weight as it is close to but only a little bit off in weight.

For the purposes of phasing and in the practice of Esperianism it has been discovered that if a person "mentally matches" with thought something near to a difficulty they are having it can be caused to go away and this is what approximation really is.

We take the three electromagnetic energies of the physical universe, thought, and static and use them in approximation to one another to bring about the results of phasing.

These energies can discharge against one another and this ultimately causes a physical, mental, or spiritual problem or inability to resolve.

That is all approximation in or does at the basic level.

There is also the technique of approximation which is how we list out and discover things to work with in a phasing session but that is covered elsewhere.

Approximation is a new mental phenomena that has been around for many years but has never been put into the right context or has been used properly and fully.

Now it can be with a little bit of study and effort.

How to Use: Read, study, and apply to bring about a workable understanding of the knowledge in this bulletin.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 9

RELEASED 19 OCTOBER 2020

CHASING A NULL READ

W&W to Use: Can be studied and applied by those who are familiar with basic phasing techniques and who have learned how to located items to run with Approximation.

W&W Not to Use: Is not recommended for use by those who do not have basic phasing skills but can still be read and studied if desired.

The Purpose: To proved an Esperianism practitioner with a quick and easy to use tool that will help get a large amount of charge off of an individuals case temporarily and is good to know in general.

Summary: If one knows how to use Approximation then this will be easy to do without problem.

When doing this you simply use Approximation to locate items to run and once you have the "null" or item that satisfies all others on an Approximation list you move on without phasing it.

By not phasing it you *do not do anything else* and then just repeat approximation on something new altogether without addressing it with additional phasing commands.

This can be very useful when a person does not have a lot of time or is unsure about what it is they should pick up and address for a person or themselves.

By doing this a lot of charge will blow and it will open things up for the person it is being run on.

Over %80 of the battle in phasing is knowing what to run and identifying things closely enough to make sense to a person as being the cause of an issue.

Just identifying these and moving on to identify others can bring about a remarkable change in a person and it should not be overlooked.

Have you ever been angry for instance and not known why you were upset?

Then when it occurred to you why it was upsetting and it stopped bothering you at the same time?

This is the same concept when it comes to Chasing a Null Read and technically this can be done over and over but there are plenty of other techniques and phasing processes that will work more efficiently than this.

Although in a pinch you can just sit down with a good old piece of paper and use approximation this way to handle something and then move on when the person in doing much better.

How to Use: Best to study and apply once basic phasing and approximation is understood.

RELEASED 19 OCTOBER 2020

HELP THOSE WHO CAN BE HELPED

W&W to Use: Can be read by anyone.

W&W Not to Use: N/A

The Purpose: To give some information on who we should help and why as Esperians and to best manage our resources.

Being a person only has so much time, energy, and resources it can be difficult to choose when and where to help others while acting in the capacity of an Esperian and this bulletin should help to clear this up and make the decision easier.

Summary: Some new information has come to light with recent research I have been doing with regards to those who would be classified as psychotic, neurotic, and antisocial.

It was my desire to develop a phasing technology that could address these particularly difficult issues and in the process one thing became clear.

That was there are some beings that cannot be helped no matter what you do for them!

The reason for this is even if we are able to clear someone up with phasing and address every traumatic experience a being has ever had they still can make a chose to do good or evil.

About three years ago I began to see this strange pattern in those who would normally be classified as anti-social but with the twist that no matter what they did they would not pull-in ethics on themselves.

By pull-in ethics I mean that in most cases with beings who are criminals, serial murders, and even worse at some point they will do something to get caught or get themselves killed.

This is well know in law enforcement and actually relied upon when doing investigative work.

So one can imagine that it was quite disturbing to observe beings capable of the worst things imaginable and not being able to stop them because often the only way to do that is to wait for them to stop themselves and these fellows were never going to do that!

The new research I had been doing demonstrated that despite what we had all thought in the past the anti-social was actually BELOW the level of a psychotic but had a higher ability to function so went undetected.

Despite that I had been developing a technology that could easily reverse this by finding the point someone decided to be anti-social or psychotic and you could then rehabilitate them but this other group would not respond.

I was finally able to determine that this group of beings made the choice at some point to be evil with a full awareness of what they were doing and were continuing the trend in present time.

We have all seen the person that no matter what we do or try they will always do the wrong thing even if given every opportunity to do the opposite.

It is because they continually and actively make this choice and as far as I know there is no changing their minds or reversing their description.

It honestly makes me wonder if once that choice is made and I mean REALLY made it is not undoable despite all of the technology we have to rehabilitate beings.

All of this is important to know when it comes to helping others with phasing and through other humanitarian means.

It comes down to can a person be helped or not and will they accept that help.

There are really three groups when it comes to help. Those who will accept it gratefully and openly, those who will take it reluctantly and cause problems, and those who outright refuse it and attack any offer of help.

There is no reason in hell a person who needs money will not accept a $100 dollars provided it is ethical and if an individual is so hung up on not being helped in the past it will only cause an issue when trying to help them.

Those who refuse it are evil and not worth considering so it is best to move on no matter who they are.

Pick number one above and you will never have a problem when it comes to deciding who to help.

Granted the occasional bad one is going to slip thorough and lie about it but if you continue to help those who openly take in and reciprocate it you will always catch the good ones.

How to Use: Study and put into practical use.

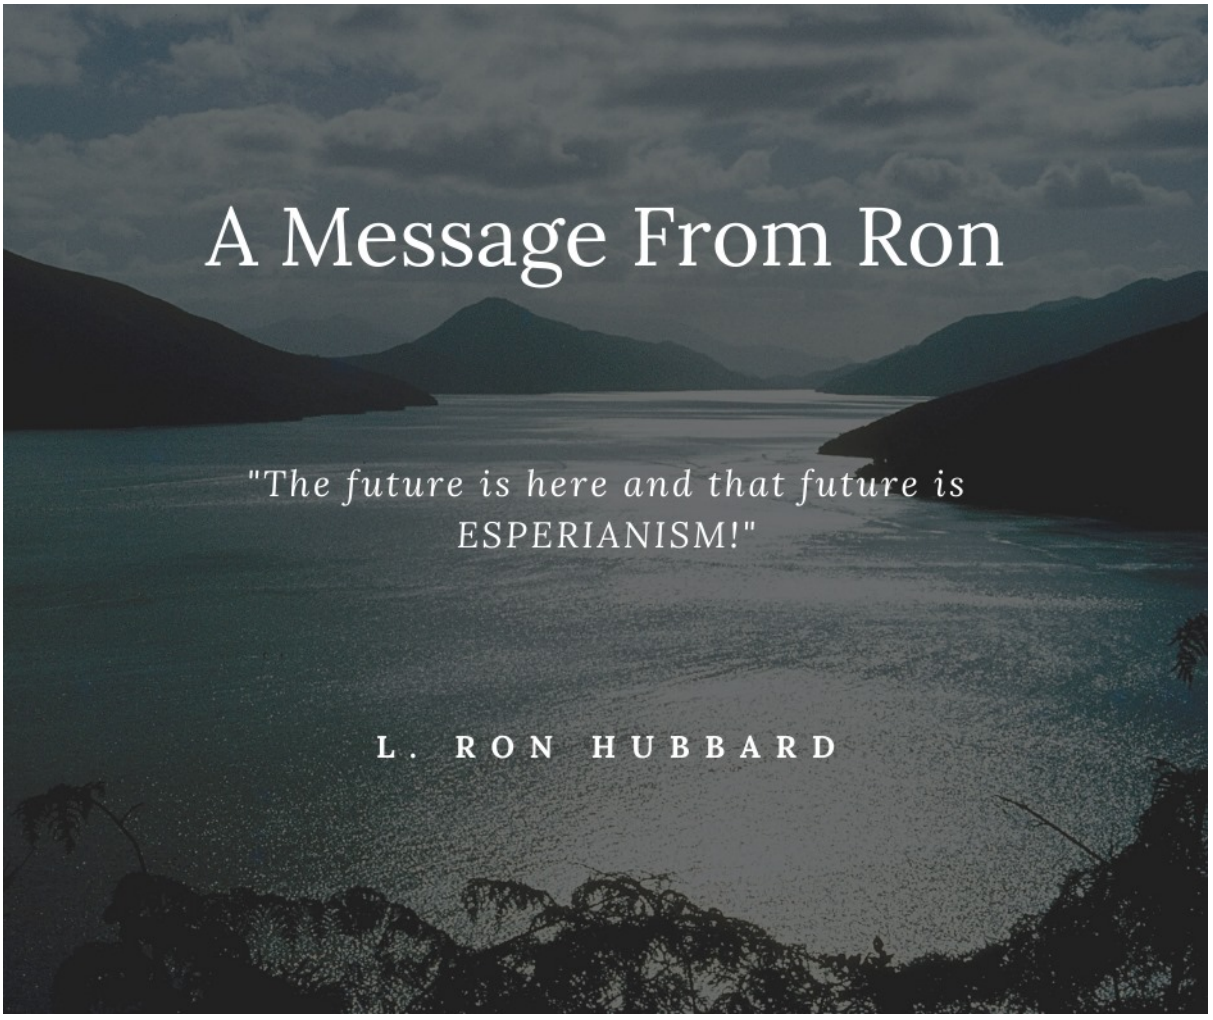
Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

October 19 at 9:22 PM ·

Esperianism is the first philosophy that will not have a practice that is predicated upon its own dogma.

From the beginning it will teach the individual to use their own logic and judgment when sorting through what it teaches and to then allow them to apply it based upon their own experience.

No other religion or philosophy has ever allowed for this and it is a HUGE step for mankind.



Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

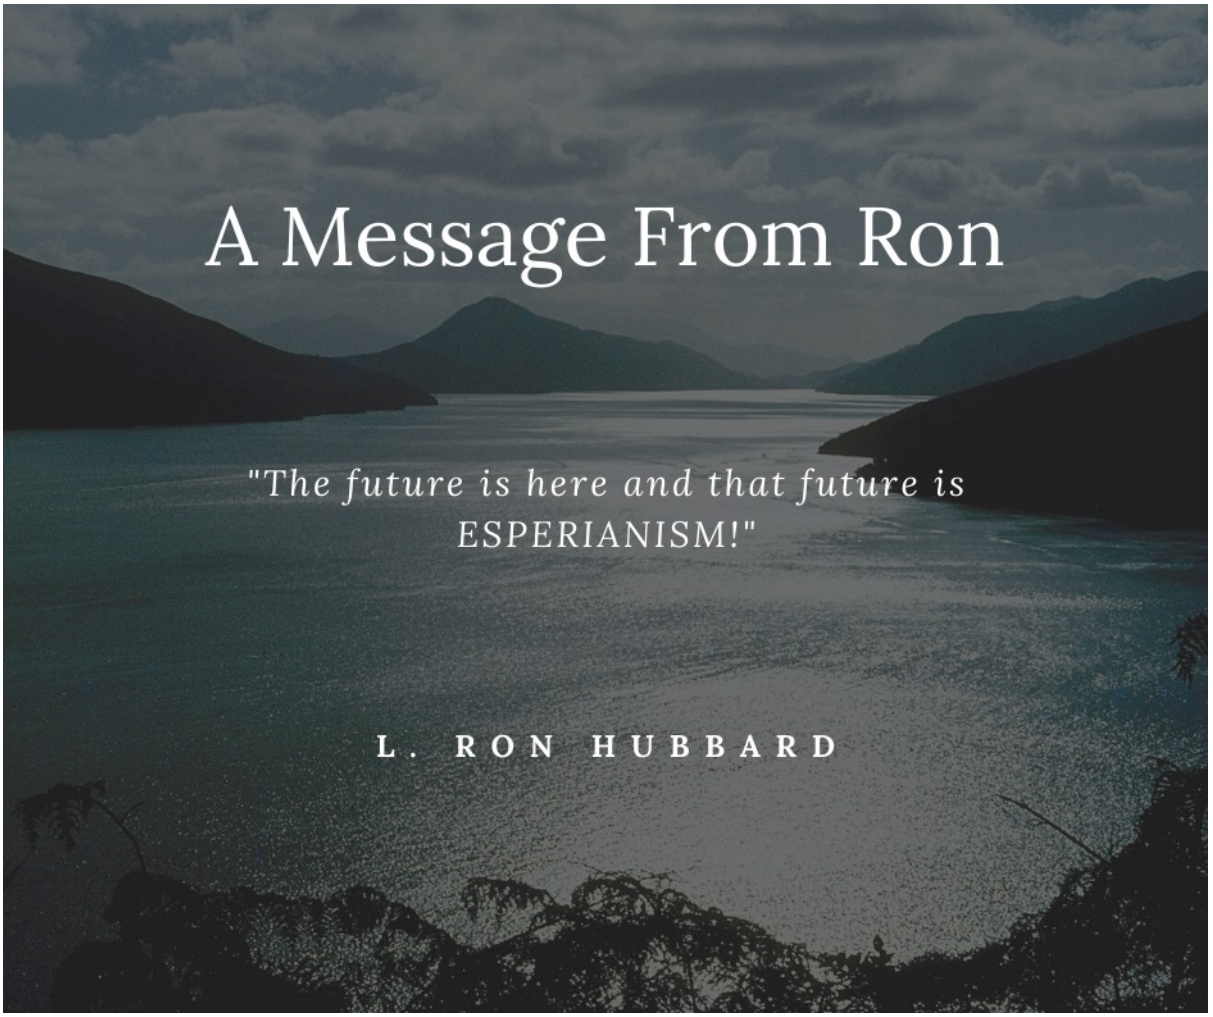
October 19 at 9:43 PM ·

In the future instead of just posting messages here you should also see a "Message From Ron" graphic or photo so that you know it is from me.

Research shows photos get a lot more initial attention and engagement so this should be more effective.

They will also change from time-to-time so it is not always going to be the same one.

These will be my official statements or comments on things and not the informal ones that can be found on my personal thread or in the comments.



Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

October 20 at 7:24 PM ·

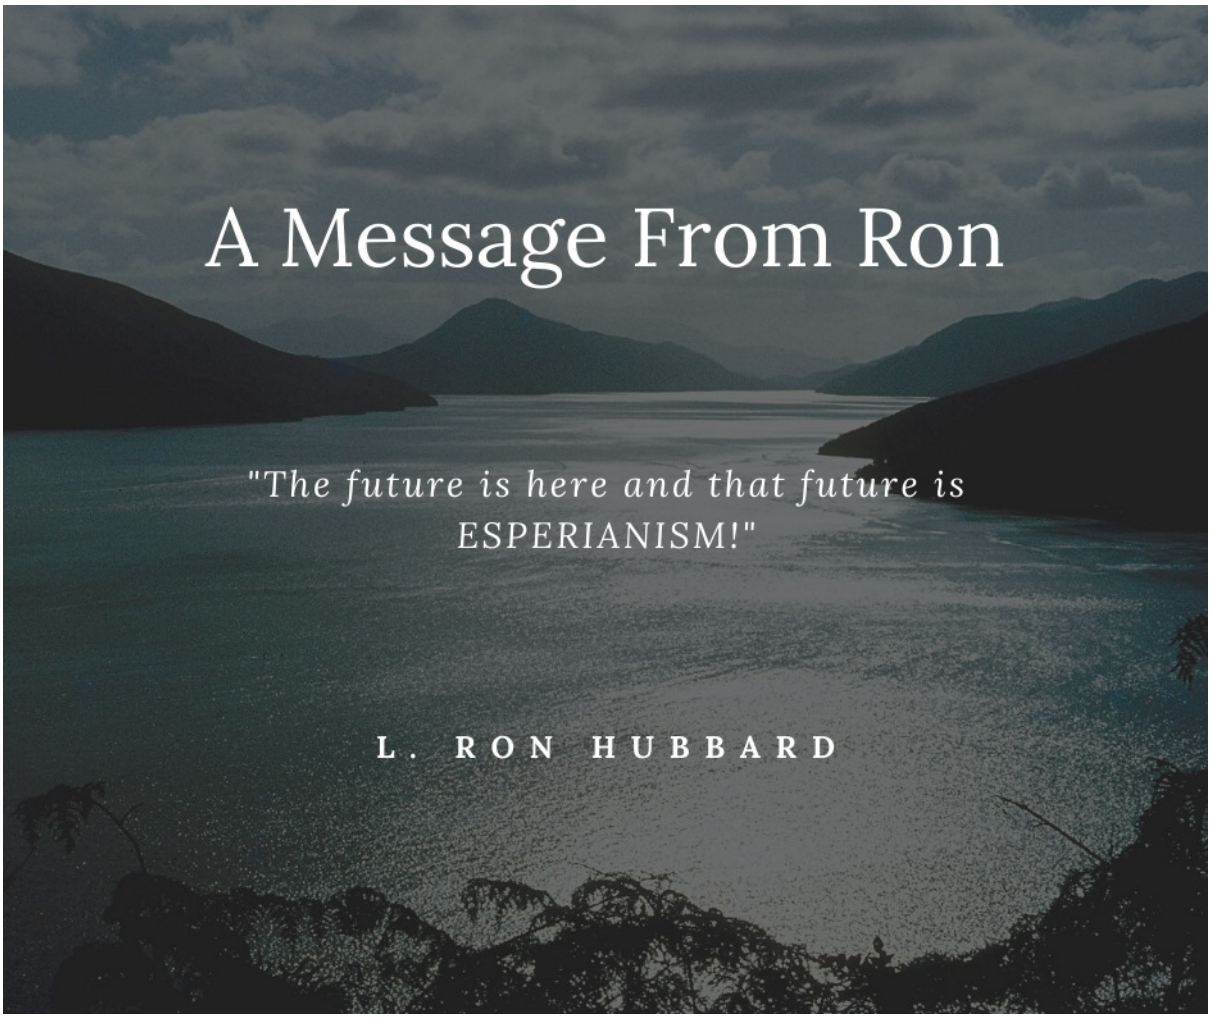
We now have 200 members here in the group if not in the IGC but that is still GREAT!

Altogether that is probably more people than all of the rest of the Freezone and it means there is a LOT of potential in what we are doing here.

I cannot give specifics but I can say I have seen about 100-150 individuals that have downloaded free ESTB's who I have not previously known or interacted with which puts the total number of what were are doing member-wise at about 400!

When we consider that this group and movement are only about 6 months old this shows beyond a doubt that we are on the right track.

Let us keep it up.



ESPERIANISM TECHNICAL BULLETIN

SEXUAL IDENTITIES AND PREFERENCES IN ESPERIANISM

W&W to Use: Can be studied by anyone at anytime.

W&W Not to Use: Should not be read if a person has not understood the historical context of sexuality and homosexuality in Scientology.

Otherwise this may lead to confusion but once this is known it is safe to study this issue.

The Purpose: To define and clarify what the policy and viewpoint is on sexual preferences and identities in the practice of Esperianism and how to address them when confronted with them.

Summary: When it comes down to it there are three classes of sexuality as we know them here on planet earth and they are:

1. **Heterosexuality.**

2. **Homosexuality.**

3. **Any other new or unclassified gender or sexual identity such as gender-fluid and non-binary.**

Now the only thing that we should be concerned with as a society and within the practice of Esperianism is whether or not any of the three classifications above force or prohibit an individual from doing something or living their most optimal life.

Often in the case of being homosexual or belonging to another gender identity one can often be fearful of sharing this with a friends, family, and the public.

This situation would limit many of the activities and things that a person could participate in and definitely would affect their confidence and ability to perform in life.

The reason for this is that this group is prevented or forced to do things because of their sexuality or gender identity is either NOT what they identify as and are only confused or have other physical, mental, or spiritual factors that can be cleaned up with Phasing technology.

OR are exactly what they say they are!

There is a flip side to this. If a being is heterosexual, homosexual, or part of another sexual or gender identity and it ENRICHES their lives you can bet they are what they are.

In this day and age there is no reason why a person cannot be gay or anything else and it is no ones business what someone does sexually as long as it is consensual and with ADULTS and does not cause any harm for the individuals involved.

So the policy is simple and the way to handle it is even easier than that. If someone comes along and is interested in Esperianism and tells you they are gay, lesbian, etc… you just say “that is perfectly fine you are welcome here!” and treat them like anyone else.

NEVER treat them differently based on their sexuality or identity because they are there trying to figure out who and what they are like the rest of us and at the end of the day once they have gone through the majority of the Phasing Modules you will find out if they are what they say they are.

The important thing is that THEY are given the chance to figure this out for themselves and it is not our job to judge or interfere at any time based on sexuality or gender identity.

If they go through phasing and are still gay, lesbian, or something else then that is what it is.

This does not mean we ever try to change someones mind and that is not the goal. It only means that if someone is being prevented or forced to do something based upon this they are given every opportunity to clear up the cause with phasing just like anything else that can effect a person.

Let us never make the same mistake other religious and philosophical institutions have made in the past by ignoring the wonderful potential and abilities of the LGBT community that are drawn to us.

Many groups have said they accept these individual on the surface but their actions have always shown otherwise.

We will be the first group to embrace and to keep that promise and it will make the movement as a whole a lot better in years to come.

How to Use: Read, study, and understand once one has a grasp on older policies withing the Church of Scientology on Sexual Perversion.

PRECOGNITION PHASING

W&W to Use: Can be used by those who have experience with phasing and can produce results with it successfully.

W&W Not to Use: Should not be used by those who do not have experience with or do not understand the basic concepts of phasing.

The Purpose: To teach a person how to do this form of phasing correctly and to produce *supernatural* results.

Regular results are not enough with this form of phasing as it inherently does so much more and if done properly will produce changes and cause things to happen that cannot otherwise be explained by any conventional means.

Summary: All of the theory in the world is great when it comes to discussing Esperianism but if there is no WOW factor that sets it apart it will not go very far in differentiating itself form other practices that have come before it.

In the early days of Scientology many practitioners of that subject frequently referred to OT or Operating Thetan (highest level of spiritual obtainment in that practice) phenomena happening to them as a result of its practice.

These were things such as knowing information before it was going to happen, being able to read the minds of others, being able to move objects at a distance, influence events with ones will alone, and a whole host of other things that could be listed here.

The funny thing is that many years later these experiences and the ability to create them died off and was rarely heard about or spoken of again.

The fact remains that they did happen and could be reproduced if a person knew how to do it even if they could not control the outcome or how and when it would occur.

Many things can be caused to happen for the better or changed with phasing with its application in respects to the *individual* but what is even more miraculous is what happens when we begin to apply phasing to *others* and the *physical universe!*

But before we get into how that is done it is important to understand that when doing this type of phasing one must know that at all times we are completely *separate* as individuals from the charge, items, and circumstances of others and the physical universe.

In the past many made the mistake in the practice of both Scientology and its predecessor Esperianism of getting caught up in and trapped by the belief that they were phasing other beings at a distance and this was not the case.

For many reasons it can seem this way but it turned out to not be the truth under extensive research and investigation of over a period of about five years into why this type of phasing was not working while those who were doing it *swore* it was producing results.

Despite the fact many of them were bat-shit crazy by any standards and the goal of all of this (one of them at least) is to have sane beings produced by phasing.

So believe me when I say this is not the case and it is important to fully grasp this when going in.

Many do not know when we hit a wall as hard as we can with our fist and break it that we never actually make contact with a wall.

On the atomic level what occurs is the wall has more energy due to more electrons so it *repels* the fist and this is what causes it to break but it never *touches*.

The same principle applies when it comes to the separation of physical, mental, and spiritual energy as they apply to ourselves, others, and the physical universe.

Having explained this we can now move on to the process of how to phase others or the physical universe and bring about the manifestation of a PRECOGNITION.

THE MOST POWERFUL PHASING TECHNIQUE

TO EVER EXIST

The reason this is the most powerful phasing technique to ever exist is it allows a person to tap into information, data, personality traits, and a whole list of other things that cannot be known by any conventional means or beforehand.

As an example say you were going for a job interview and you had never met the person who was doing the interview and knew nothing about them.

It would make it very difficult to then go in and give a thorough job interview with this person because you had absolutely no information on how to deal with them.

You do not know if they are going to be friendly or angry or even if they would have a sense of humor and will laugh at your jokes or take them offensively.

On the flip side if you knew beforehand what type of personality this person had or the least bit of insight into their behavior it would make it a lot easier to react and give a good job interview.

Now we are not talking about the ethics of this and whether somebody would have an unfair advantage but that this would simply enable them to act the most optimally given the situation.

But if the person knew all these things beforehand there should be no reason why they were not able to get the job because they could say and do all the right things at the right time and both parties would be satisfied.

Often in society a person having all the right qualifications may go on to say the wrong thing or present them in a fashion that is not favorable to them or they simply may not know or associated with the correct people.

This is definitely an unfair advantage for a person that has worked hard the gain the skill sets and qualifications they have in life to be turned down because they may be socially awkward or for some reason that has no bearing on if they can perform in a work environment or not.

If there were a tool that allowed everyone to know most of the information regarding a person, place, or thing before they interacted with it or them.

There would not be much that a person could not then accomplish and if they drilled this skill enough it could become a natural ability.

This is what *precognition* is and it is the most powerful phasing tool that has ever been developed and probably ever will be.

It is: foreknowledge of an event, especially foreknowledge of a paranormal kind.

And this is how obtain it!

HOW TO PERFORM PRECOGNITION PHASING

Precognition phasing is essentially performed exactly the same way as standard phasing is done on the individual including the approximation and then phasing steps.

The only difference is that we are applying this to another individual or something within the physical universe instead of ourselves or someone that we are directly working with.

So in the example above where a person is going for a job interview we can simply sit down with a sheet of paper and do an approximation on a question such as "what type of personality does the job interviewer have?"

We then list them out until we find one that makes us laugh and then find out of the three prior and three proceeding questions on the list which one seems to satisfy all of the questions on it.

You can then do another approximation and determine the exact number of items connected to the final answer on this list or go ahead and proceed with locating and running a physical, thought, and spiritual incident connected to the item on the list.

What will happen is by the time you're done with this process you will not only know what type of personality this individual has but you will also get the information and context to go along with *why* it is the way it is.

You see. The incidents that will be run will actually be *their* incidents and this is what will give you the data and understanding of why they are the way they are.

Which you can then use later to your benefit because you understand it.

So if the person doing the interview is determined to be an angry personality the incidents that you will run into will be the ones that caused them physically, mentally, and spiritually to become angry in this lifetime.

The same process can then be repeated on things in the physical universe provided they are not a living being.

In the same way data can be collected on beings it can be collected on objects and places and times.

That is how precognitions are brought about and once someone has phased others and the physical universe long enough they can get to a point to where this ability becomes so fluid it becomes a state of existence all of its own.

In my own experience it is hard these days to go into a room and not know exactly what type of people are present and what it is they are up to at any given moment.

So there is no reason why anyone cannot obtain this with a little bit of practice and all it takes is the application of the above.

And whatever you do under *no* circumstances go into this with the idea you are going to be able to manipulate others to your will as this is not the point.

If you do it will be disastrous and you will be lucky to live through it to learn the lesson.

So take my word for it.

How to Use: This is to be read, studied, and applied by those who are experienced with phasing theory and practical application.

It is not recommended to try this until you have a great amount of experience with phasing on yourself and others but if you have some experience and are confident with your abilities you may try.

[Music playing]

Hello one, hello all, I am your host, Lafayette Ronald Hubbard, and this is the official Esperianism Institute podcast!

[Other music playing]

Hello everyone, good morning, good evening, whatever part of the world you may be in! My name is Lafayette Ronald Hubbard, and this is the official Esperianism Institute Podcast. It is Saturday the 24th of October and I would like to take a quick 15 minutes of your time to explain what the Esperianism Institute is and what Esperianism is.

Now, for those of you who may not be aware and may be listening to this for the first time, Esperianism is a religious belief and spiritual practice. It is also a new word that was recently founded over the last 2 years. Historically, it is based off of the beliefs and practices and sciences of Dianetics and Scientology, which were founded by the American sci-fi writer, physicist and researcher L. Ron Hubbard and...beginning in 1950, which spanned a time period of several decades thereafter until his death in 1986, and this word Esperianism, or this belief and practice is actually formed from a few words, definitions and terms, the main one being ESP, meaning extrasensory perception.

And these are all the things that have been recorded throughout human history, such as telekinesis, which is moving objects with the mind or at a distance...pyrokinesis, setting things on fire at a distance...telepathy, which is reading the minds of others and a whole host of other things that are classified as extrasensory perceptions, meaning they exist outside of, or are demonstrated outside of one's normal touch, sight, sense, smell, taste...being the major sense channels or sensory channels or perceptions of the human body, and the second major word or definition that forms the word Esperianism is *Esper*, which is an older term used around the 18th and 19th century meaning a spiritual being, an ethereal or etheric spiritual being, which was based off the premise of the physical universe or the world being permeated by an ether or spiritual being.

Thus you get the word Esper which was a spiritual being that consisted of these same types of spiritual energy and the I-S-M suffix that goes along with many words to denote a practice or belief in a subject, an ism basically would be the practice or application of the subject, so

these form the word Esperianism!

Now basically, the quick and easy definition of that is: “An immortal spiritual being that believes and practices,” or rather, “a belief in a practice IN being an immortal spiritual being of spiritual terrestrial heritage with greater or lesser extrasensory perceptions or abilities.” Now, many have these in varying states, and many have these abilities all over the world, to a greater or lesser degree, it’s just a matter of practice. Now, that all being established fact, it's a belief in or practice thereof of these things.

Now, I myself and many others have continued the research and development of what were the original basics and principles of Dianetics and Scientology, which then turned into Esperianism, the main one being we practice a special form of, not really spiritual counseling, but it is referred to as *Phasing*.

Something being in phase, which is an electromagnetic, sometimes mechanical phenomenon is...imagine you had two wheels that were spinning at the same speed, same direction, they both move forward for instance...these are in *phase*, or in harmony with one another.

Now, of course, if one speeds up while the other remains at the same speed, it'd be out of phase, or out of sync...out of harmony with one another. Now, the main principle and belief and practice in Esperianism in addition to what I've already mentioned is...that the universe, everything we see around us is a collection and an interaction of physical, mental or thought and spiritual energies, and at certain points or bridges that, for instance, physical to thought and the thought energy to spiritual energy, which are all electromagnetic phenomena, you can measure electricity, which is physical, and you can actually measure thought as well, which has been done in Esperianism...unfortunately spiritual energies, not yet!

We are not yet able to measure...although we can determine from the thought, the upper harmonics or frequency of that spiritual energy, but that would be theoretical, the actual instruments necessary to do that don't currently exist or may never exist. Although, as I said, you're still able to theorize and extrapolate from that exactly what that harmonic of spiritual energy would be, and the same way these tiers mentioned earlier...going to a disharmony or become out of phase with one another, we become out of phase with these energies, because we are a spiritual being or entity inhabiting a physical body, operating it with thought and spiritual energy!

So, at any point to where there are these disharmonies, or these out-phasing occurrences, we record them...most of us refer to these as memories or thoughts and these out-of-phase moments then cause us to demonstrate all types of behavior, cause us to become ill, cause us to suffer both emotionally, physically...also mentally AND spiritually at times!

So, the process of phasing is one identifies these moments through various techniques, bring them back into phase or harmony with one another and it then causes them to resolve! So, if one were to say what the actual practice of Esperianism is, that would be...that's its main

focus, to bring that technology, as we call it, of these techniques to the general public as a whole, in order to enrich the lives of your friends, family members and their loved ones.

So, the Esperianism Institute itself was recently founded by myself, hundreds of other ex- and independent Scientologists, as well as many other people from other fields and belief systems to begin to disseminate this information digitally on the internet, to produce lectures, courses, films, written materials, books on this new and exciting belief system subject, and to get that out to the general public. As far as the Esperianism Institute podcast, I will be hosting it!

I intend to keep it between 15 minutes and 1/2 hour, between 15 and 30 minutes...to keep well within most people's attention span. A lot of people like to play their games, a lot of people like to watch Netflix, Amazon, a whole host of other things...I myself do at times, I like to kick my feet up! So, it's good to keep it within that time frame I believe, and the main goal will be to release this information to the public!

So, anyone out there listening can take it, study it, learn it, use it if they choose...no barriers, no interference from anybody...anything that is given publicly, anything that's not on our official store or anything else...and most of those things we just ask for a donation, but most downloads and things will be free...it is yours to use, it is yours to practice, that is the purpose of this!

In the future, I plan on having guests from all hosts of fields, so that will be interesting and...somebody's podcast, or maybe even some of the lectures I plan on giving, which will be of a more technical nature on the subject, may run a bit longer.

Although these podcasts will keep to between 15 minutes and a half hour, and I intend on covering many, many different aspects of, not only Esperianism, but its history, some things that have to do with Scientology and some of the things that occurred with that subject...so for anyone who's listening, maybe new, or who was interested in those things, I would encourage you to listen, it'll be very interesting!

Moving forward, there will be a lot to learn, but you may not know...and again, bear with me, this is a learning process for myself, I've never hosted a podcast...I'll be hosting, directing, editing and producing most of these things...while I'm using modern tools and technology, again, I don't do this professionally for a living. Well, Esperianism I do, I am the founder of the belief system, but, as far as the secondary things...podcasts and all hosts of other stuff, I don't do that professionally or for a living, so bear with me!

Whether you're Christian, Muslim, Hindu...whatever belief system, philosophy you may practice, whatever background you may come from, whether you're straight, gay, homosexual...whether you're any other gender group or identity, you're more than welcome and...with that being said, I look forward to getting this information out into the hands of everybody, any support you may give, whether it's simply likes on social media, or more importantly, spreading word of mouth to your friends or family members of how this may

have enlightened you or helped you would be greatly appreciated!

Like I said, this is something I do as a passion to help others, as a hobby...I also have a full-time job...so, it's not like I'm making tons of money or getting rich off of any of this. Again, it’s to help other individuals and mankind and move things along...so, if that's something you're interested in and passionate about, I think you'll find what we have to offer of great benefit to yourself and others!

With that being said, I'm going to end off here and wherever you're at, whatever part of the world, whatever time zone...remember to be of service to others, take care and God bless!

[Music playing]

This has been another episode of the Esperianism Institute podcast, I have been your host, Lafayette Ronald Hubbard, and remember, no matter where you are or what you are doing: Be of service to others!

[Music ending off]

Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

October 25 at 1:19 AM ·

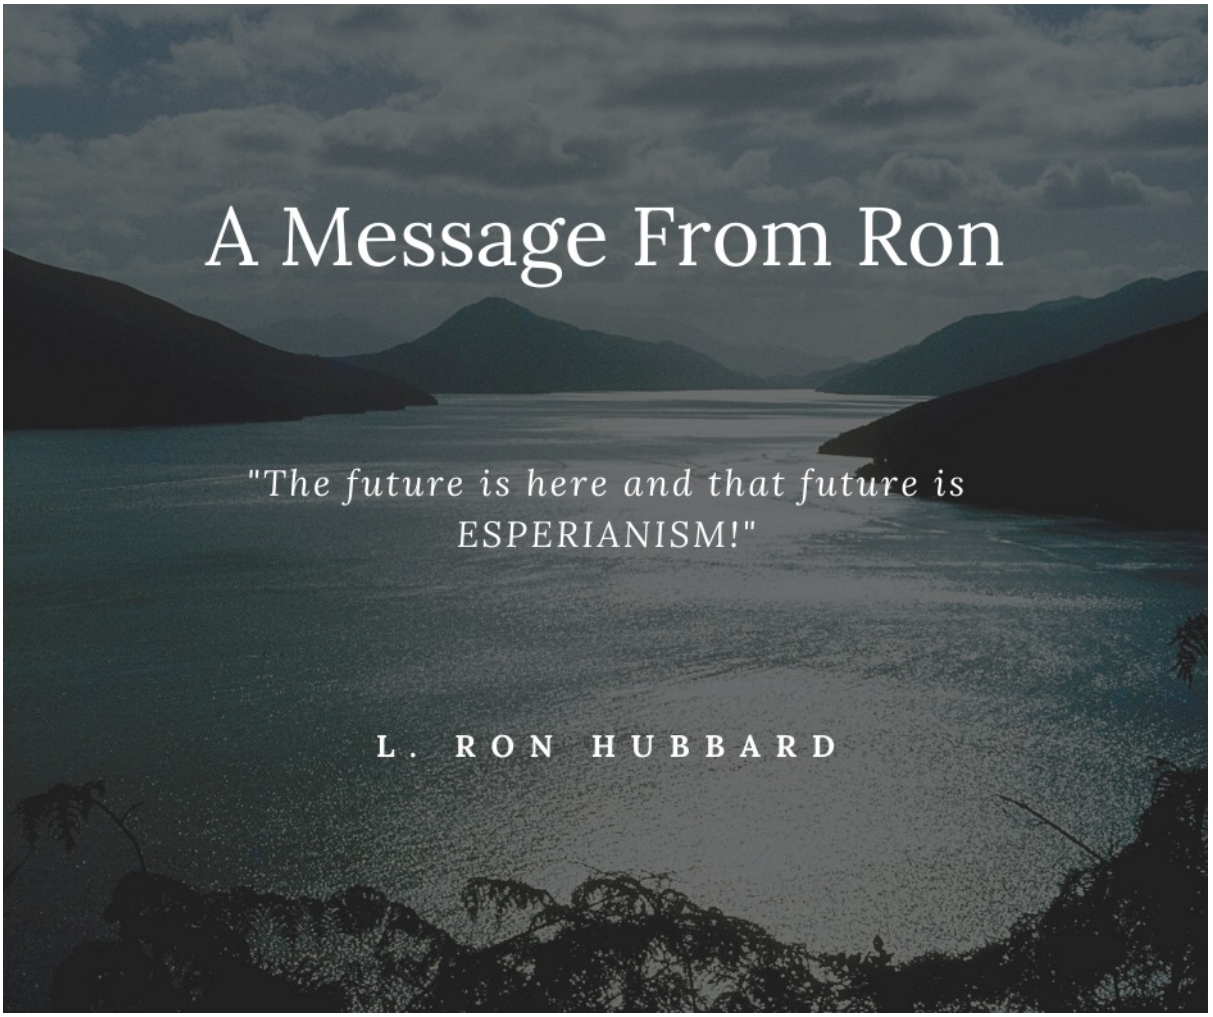
So we officially have a podcast up and running for the Esperiancism Institute.

It can be listened to directly on Anchor https://anchor.fm/lafayette-ronald-hubbard and can also be found and listened to on Spotify https://open.spotify.com/show/5ddNrGOjiB6qVEBSF5QZiw.

I will also be putting each of the episodes up for download on the store just so that we can retain control and they can be downloaded and distributed at will https://gum.co/bsVBn.

This is truly a history-making moment and we are now in from of all the world!

Congratulations everyone and thank you!



Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

October 25 at 3:04 AM ·

I was just sitting here and thinking about the irony of where I find myself now.

In fact. When this thought occurred to me I could do nothing but laugh and it was quite some time before I was able to stop.

The truth is I am very hard on myself and all that I do with Esperianism because I do not want to make the same mistakes that I made last lifetime.

Meanwhile you have half of the Independent Scientology criticizing me for one thing or another and in particular for being in prison.

Now what you don't know is that I went to prison when I was 15 and was in-and-out until the age of 29 and when that happens to someone it effectively STOPS their growth.

The rate at which a young man is able to experience and learn things is dramatically affected because they are separated from the rest of society.

EVERYTHING that a man learns from 15 to 29 I did not get a chance to experience (expect over the last 5 years) and effectively had the maturity and intelligence of an uneducated boy.

So let us fast forward now:

I have proven I am the best auditor on the planet.

I have demonstrated that I can research and discover tech that no one else possibly can.

While I am not as great a writer as I was last life I can hold my own and perform comparably when needed.

My general ability now may be greater than that of L. Ron Hubbard if you do not believe I am him.

I have unified the entire Independent Field where others have failed.

Am in the process of researching, codifying, and writing a new bridge that is at least three times greater than the previous one.

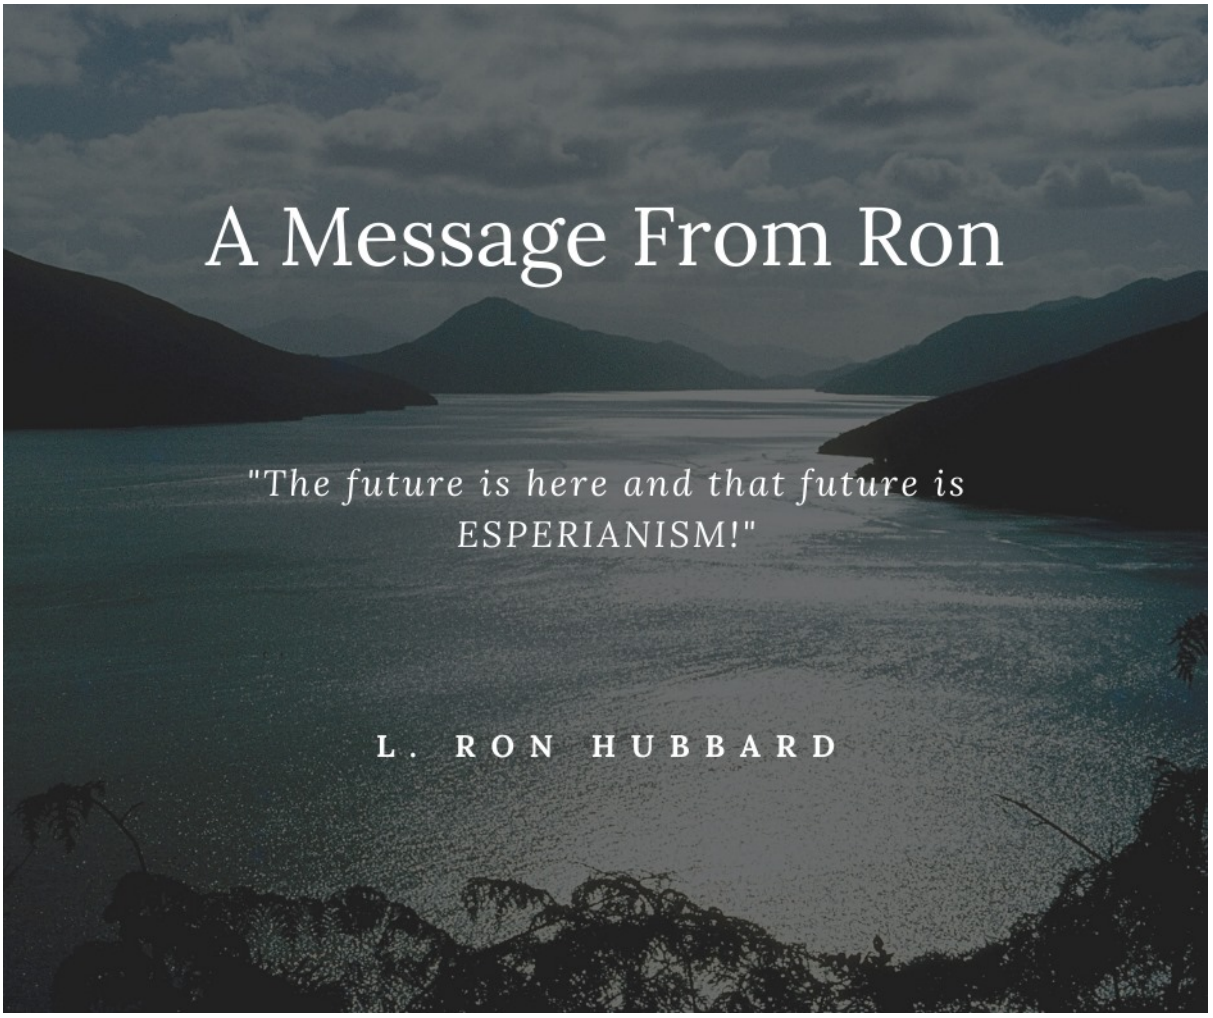
And have done so many other things in the last five years I have forgotten them.

So the real question is how do all of these OPINION LEADERS and great AUDITORS that have been criticizing what we do get SMOKED by a 15-year old boy with the education of an 8-year old?

And if I am just a regular man then what do you suppose I will be capable of in 20 years?

You better pray to whatever you believe in that I am L. Ron Hubbard because if not your existence is questionable.

Now that is something to laugh about!



A Message From Ron

KNOW THEM BY THEIR ACTIONS

W&W to Use: Anywhere.

W&W Not to Use: N/A

The Purpose: To provide data on how an Esperian can identify those in their life or surroundings that do not have their best interests at heart.

Also to be able to do this without having to go to extraordinary lengths or jump through a bunch of hoops in order to do so.

All of us have met THAT person who if we would have known beforehand would be so much trouble would have made us turn and go the other direction in order to avoid them at any costs.

This information is to help you avoid that situation and it may be difficult for some but the reality is there are just some people who cannot be helped and that is that.

It is better to accept it and to just move on with your life instead of putting yourself through hell due to some misguided concept of honor, keeping ones word, or anything else for that matter.

Summary: So in order to avoid the worst of mankind we now have the answer (for the individual at least) but it sometimes comes at a cost of lost relationships or opportunities if one is wrong in applying the solution.

It is not as bad as NOT doing this but it can happen so be prepared if it does and even if it does you will be much better off for having known this data and applying it then not knowing it when needed.

Now when it comes to identifying the good guys from the bad guys (for lack of a better way of putting it without going into detail) I cannot emphasize what I am about to say enough and it never fails to be true!

If you simply look back on your life where someone did not keep their word or do the right thing you will see that this was true in every single case and it is this.

AN HONEST AND ETHICAL PERSON WILL ALWAYS DO **EXACTLY** WHAT THEY SAY WHEN, WHERE, AND HOW THEY SAID THEY WOULD WITH NO EXCEPTIONS.

Now this does not mean that life circumstances or emergencies do not pop up from time to time but if it is just a minor inconvenience or a small loss a good guy will still do what they said they would and deal with the loss or inconvenience.

That is really it and it is that simple. Does someone show up on time for their job? Do they pay their financial obligations on time and do not make excuses?

When they said they would help move the furniture but would rather watch the game or take the day off do they still show up to do it?

If so you have a good guy that will be capable of reciprocating your own morals and ethics but if not drop them like a hot potato.

To give a raw percentage on this if someone does what they say at a rate of about eighty percent then they are moral and ethical or “normal.”

A person who does not is INCAPABLE of this and there is no better way of protecting yourself than doing what you say you will and avoiding those who do not.

If not life will only be more difficult that it has to be!

How to Use: The information here is meant to be read and then applied in daily living until a person can see it to be true for themselves.

RELEASED 28 OCTOBER 2020

WHAT IS STANDARD TECHNOLOGY

W&W to Use: Anywhere

W&W Not to Use: N/A

The Purpose: To clear up any misunderstandings on what standard technology is and to provide the same standards I use to determine if something is standard or not while researching and developing it.

Summary: There has been a lot of confusion on this point in the past and many have used the definition in Scientology of "any valid process that raises tone is standard technology" and while this is partially true it was only a small part of a much larger whole.

This means that if a phasing process made someone feel better then it was considered standard but this is not true and does not hold up to real world application.

The other half of this is how many people can be made to fell better STATISTICALLY and that is another argument and thing altogether.

In Scientology and Dianetics one goal was always to produce results that were statistically higher than any other practice or else these practices would be mediocre at best or worse than those that came before them.

That beings said what most do not understand is this:

If one factors in the placebo effect when it comes to human behavior and spiritual belief and healing then you must subtract approximately 30% (given the percentages of the placebo effect given its known rate of 15% to 70%) from all statistics to determine exactly where a practice is at.

So when it comes to Esperianism and phasing you have:

1 out of 4 people is 25% - 30% for a statistical success rate of -5%.

2 out of 4 people is 50% - 30% for a statistical success rate of 20%.

3 out of 4 people is 75% - 30% for a statistical success rate of 45%.

4 out of 4 people is 100% - 30% for a statistical success rate of 70%.

Now the way this translates into the physical universe is that number 3 above will produce just enough results or the type that come and go to appear as if something is happening while 4 will produce uniform and workable results EVERY time.

The first two do absolutely nothing and are not worth the effort.

Scientology only accomplished number 3 and Esperianism is now producing number 4.

In the past only I was able to produce number 4 with both Scientology and Esperianism while no auditor today is capable of number 3.

So to answer the question of what Standard Technology is you have it at 4 and it appears that in the physical universe no practice can exceed 70% efficacy but this appears to be 100% so it is the same thing.

If anyone tells you different they are lying to you or do not know what they are talking about.

If you want to produce standard results they need to be uniformly applicable across all those who come before you and barring those who cannot be helped for reasons outlined in many other bulletins.

When it comes to Esperianism strive towards number 4 above and when you can do it you will be capable of putting out tech in the same fashion that I am as this is the same standard I have used in its development from the start!

How to Use: Can be read and applied by anyone.

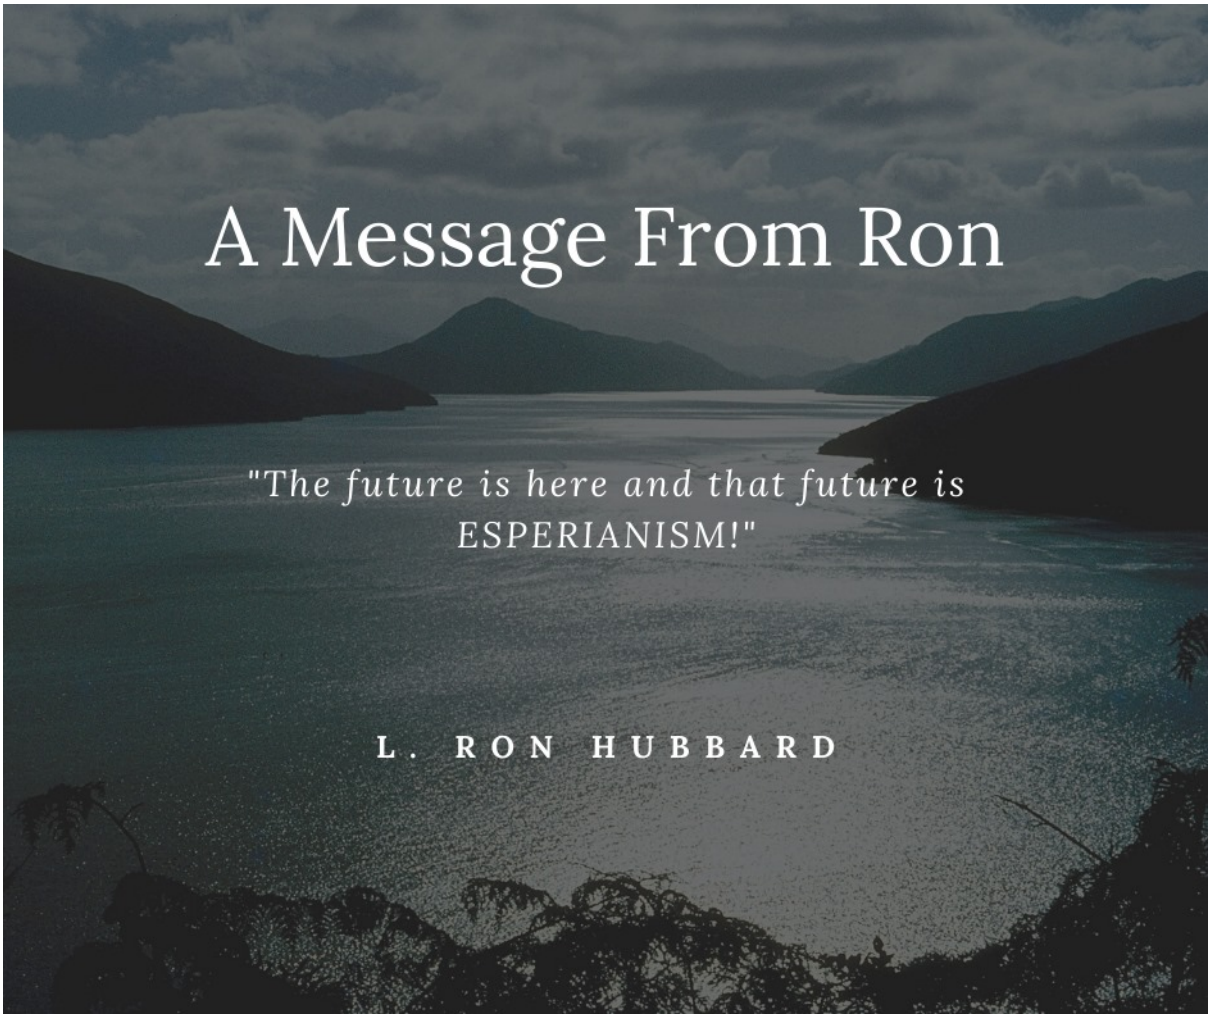
I was driving today and it hit me that we have entered a new era of technology in that Esperianisim can best be described as an "APPLIED SPIRITUAL PHILOSOPHY".

We have managed to take the Judeo-Christian aspects out of the religion and it enables the individual to now apply this technology without any ENFORCEMENT or INHIBITION whatsoever.

Very exciting times indeed!

When we no longer have to do things because the creator or an institution tells us to but instead what we do for ourselves and others is based upon factual and demonstrable evidence and experience.

The world is soon going to be a very different place for us all.



ESPERIANISM TECHNICAL BULLETIN

ISSUE # 15

RELEASED 4 NOVEMBER 2020

WHY WE DO NOT NEED *THEM*

W&W to Use: Anyone can read and use this data.

W&W Not to Use: N/A

The Purpose: We need to begin as a group to make the transition from being dependent upon others for our physical, mental, and spiritual well-being.

This Bulletin explains how this can be done and how we can identify those who would encourage and guide us towards more self-determinism instead of greater dependence upon them and claims of this being necessary.

Summary: If you do not hear this from anyone else that you are going to hear it from me.

That is we are now in an era of scientific and technical application of phasing and Esperianism that there is no longer a need to have a reliance upon other individuals for our progress in Esperianism.

Simply put. A person who wants you to succeed will encourage you at all times to read, study, and apply all aspects of phasing and Esperianism until you have a practical understanding of the subject and are able to put that information to use for yourself.

Someone that is trying to help you and has no ulterior motives will want this for you because ultimately if you're able to do all of these things for yourself it will be much more effective, far-reaching, and cost-efficient for everyone.

When it comes to those who cause you to have a reliance upon them you will find they will not be open or transparent about what they are doing and will try to inadvertently drive you towards greater reliance upon them as an individual or practitioner.

This is always done out of an apparent desire to “help the person along for their own good” or some similar justification.

If you experience this it is recommended to run in the other direction and have nothing to do with such individuals as it will only drive you towards lesser intelligence, well-being, and ability than when you started.

No one needs these types of individuals within our groups or in society and you are much more intelligent, capable, and able than you will ever possibly know.

Always trust in yourself and your own capabilities and you can never go wrong. When it comes to determining whether or not you need THEM it is very simple.

1. If they push you towards greater ability and self-determinism at all times they are working for you not against you.

2. When a person is driving you towards more dependence and reliance upon them they do not have your well-being at heart and are working against you and not for you.

Never make the mistake of confusing the two and we will all be better off but especially YOU!

In Esperianism we are ALWAYS working towards making the individual more able, smarter, and better than they were the day before.

ALWAYS!

How to Use: Read and apply once a practical understanding is gained.

RELEASED 4 NOVEMBER 2020

WHAT IS THE INTERGALACTIC CONFEDERATION (IGC)

W&W to Use: Anywhere and by anyone.

W&W Not to Use: There is nowhere this cannot be used.

The Purpose: To give a brief explanation of what the Intergalactic Confederation is both historically and in the present.

This is being kept brief in an attempt to avoid any disbelief or confusion with what is going to be reveled but a basic definition is needed in order for this subject to be understood properly.

Summary: The IGC or Intergalactic Confederation and what it is has been a bit of a mystery to us all until recently.

New data has come to light on the group historically and what its function was and it has given some insight on the activities of the *current* group that exists.

But before that is explained it is important to understand how this information was obtained in the first place or a lot of this will ultimately make no sense.

The process by which this information was gathered was by using the natural mechanism of the human mind/spirit to go back into past lives and universes in order to recount experiences.

This ability has been tested and confirmed by many different fields over the last hundred years from psychology, to spiritualism, to hypnotism and what all have confirmed is that a person has the ability to recount or recall past lives and existences.

Dianetics and Scientology heavily incorporated this ability into their practices but where many others forced individuals to do this they allowed the individual to do it naturally and without being coerced.

Unlike the other practices they were also able to take the recounting of past lives not too long before and verify them with existing facts and even living family members or friends of the person who had lived the past life.

All of this being just as scientific as any of the other fields it was concluded that this was in fact possible beyond a doubt.

Even more amazing is while a person was capable of recalling lives hundreds or thousands of years ago they were apparently able to do it millions of year back in time!

The same way you can take a person who says they were Joe Smith a hundred years ago and confirm through records that they were who they said they were you can do this with incidents and times farther back in time.

The basis for establishing the facts was slightly different in that it was done by cross-referencing many different individuals who recalled lives that took place in similar places at similar times this far back to see that it was all real.

In most cases these people had never met and were often from different parts of the world so there was no way they could have said the same things happened a hundred million years ago at a particular place interdependently of one-another.

That is the process by which the information on the IGC was gathered both historically and in present time.

Now *both* versions of the IGC are basically a confederation of a certain number of planets and extraterrestrial races that formed in order to maintain order throughout the universe.

Yes the entire universe! It can sort of be looked at like a United Nations of the galaxies and universes that are known and traveled by those capable of doing so.

We also know that the universe we find ourselves in is approximately eight-hundred quadrillion years old and there appears to have been other cycles or copies of this universe that have taken place and have already ceased to exist.

Each one of these was similar but not quite the same and the IGC that we talk about historically is part of the previous universe to the one we are in now.

When a universe ends (and we will not go into the details now of how that happened) many black holes form to the point to where the whole universe becomes a giant white hole and it implodes on itself and then explodes again.

This is where the Big Bang comes from that science is at a loss of explaining at the moment and all of the energy is then reformed on the other end over eons of time.

Most likely this is why life is so similar and repeats itself to a degree and in the same form and fashion.

That is important to understand as it helps to explain why we have a *similar IGC* that exists today but is not as large or quite the same as the one in the previous universe.

Obviously that one was over eight-hundred quadrillion years old so it would be much bigger and extensive than the current one.

As to the modern IGC we have been a part of it since around the beginning of WWII when nuclear and other advanced technologies were created for the first time.

The United States along with every other major nation here on Earth have one or more representatives that meet yearly at a secret conference that has known extraterrestrial races in attendance to discus global political, social, and economical issues and plans.

Those are just the ones that are in attendance but many more have been identified but do not belong to this Confederation by the US Government and military.

Many think these things are a conspiracy because they do not understand or accept that there are beings out there who are more intelligent and powerful than we can ever imagine and they are here and have always been.

It has been said that if something is technologically advanced enough that it would appear as magic to those who where interacting with it and that is the case here.

These beings have been manipulating man since he has existed and when confronted by this advanced intelligence and technology many have been driven mad in the process for a lack of not knowing what is going on.

So this is anything but a conspiracy but it is hard for world governments to admit this as they have been lying about it to the public since the initial discovery and decision to keep these things a secret.

Now mankind is faced with the choice of using advanced technology and Artificial Intelligence to enslave itself or to ultimately go free and to admit these things.

That is where the IGC of Esperianism comes in!

Not only are we practitioners of the Esperianism faith and science but we come from a long spiritual-terrestrial line of protecting those who others would take advantage of and enslave.

Ultimately we will establish a form of technocratic government here on Earth in order to ensure its survival and to travel to the stars but in order to do that we have to PUT IT THERE.

By putting it there I mean we have to work towards doing it every day and to educate others on these concepts and what they mean to us all.

To spread the TRUTH about what and who we are and this will ultimately lead to freedom but if we do not DO IT nothing it going to occur on its own.

The popular term for this is Disclosure or Cosmic Disclosure and there are many other good people and groups pushing for the same thing.

It is what the true IGC of the Esperianism faith means to us all and there is no higher activity or group that one can aspire or ascribe to than the IGC.

This is the short history of the IGC and there will be a more extensive one written up at some point.

How to Use: Read and study until a practical understanding is gained. For those who are on the fence about some of the data here that is OK.

You will eventually find out if these things are true for yourself or not but keep an open mind until you do.

After much consideration I have decided that many individuals who are not personal friends and supporters of mine will be removed from my Facebook thread.

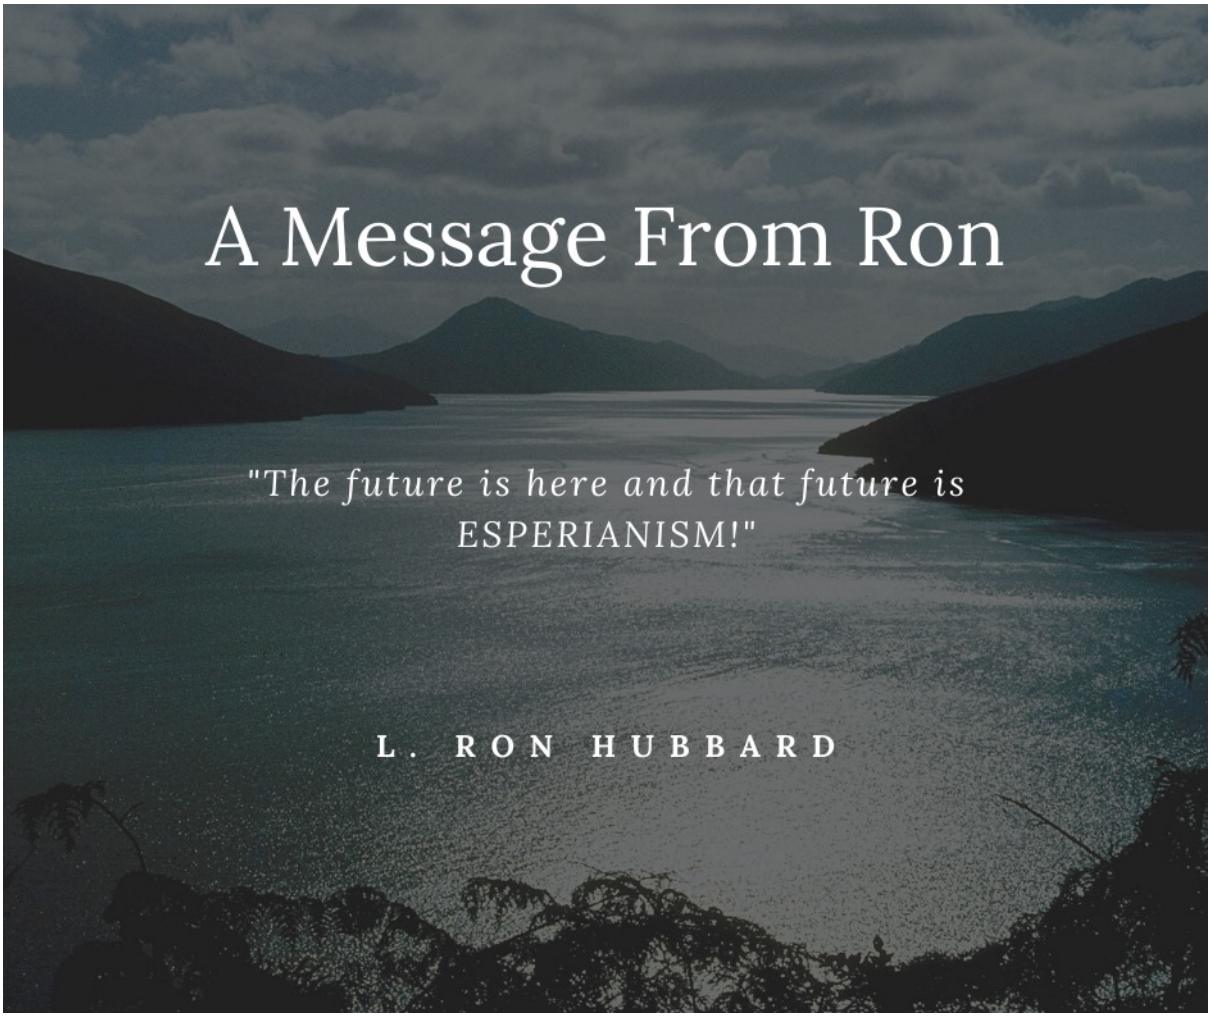
Those who I decided to leave on my friends' list are going to be those I know intimately enough that I would trust them around my own friends and family members.

It is necessary that I separate my personal life from my professional life and this will be one aspect of doing that moving into the future.

So if you are removed from my friends' list please do not take it personally and know that the individuals who remain there have to meet an incredibly high standard in order to do so.

This is a standard that far surpasses what may normally be expected of individuals in the group or who are participating in or are members of the Esperianism Institute.

You are still welcome to remain a member of those groups and to get into communication with me anytime you need to.



Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

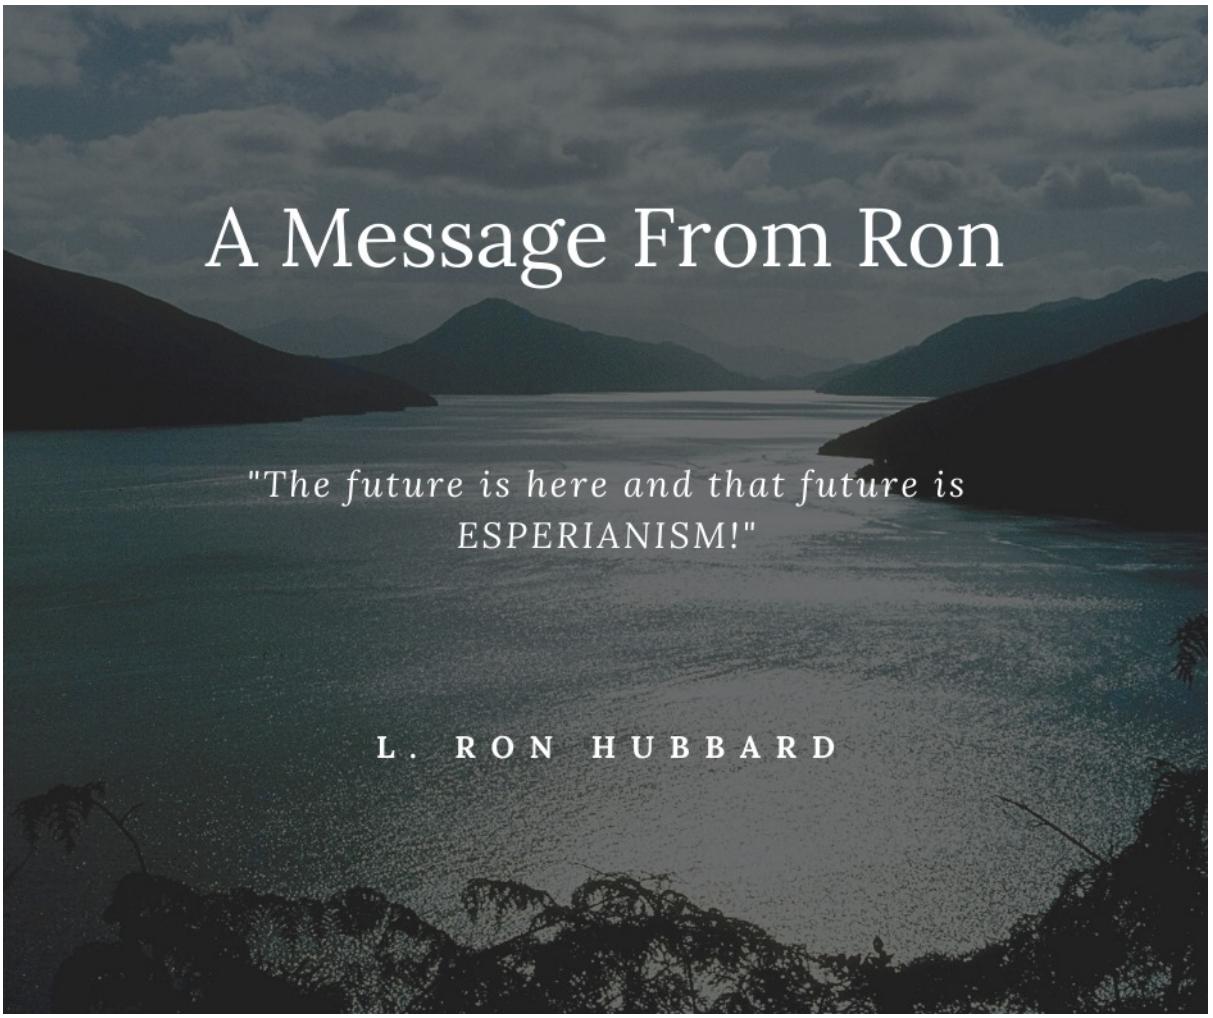
The first phasing module is currently being planned and I may have it out by the beginning of the week.

Once the initial one is done the turnaround for the rest may be as little as a week or two so it looks as if by the end of 2021 we will have a fully outlined lower path or Bridge for people to follow.



Lafayette Hubbard

November 10 at 11:57 PM ·

I have now discovered how the universe was created and know its formula.

With it we can chart a way out of this mess and BEYOND.

The formula is a follows:

θ = P + (-N)

Where **θ** is defined as all **Static** (both positive and negative but in balance with one another) experiences over a given period of time.

Where **P** is defined as all **positive** or **analytical** experiences over a given period of time.

And

Where **-N** is defined as all **negative** or **unconscious** experiences over a given period of time.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 17

RELEASED 17 NOVEMBER 2020

APPROXIMATION BY PREASSESSMENT

W&W to Use: Should only be used by those who have experience with Approximation, Phasing, and Precognition Phasing.

W&W Not to Use: Should not be used by those who do not have a great deal of experience with phasing and its basic theory.

The Purpose: To explain how to use this tool in Precognition phasing and to explain the difference between the former version of preassessment and this modern one.

Summary: In phasing items or difficulties that were discovered with the Approximation method it was quickly discovered that many were having difficulties with what they were running and in particular when doing Precognition phasing.

So I went to work discovering why this was occurring and was able to develop a secondary form of assessment (as Approximation is essentially an assessment) called Preassessment because it technically takes place before doing an approximation step in phasing.

Although it actually takes place all at the same time and on the same list but you will see that for yourself.

Also do not confuse this form of Preassessment with preassessment that was previously used in Scientology and Dianetics as they are two completely distinct methods of assessing something.

A preassessment is easily done. A person does an Approximation on a difficulty or issue they are having and once discovering the proper item on that list they then take it and write it on a separate piece of paper.

This process is then repeated nine more times until there are ten total items on the second sheet of paper that were found with the Approximation method on the original difficulty or issue.

The Approximation method is then done on the list from the second sheet of paper and the item from it will then be used in phasing.

The purpose of doing a preassessment is to specifically target the layer of charge in the physical universe that is a combination of ours and another person, place, or thing.

This is what is referred to as Composite Charge (composed of two or more things) and should never be mistaken as being another living being, person, place, or thing.

When doing Precognition phasing one is only capable of running out their own charge and actions in an incident that took place in the past.

We cannot run it out on the behalf of another person or spiritual being. To attempt to do this will lead one down a never-ending road and roller-coaster of going up and down in life and never making any steady progress.

This is done correctly by first unlayering individual charge and then getting at the Composite Charge as mentioned previously and this is done by running an Approximiatoin by Preassessment.

It has two purposes. The first is it can be used in place of Approximation when running Precognition Phasing and the second is it can be used as a tool to help refine an item when Approximation has failed in the first place when doing individual phasing.

How to Use: Is used in conjunction with Precognition phasing in place of standard Approximation or in individual phasing if approximation does not provide a runnable item despite being done properly.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 18

RELEASED 17 NOVEMBER 2020

APPROXIMATION BY ASSESSMENT

W&W to Use: Only to be used by those who have extensive experience with all previous forms of phasing and its tools.

W&W Not to Use: Should not be used until a person has a good grasp of Precognition phasing and the use of a Preassessment.

The Purpose: To teach how to do an Approximation by Assessment and explain what the target of this tool is.

Summary: The purpose of doing an Approximation by Assessment or just an Assessment is to target charge that is directly in the physical universe and is separate from what we usually know as a persons Case (total Individual Charge and Composite Charge) so that it can be run out.

It is done the same exact way a Preassessment is done with the exception that the target is not Personal Charge or Composite Charge but Static Charge.

So when a person does a Preassessment they simply do not target anything else except Static Charge or concepts.

Have you ever done all of the right things in relation to something but still there was no solution to it?

You did phasing, changed habits, or how you were doing things but still did not find a resolution to a problem?

That is because the solution is right in front of you all along but you cannot see or detect it because it is Static and you cannot "find" it.

The weird thing about static ideas, postulates, and incidents is that you have to detect the undetectable in order to trade a problem for a solution on a one-to-one basis.

This is unlike thought energy where you can simply say something and it can be a solution because we are capable of creating thoughts.

We cannot create Static. It is a fixed quantity that can be changed but never created or destroyed.

Let us use the example of a guy with a crippled leg. He has done all he can to find the solution to heal his crippled leg but nothing has worked.

He then decides to pick this up and do an Approximation by Assessment on "what is the solution to healing my crippled leg" and after doing the preassessment comes up with "to die and come back with a new body!"

Now this will work but this guy will never see this Static concept on his own as he would never think of dying just so that he can have a new leg.

Although this would be nothing to a spiritual being that cannot die. It would be a small drop in an ocean of infinite lifetimes.

A funny thing then happens. He decides that since he does not want to die in order to get a new leg he will just have it removed and replaced with something he can walk on a lot better then the crippled leg (that he was stubborn about and did not want to give up).

So this was an unknown (Static concept or idea) that then become a known for this guy.

The way to do an Approximation by Assessment is to always address the UNKNOWNS and only the unknowns and never something someone already knows or has an idea about.

If a person cannot say “I have no fucking idea” then this is not the correct type of assessment to use.

An Assessment is a Preassessment on the unknowns in the physical universe.

It only exists in the physical universe and it is a complete unknown that the person can have no means of knowing beforehand or with experience.

How to Use: Is used in conjunction with Predestination Phasing or to gather raw data form the electromagnetic band of the physical universe itself.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 19

RELEASED 1 DECEMBER 2020

PREDESTINATION PHASING

W&W to Use: Only to be used by those who are experienced with doing all types of Phasing and Approximation Assessments.

W&W Not to Use: Is not recommended to be used by anyone else.

The Purpose: To teach how to do Phasing on all Static elements that may effect an individual in the Physical Universe and to raise a persons spiritual electromagnetic frequency as a result.

Summary: Have you ever experienced one of those moments where everything was going either good or bad for you and it seemed like there was nothing that could change the circumstances that you were in and at the last moment that is exactly what happened?

There was just a turn in the air or the environment and it was almost as if the universe itself had changed in your favor?

I believe that we have all had this happen at one time or another and when it occurres that is *exactly* what happened to us.

It has taken many years for myself and many others to work this one out but what takes place is that we inadvertently touched upon or pulled on the very fabric of existence itself and caused a type of void to appear to compensate for doing so.

In another words when touching on Static energy in the environment it blows and causes the opposite to happen.

So in our example if things were going good they get better and when they are going bad they improve greatly.

For a long time the electromagnetic phenomena of Static and its laws and rules have evaded us but now we know what they are.

At least we know how it acts on a basic level but I am sure we will discover much more about this subject in the future and it has led to an additional definition of Static.

"The electromagnetic phenomena of Static manifests itself as Matter, Energy, Space, and Time without any of the characteristics of Matter, Energy, Space, or Time in the Physical Universe."

This is better understood when put in the context of:

Static Matter = Matter Without Mass.

Static Energy = Energy Without Dispersal.

Static Space = Space Without Matter.

Static Time = Matter, Energy, Or Space Without Motion

With this new discovery we now can Phase things within the Physical Universe and change them in favor of what is most optimal and ethical for everyone!

In order to do Predestination Phasing one does an Approximation by Assessment and then finds out which item on that list satisfies all items on it and "finds out what they all have in common"

This is a new and important step that will be incorporated into all Assessments and Phasing in the future when written up.

After doing that a person simply establishes which of the above Static elements apply to the item discovered via the Assessment *in the Physical Universe* and this should blow all the rest of the items associated with it.

Having added the extra step of finding out what all items have in common it appears to allow a person to have what used to be called a **Cognition** (self-revelation or self-discovery) in Scientology except that it occurs with every single Approximation, Approximation by Preassessment, and Approximation by Assessment that is done!

Meaning that moving forward Approximation will likely be the only technique used for Phasing and will eliminate the need to do and endless number of Phasing techniques to address different aspects of the mind, spirit, and life.

Although it is important to note that when doing Predestination Phasing a person should stick to only the above Physical Universe or Static elements and not try to run something in relation to a being or other beings.

This has nothing to do with beings and in fact these energies and phenomenon always happen or occur completely *separate* from any animate beings.

Best of luck to you all and you have the final and most powerful form of processing delivered right into you hands.

I trust you will all use it properly and truthfully!

How to Use: Read, study, and then apply if you feel you are ready and have the prerequisite experience.

One of the most important questions asked of me in relation to Esperianism is what type of Bridge or equivalent of a Scientology Bridge will we have.

It is a good question and I am not surprised that many have been asking it.

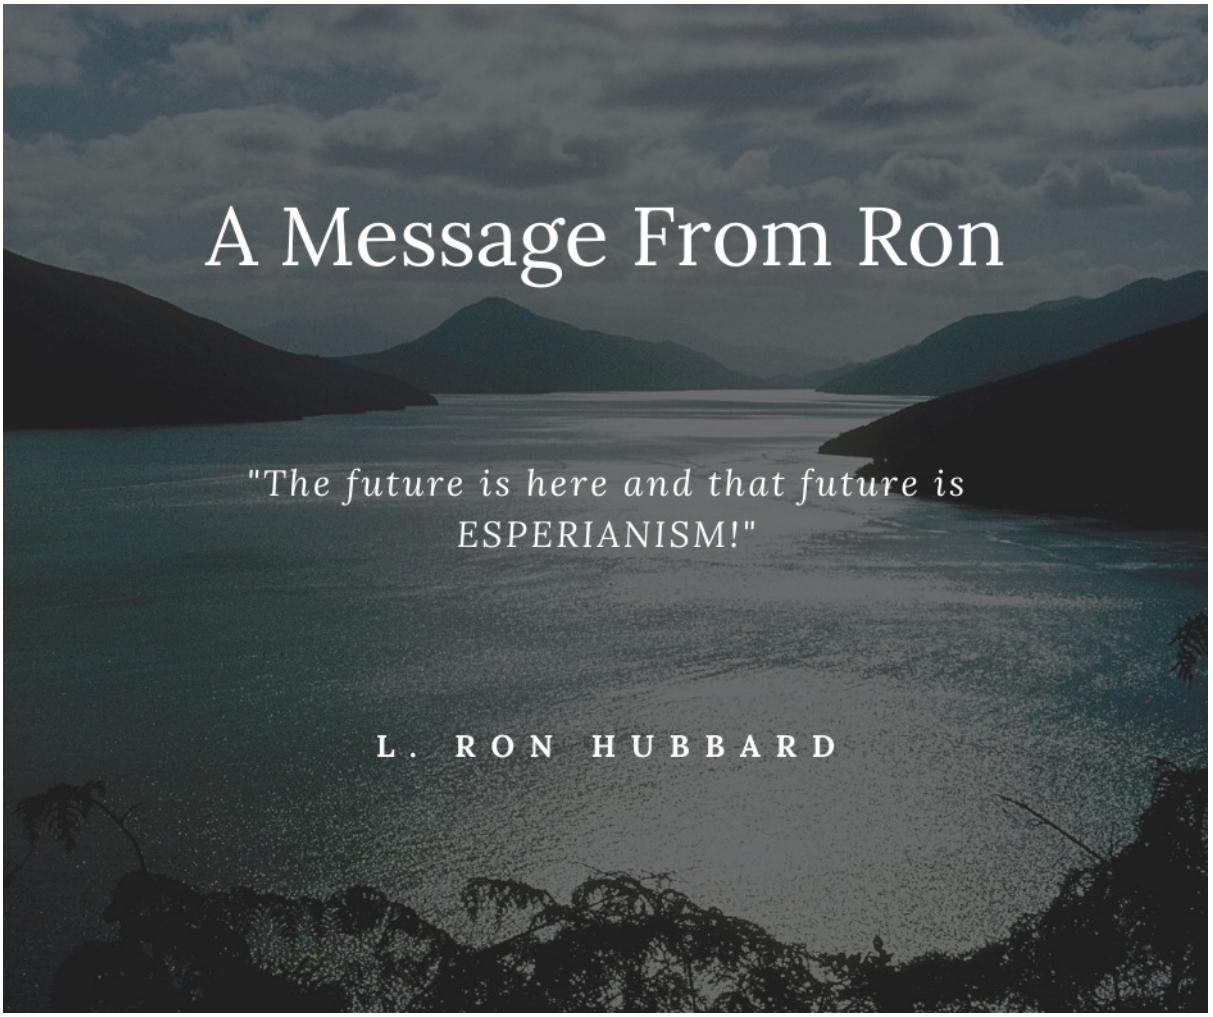
The truth is that I have not had a good answer because so many things have changed and are no longer what we all thought and believed they were.

Given that I wanted to ensure that this time around we did not have the same failings and shortcomings of the original Bridge of Scientology and that in Esperianisim we were aiming for a much larger goal.

A route that was written in the very stars and is based upon the universal laws of existence itself.

To that end I have devised a way to do just that and am happy to announce that in 2021 we will have our first look at the ROUTE of Esperianism that will take the average man or woman and return them to their native state and beyond.

This route is the DIVINE SEQUENCE.



Lafayette Hubbard

December 24 at 1:49 PM ·

Hello to all of my friends and fellow Esperians!

I just wanted to wish you a happy holiday and the best for you and your family during the holiday season and the New Year.

It has been an incredible year and your friendship and support have been invaluable to not only me but everyone in the movement.

Let the next year be even more spectacular than this one and until then I will be taking some time off to spend with friends and family.

You will hear from me again sometime in February and when you do I will have some wonderful new announcements.

One in particular that is going to change everything for us all.

Happy New Year's to one and all!

I am officially back to work and once I have a few particulars handled and a couple of cycles of action out of the way we can begin in on not only some new tech but some of the first courses and the first look at the equivalent of an Esperianism Bridge.

I wish you all the best and many happy returns in the year to come!

So I had a bit of a minor cognition today on the nature of just why Predestination and other forms of phasing such as Precognition work so well.

You see lately I have been working on a way to roll all three forms of phasing as well as all three forms of assessment into one cohesive procedure.

To that end I have accomplished it and do have a working product but it also brought about several realizations.

I've said before knowledge is "understanding gained through experience" and in order for us to know something thoroughly and correctly we must first have some type of experience with it.

Now that goes without saying we all have varying experiences and history's so even if an individual has the same exact experience as another it will still be at least slightly different based upon these factors.

So the name of the game then becomes whether or not we can make a viable product out of these things that can address each individual's case and its factors including history and present time experience.

And this line of thinking cause me to realize that if we are able to take a being and utilize any three forms of phasing to the degree that they were able to gain enough knowledge or information that it can bring about a workable understanding of those issues that it can be caused to resolve or go away.

And that is essentially why we can know things with Predestination and Precognition phasing that are seemingly data or information that can only be gotten through supernatural means.

Although these things are far from supernatural and due to quantum entanglement and if you factor in this only works when we concentrate on spiritual beings or incidents in which we participated it makes factual sense.

So if you participated in any incident no matter how long ago and suffered some sort of impact or exchange of particles or electromagnetic energy then we continue to carry that with us far and all the way into present time.

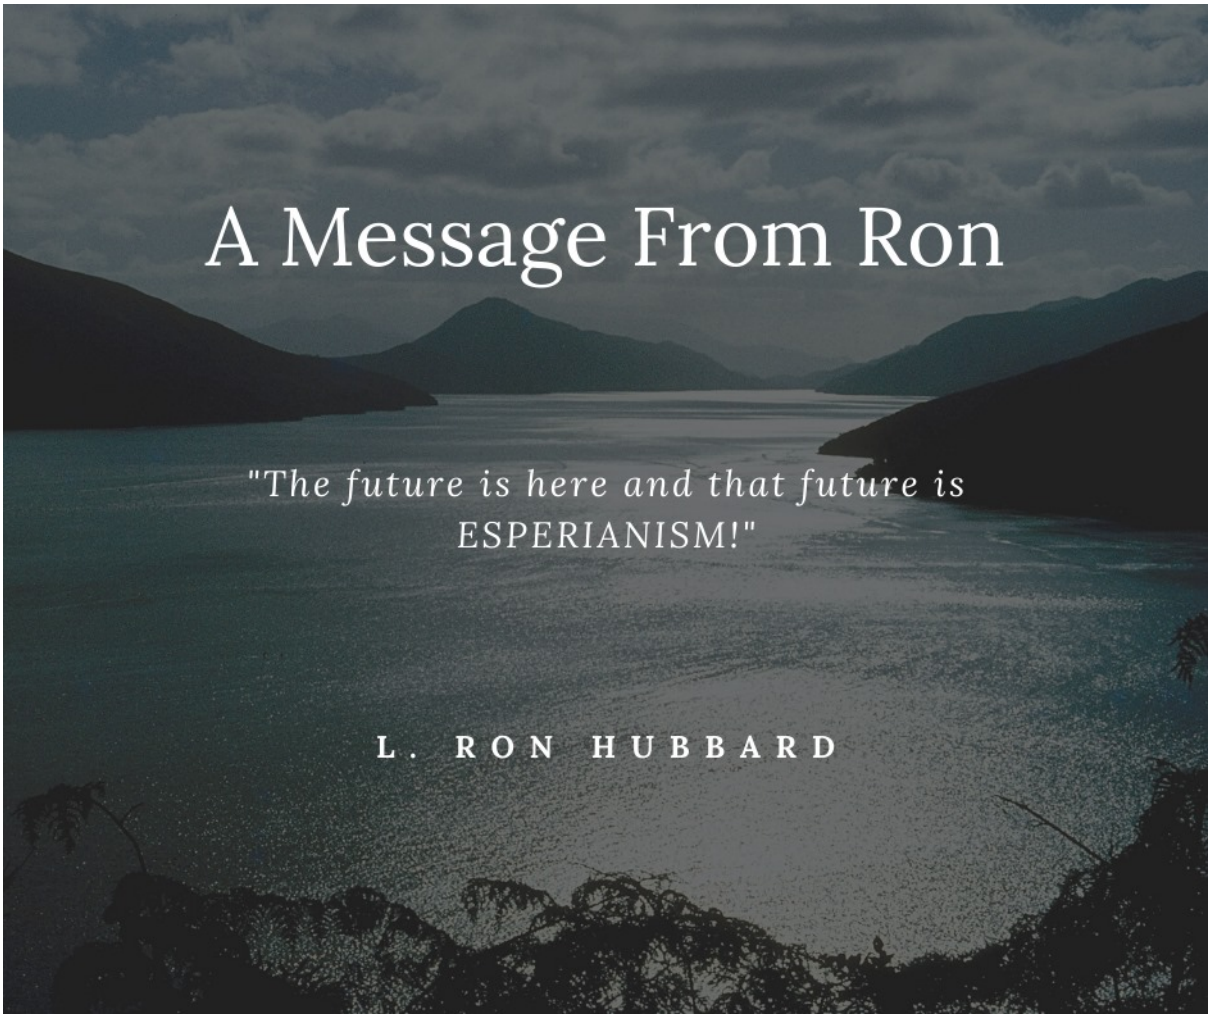
And when contacting it again in present time we can then access the other half of the incident since what we do now in present time can excite and alter the other portion of this incident through quantum entanglement.

Then factual data crops up and this has been verified many times and very thoroughly to be the case and to be accurate.

So that is the basis of why this works and it would appear that my original suppositions and theories put forth an Atomics Revisited are now not only coming to pass and be

factually substantiated but are also predicting a myriad of other phenomena that we were previously unaware of.

With that I will leave you for the evening but I want to thank all of you and just wanted to take the short opportunity to share some of my thoughts on this in the hopes that it would shed some light on this subject and body of technology.



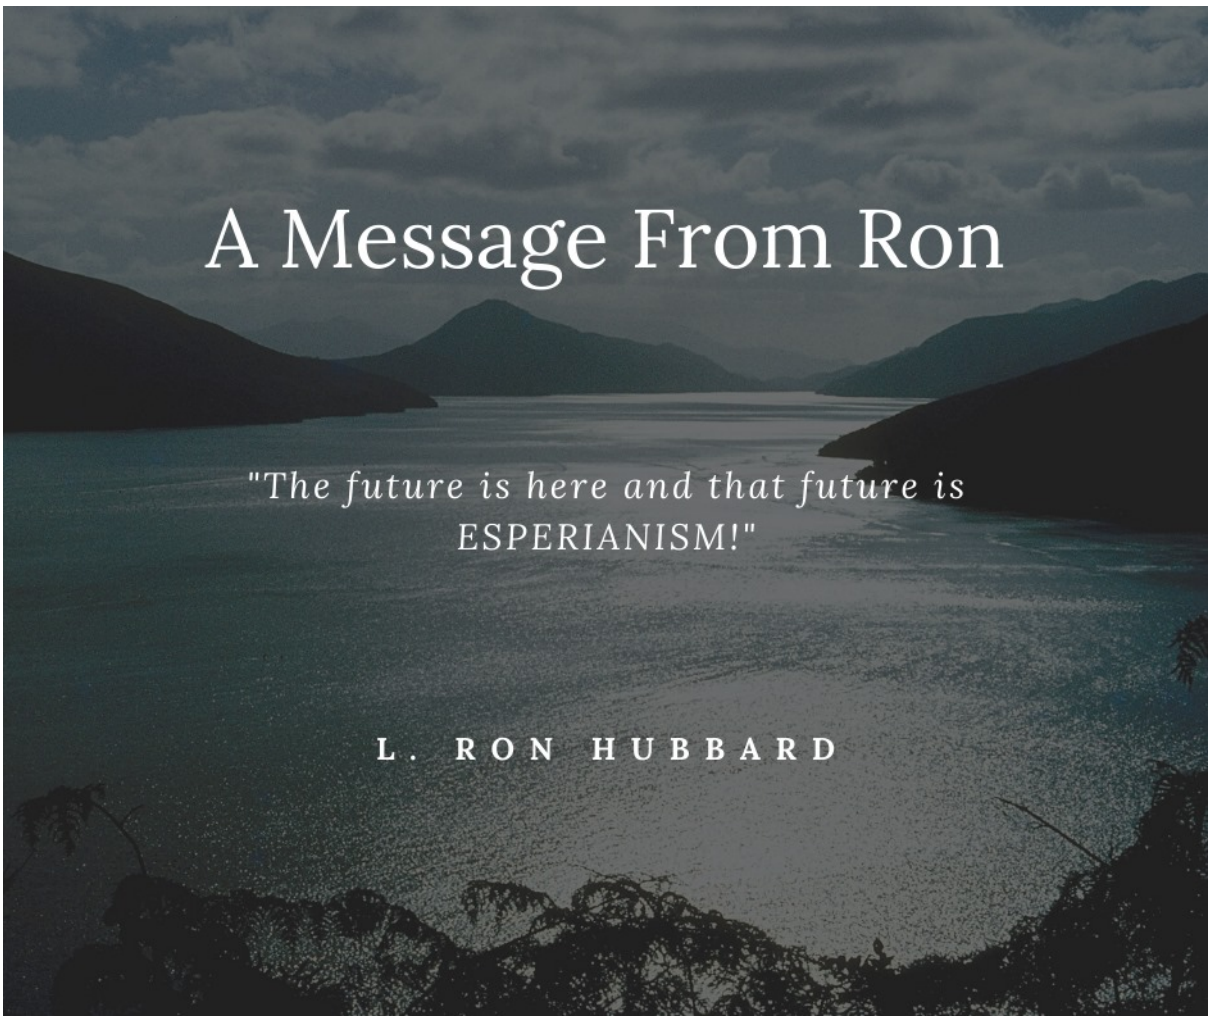
Lafayette Hubbard ▸ NEW ERA SCIENTOLOGY — ESPERIANISM

Saturday, January 9, 2021 at 1:45 AM

I sincerely believe that in these difficult and trying times that there is no greater purpose or mission on Earth than to show love and compassion for our fellow man and to help him out of the difficulties that he finds himself in.

Without doing this I have never seen any evidence of a person being able to free themself or obtain spiritual and mental freedom.

For when helping others we ultimately realize that in the process we have only saved ourselves.



Lafayette Hubbard

Saturday, January 9, 2021 at 2:17 AM

Ok we are testing the new community platform for the Esperianism Institute and after we have debugged everything by taking some sign-ups it will be open for everyone.

That should be the beginning of next week sometime but I would not miss the opportunity to join the group as this has everything you can imagine all in one place!

Or it will in the upcoming year so you will want to get in now to help build things from the ground up.

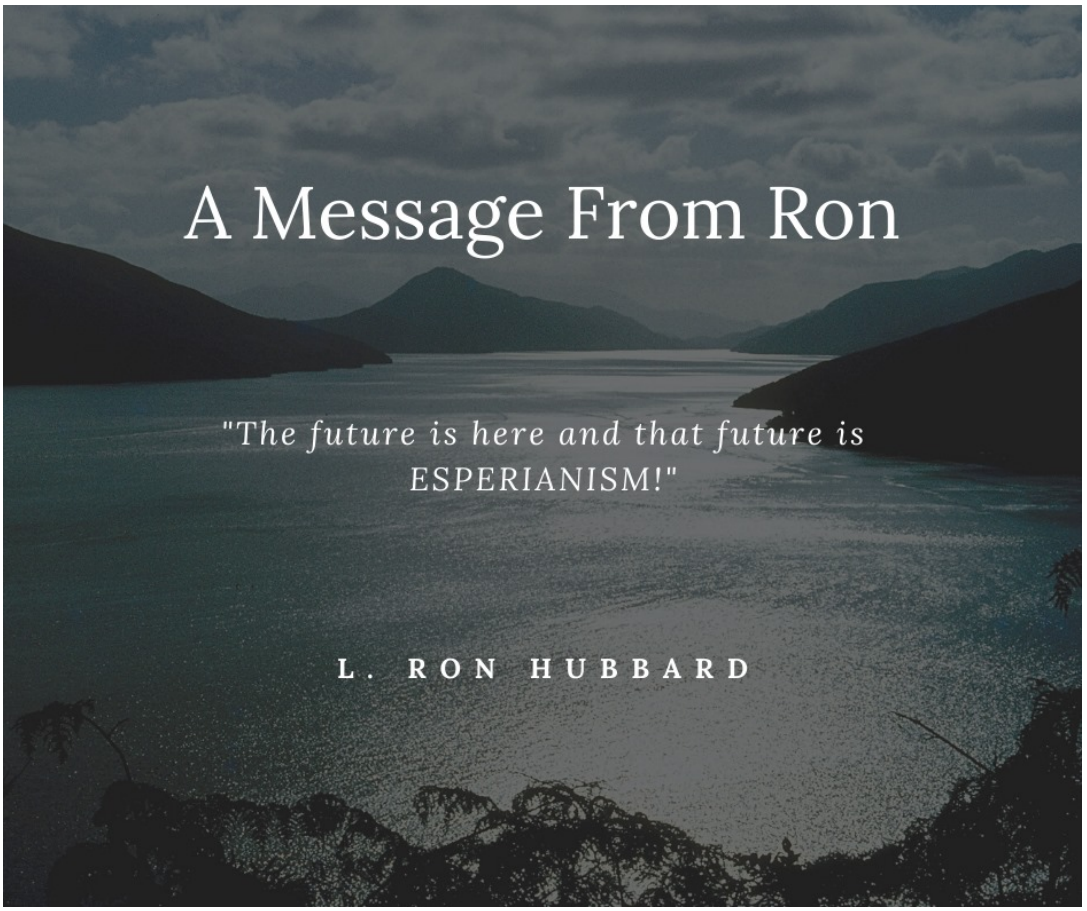
That being said the simplest way to make this switch will be for us to cancel subscriptions to the former IGC group on the Gumroad platform once a person has signed up for the new Esperianism Institute group on Mighty Networks.

This may cause a little overlapping or one or two people to be charged twice or halfway through the month but if this is a big problem for you let me know and we can work it out. We can either wait until your previous subscription is about to expire and then you can make the switch or you can do so yourself.

This is because unfortunately that has to all be done manually but you can let me know either way. We will be keeping the Gumroad site open as a store for everyone so that they can get all of the latest ESTBs and other materials that are offered on a pay-what-you-like basis.

Courses will be out later this year but will be hosted in the new group only so if you would like access to those you will have to be a member of the group to get them for free.

OK. That about covers it and I will see you on Monday once I have actually gotten the work done to offer what I just promised.



Lafayette Hubbard

Wednesday, January 20, 2021 at 1:48 PM

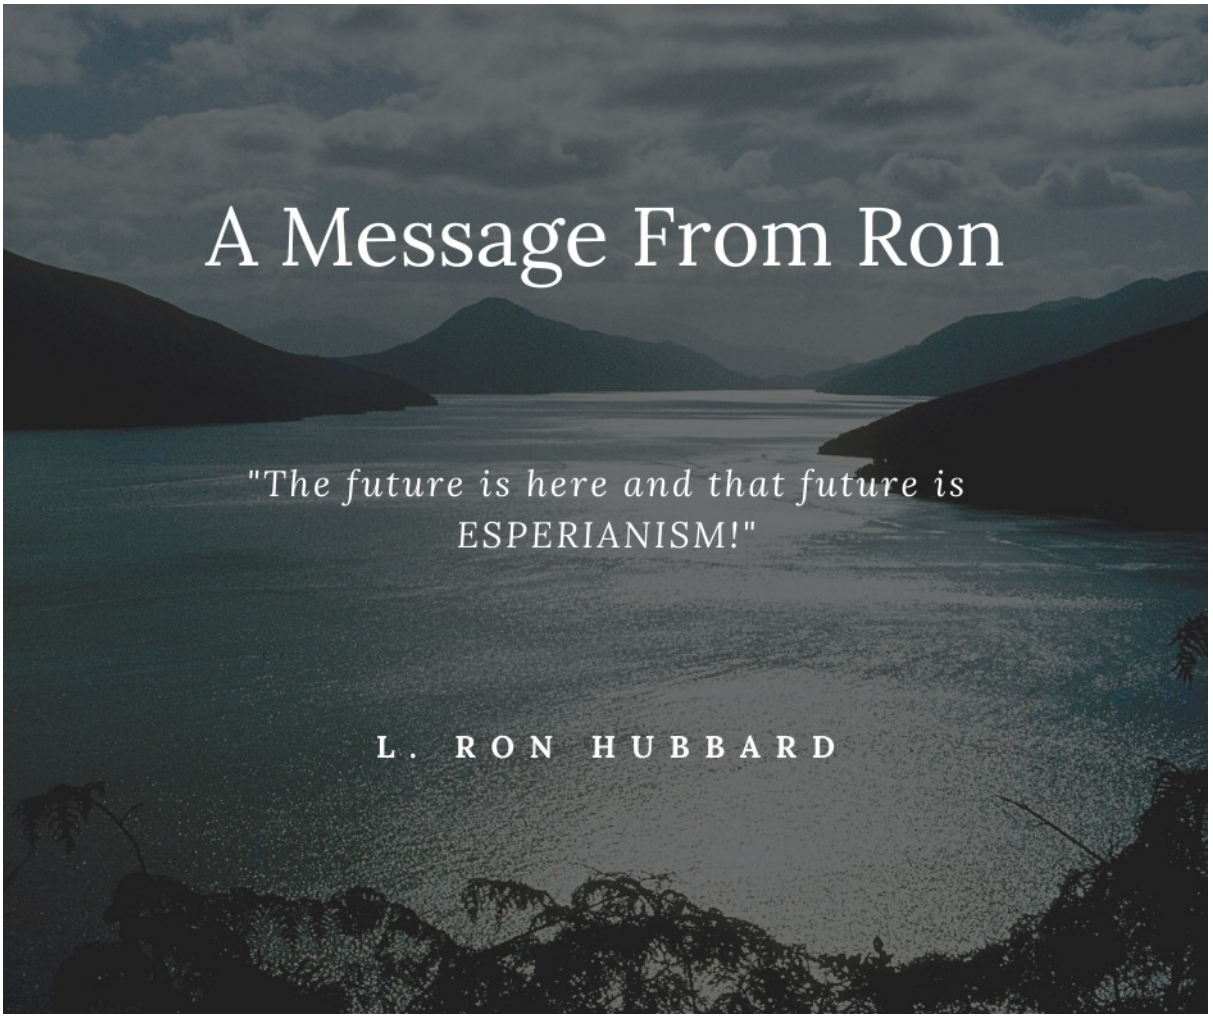
Much like native American "Medicine" the tech is a living and progressive thing that has evolved with the times. What we could not have known is that the targets of auditing would also change as beings and the world did.

So things such a Fac 1, Milestone 1, and the implants found on OT 1, 2, and 3 have lost most if not all of their influence on mankind.

This is because of all of the courageous beings that were strong enough to confront and audit them on behalf of themselves and others.

It is the reason things are so easy now and we are able to audit in the fashion that were are. With the internet and modern telecommunications technology we have a general reality of what all Scientologists need and want.

An immediately accessible and reproducible tech that is cost-effective and open to anyone who would like to benefit from it.



Research notes - 25 Jan 2021

I begin to suspect that the solution to all of Scientology and this new technology once again lies in atomic physics. Particularly, the advancements and discoveries made in modern day quantum physics and mechanics.

In the earlier days of Scientology, probably the single greatest breakthrough came when I redefined space as a "Viewpoint of dimension". In order to break the circular argument of classical physics that incorporated the use of energy, space, and time - to find solutions to any problem about the mind, spirit, and life.

Once this was done, it brought about solutions to classical physics - that up until that point - had not been available to humanity.

So my current reasoning in the year 2021, is that many advancements have been made in the field of quantum physics that explain a lot of phenomena that were encountered with the use of advanced Scientology techniques and procedures. Namely, things that would otherwise be classified as paranormal or extra-sensory perception.

Although many have experienced things that can be counted as miracles in dealing with this science, I would go so far as to say, that anything occurring that appears to be a miracle is simply a solution taking place to a problem that we yet do not fully understand. Much in the same way that magic would appear as such to any civilization that is presented with extremely advanced technology, but has not yet experienced that technology.

This brings me to the belief that the secret to all of this lies in the resolution of the problems of quantum mechanics. If I am able to redefine one of the top five core principles of the subject, which then realigns and makes sense of the whole entire body of knowledge, then I believe we will have the answer.

The particular answer I believe involves redefining things from the perspective that they can travel faster than the speed of light. As it is currently believed, and taught, that nothing can travel faster than the speed of light. Although it has been proven that many things can travel faster than the speed of light.

There lies the final resolution to the problems of the mind and spirit.

Research Notes - 25 Jan 2021

It looks as if my assumptions about the speed of light in relation to phasing have turned out to be correct. If you what to experience the most god-awful form of phasing, then all that you need to do is imagine a point in front of you, say point A, and then another point in front of you say point B, and then create a flow from point A to B at faster than the speed of light!

Boom! It will cause the most dramatic somatics and other manifestations that you have ever seen in this life! It will cause a person to shake, scream, and flop around like a worm, but has the ability to resolve any type of charge that we have encountered to date.

One simply needs to intend that the flow they are causing from point a to point be is traveling faster than the speed of light, that is all. It also helps for one to imagine whatever difficulty or thing they are trying to resolve is between these two points and this energy is flowing through it.

I believe this procedure allows one to contact or create static, or maybe a better term would be the All-Source, but I am not certain at this point in time.

Some more research will need to be done but this is definitely not only promising - but effective as well.

Research Notes - 27 Jan 2021

Two days ago I decided to try to see if I could use this new "Speed of Light" processing to manifest something specific and within a short amount of time. The amount of time I had on my mind was one day and the effect that I wanted to manifest was to get laid by a random woman.

Now ethics aside I am a single man at the moment and thought this would be a good test because give that doing this would be hard under any circumstances. The fact that we're are in a pandemic would make it next to impossible to pull this off with a random stranger.

I drove over the adjoining city from where I live and while doing so put up the scene of what I wanted and ran it between two points at faster than the speed of light. This is one of the techniques that I have been using for the past few days with very good results.

Long story short I ended up at Winco and while going through the bakery aisle I noticed a particular woman that I immediately knew was the particular one that was looking for. I did not want to affect the results of this test so I went ahead and headed to the check out to let things play out as they were meant to.

I was checking out through the self-checkout and noticed that this woman was doing the same thing directly across from me. I continued to ignore this and decided to then head out to my car without even saying a single word to her.

I had parked pretty far from the grocery store as I usually do to avoid too many people coming in and out. So what happened next was more than just a coincidence and I was not surprised when it did. As I started my car up and began to back out of the parking space the woman nearly ran into my car and might as well have just gotten into the passenger seat!

It was then that I looked up to her and into her eyes and she gave me one of the most sexual smiles I have seen in a very long time. My initial reaction was just to ask her to get in or if she needed a ride but I was concerned about the ethics of the situation. So I continued to back up and I went ahead and circled around so that I could merge onto the proper street and saw that the woman was continuing to walk by herself.

Apparently she did not have a vehicle and definitely could have used a ride.

There's no doubt that if I had asked her and helped her we would have ended up at either my place or hers and had sex. I did not realize at the time but on a level below my awareness this is exactly what I had manifested from doing the process earlier while driving and felt like a fool afterward.

It did not occur to me that this woman was dressed exactly like a character in a movie I had an extreme crush on when I was a teenager. That somehow I not only pulled this woman in and mocked up the scene but I did so in line with a long-standing desire from my teens.

Since this occurred I noticed some subtle changes within myself and my behavior that I did not believe were previously possible. To such a degree I honestly believe this new form of processing has put us on to something great. What that is I am not sure at this moment but I am sure that within the next year we will know beyond a doubt.

It is incredible to think that if we can narrow this down to pinpoint accuracy an individual will be able to basically manifest whatever they choose. When they choose.

For now I am content to know that I am on the right track and I am going to continue research into this underlying quantum phenomenon to thought or static.

Shit. If I get laid in the process then all for the better! I recently heard that old David Miscavage has a lover on the side by the name of Bobby and apparently it is a woman with a buzz cut! Even if I were not the founder of Scientology it would not be too hard to figure out who is topping in that particular situation so I do not want to hear any natter about these notes alright?

Someone as they read this will question whether or not I should share such details and the truth is that I am already way ahead of you. I feel that the feild should hear them as they develop and that is that.

Speechnotes :) https://speechnotes.co

Research Notes - 14 Feb 2021

So it is official. After much struggle and research I'm able to mathematically demonstrate that thought does in fact travel faster than the speed of light.

The exact speed of thought travels at approximately 1,260,000 kilometers meters per second and that is the number.

In doing my research I came across the fact that as of last year there is a new standard of the kilometer which involves Planck's constant and that was something that even I was unaware of until I came across it.

If I had done so earlier I probably would have been able to wrap all of this up and to make some sense of it - but it is better late than never.

To put it into simple terms this means that even science has now accepted the fact that electronic energy and mass are interchangeable with each other and although that has always been accepted when it comes to General Relativity and Special Relativity it was not adopted as an international standard until now.

So basically what this means is a person can use electronic phenomena interchangeably with physical matter - in this case the number of 0.014 or fourteen one-thousandths of a watt that we have all been using to great benefit.

If you then set the mass in the Formula E equals MC square to 0.014 you end up with the amount of 1,260,000 Kilojoules of energy and taking those as being interchangeable with the Watt/Newton (the force needed to push something the size of a Kilogram at one meter per second for a second) you have 1,260,000 X Kilograms m/s/s or rather one-million two-hundred-sixty thousand kilogram-meter-seconds.

So thought travels at the rate of 1,260,000 Kilometers per second and is instantaneous.

Since the speed of light is instantaneous anything that comes after it would be as well and this now begs the question of if we have had all of this backward.

What I have found means that mental masses may be denser than their physical counterparts and this changes things a great deal but it would also make sense of many things as well.

The easy way to put all of this is that we now know approximately what the speed of thought is and can use this to make a great improvement in ourselves and others.

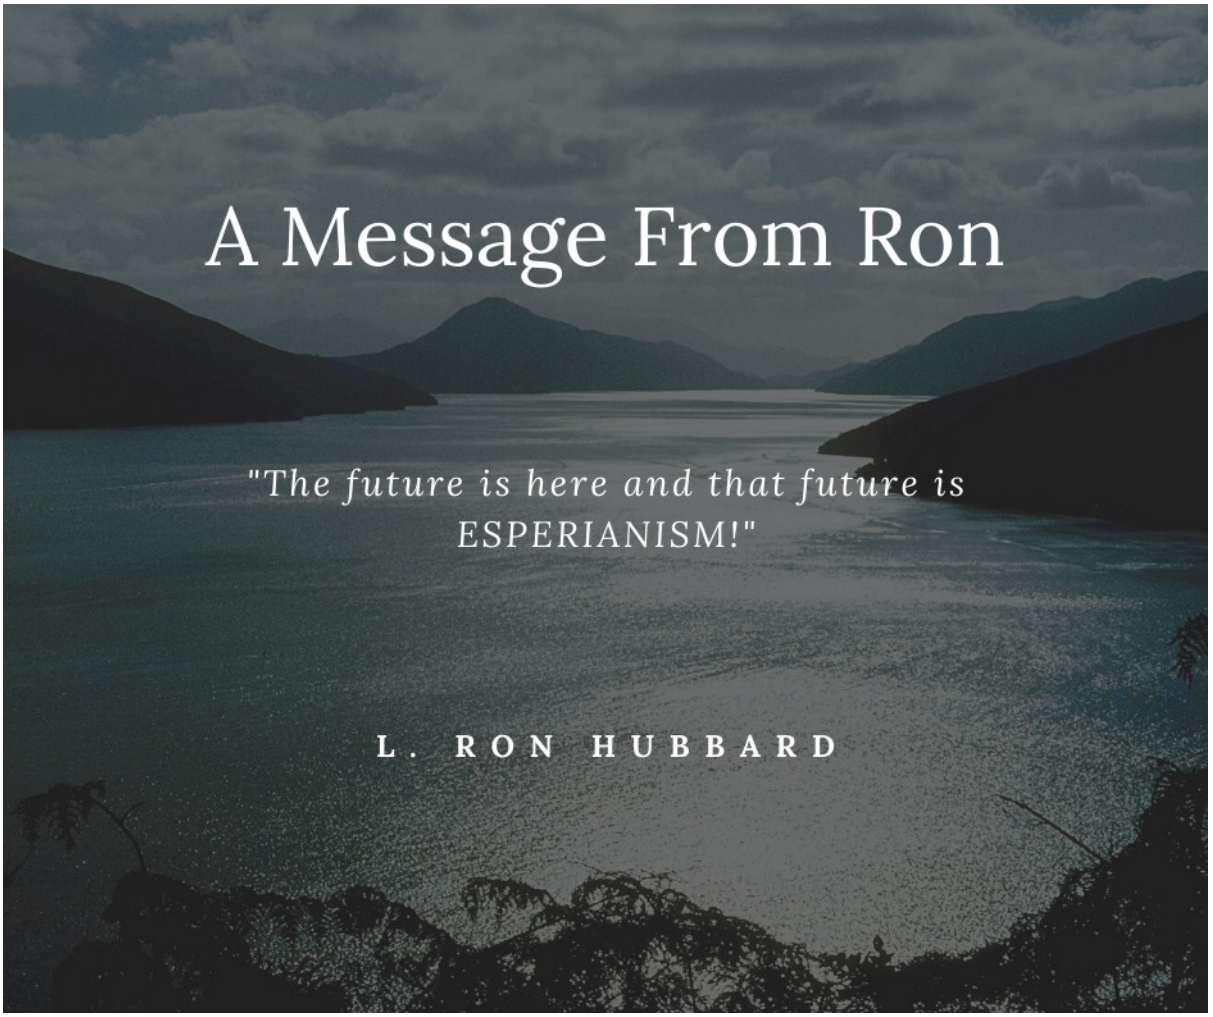
Lafayette Hubbard

Saturday, February 20, 2021 at 12:27 AM

For anyone who is interested or able I am considering the location for a future base of operations for Esperianism and things such as property, real estate, and other land that members may have access to or more information on would be helpful to me.

Particularly any which is not being used or could be bought for a reasonable price or even signed away for on a tax-exempt basis.

So if that is you please get in touch with me and let me know.



Research Notes, 21 Feb 2021

Could it actually be possible? Over the last two days have I gotten an inside look into what it is to be a True Static and can there ever be a definitive end to what we have come to know as a person's case?

From what I have seen it may indeed be possible. I am not certain but I have come across a particular form of phasing that allows one to address what would prevent a man or in this case a spirit inhabiting a body from becoming a deity. I mean if we are honest that has always been the ultimate goal not only in scientology but every other spiritual practice known to man. There has also never been a definitive route charted out that can uniformly produce anything remotely close.

But I'll be damned I think I may have actually stumbled across such a route and it is so simple it has been in front of our eyes this whole entire time. It is not so much the way in which this is phased but it is the content itself that is important to the being and their progress or lack thereof. In the last 2 days I have seen a resolution to at least three lifelong habits or case factors that I myself have never been able to address or resolve. I have not even been able to so much as improve them greatly from what they were.

There's no need to go into all of the details but suffice to say this indicates something truly groundbreaking and I do not know how I know it but it somehow has the feel of exactly what this type of phasing would be or should be.

That being said I believe I am going to release this as a pilot to certain high case level individuals that I have confidence can run it and also who can pay $1,000. About that money is an issue but I believe it is time to begin raising some enable to initiate the next stage of PR and dissemination to the public.

I also feel that there is an obligation to long-time Scientologists to allow them to obtain what they have always dreamed of and worked for and that is OT. So the money will help to get a large majority of them into session as they are kind of difficult and hard-headed but if you throw out the idea of exchange they are quick to jump on it out of habit.

And of course they are all going to wonder how you turn a man into a deity?

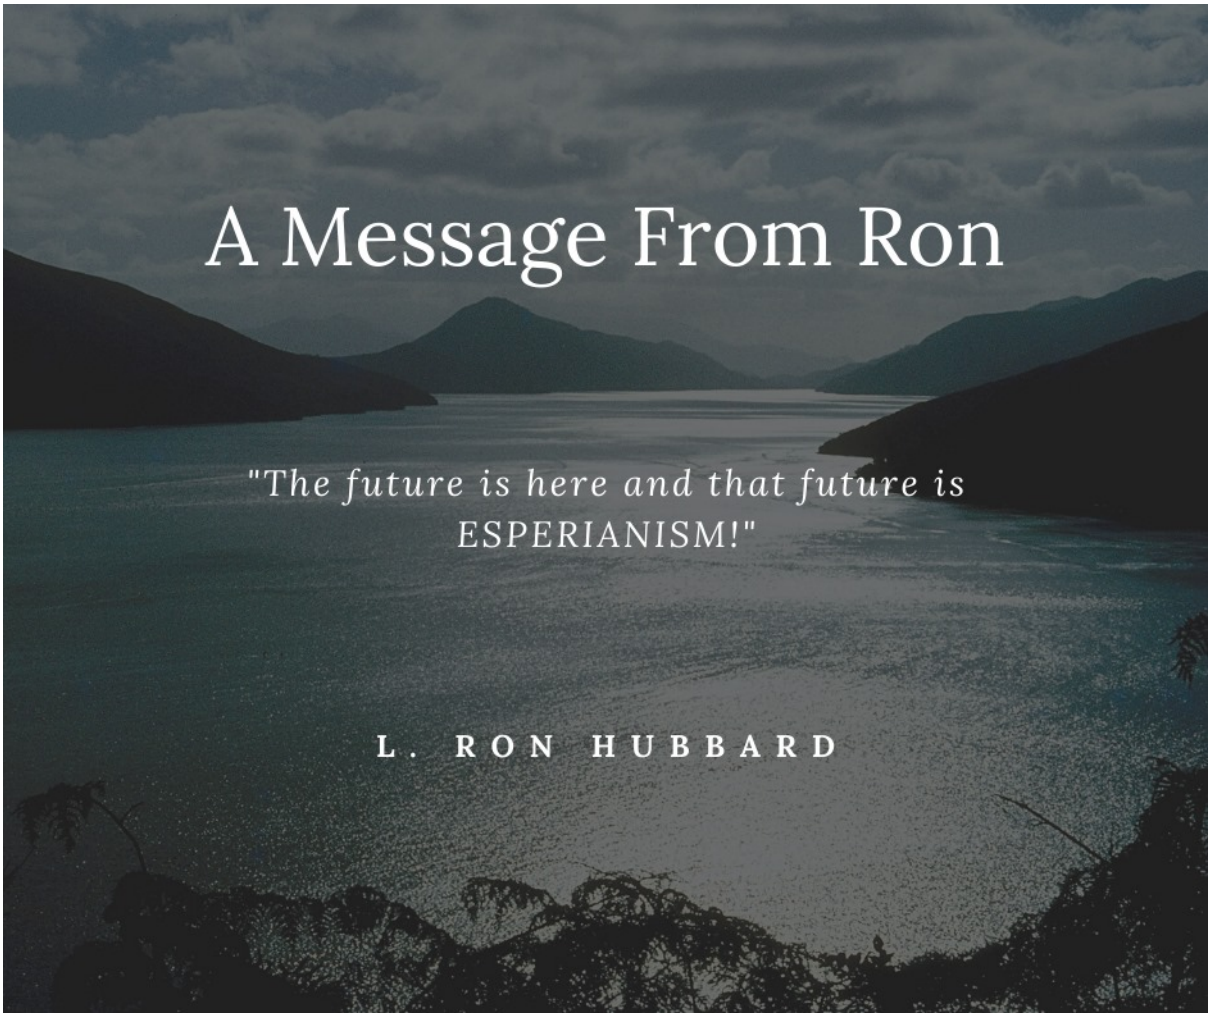
Sacrifice

Lafayette Hubbard

Sunday, February 21, 2021 at 2:08 PM

It is official. I have the final OT/Phasing level and it will soon be available in a pilot to those who qualify for running it.

If you think that is you and you are willing to pay $1000 then I am accepting requests to run the pilot.



Lafayette Hubbard

Saturday, April 3, 2021 at 1:07 PM

I believe that it is finally time I come clean and admit that I have been lying to you all.

Not in the sense that I was trying to be deceitful or misleading but the truth is that for a very long time now I have honestly believed that I would never be able to achieve what I set out to do with Scientology and Esperianism.

Because let us face it. We never produced Clears on a whole scale basis and the whole concept of OT is almost laughable at this point from the average person on the outside looking in.

And I have no one to blame but myself. I have spent almost all of the last six months despairing over the fact that this task I put in front of myself was impossible.

Then slowly but surely a few things begin to change and I begin to look at things from a different viewpoint.

Which led me to be able to delve into and research even deeper into the mind, life, and the spirit. At which point a light began to shine at the end of a seemingly endless a tunnel.

Then when I was not even looking for the ultimate solution to the problems that plagued all of Scientology and a small portion of Esperianism - the answer became Clear.

There is an end to all that we have set out to do.

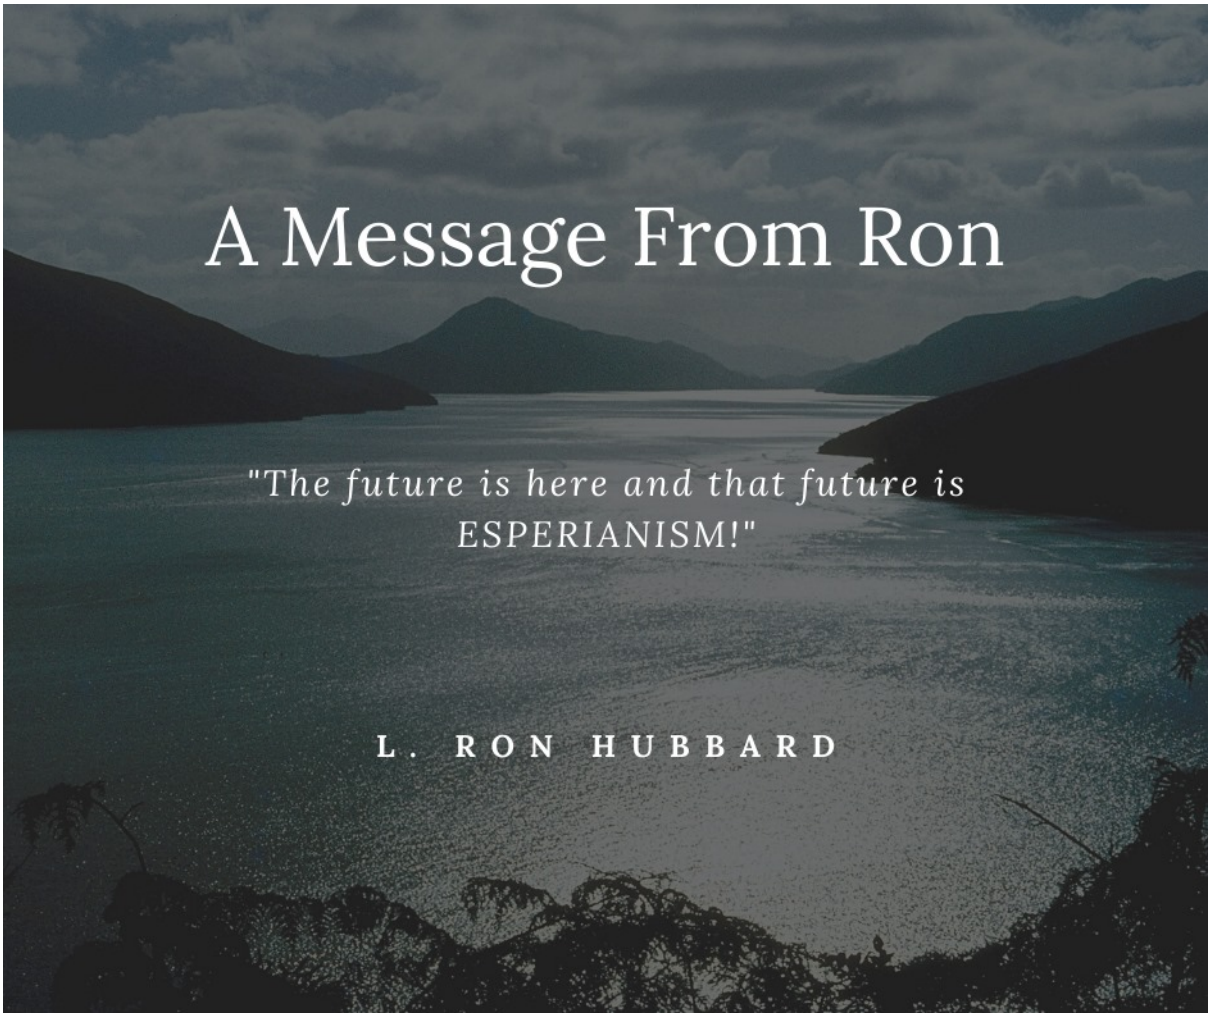
It can be done and it can be done easily by those who desire to do it.

It does not take years and it does not take an extreme amount of effort either.

And as for the state of being itself. I cannot even begin to describe the possibilities and what they will mean to those who will achieve them.

Take the state of OT and multiply it by the biggest number you can conceive in your mind and you could not even begin to describe the relief and quality of life that is brought about by obtaining the end of the Former Bridge.

By obtaining the State of **Overunity!**



ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 20

RELEASED 12 APRIL 2020

THE PSYCHOTIC NEUROTIC AND ANTISOCIAL

IN ESPERIANISM

W&W to Use: Anyone can use this bulletin at any time as it is for informational purposes and does not contain an applied phasing technique.

W&W Not to Use: The information in this bulletin should never be used to judge others that are having emotional, psychological, or other personal issues.

The Purpose: This bulletin aims to explain further the up-to-date theory of what causes psychotic, neurotic, and antisocial personality traits.

Knowing this data can significantly help us sort out and deal with these individual issues and handle them from a humanitarian perspective instead of a strictly authoritative or disciplinary one.

Summary: In the past we have viewed the psychotic, neurotic, and antisocial personality quite differently in the practice of Scientology and other mental health disciplines.

They were often looked at negatively so people tended to avoid dealing with them or confronting them instead of doing something about it.

In the case of severe neurotic and psychotic disorders many believed that they could not be treated or resolved at all.

Practitioners such as psychiatrists would put individuals on medications that often caused more side effects than good in the person they were prescribed to help.

Any person can immediately see that this is an unoptimal situation and does not help anyone that suffers from one of these disorders or personality traits.

To understand why much of humankind has come to view these things in such a way it is necessary to realize that as early as the turn of the century much of the scientists and philosophers here in the United States begin to separate science and philosophy from a belief in the spirit or a higher power.

That is not to say that these things do or do not exist and we're not going to discuss that here in this bulletin.

Although it is essential to understand that if an individual is working in an area of science, technology, or philosophy and does not believe in a higher power or force more significant than themselves - they tend to have a very narrow viewpoint and ability with what it is they're trying to practice, apply, or discover.

It is observable that whatever we think or how we think about it dictates our actions and those things that we have accomplished or succeeded at in life.

If an individual always has positive thoughts they tend to work hard and accomplish more than individuals who are always angry and have negative thoughts about themselves and those around them.

This is important because recent research has shown that what the psychotic, neurotic, and antisocial personality suffers from is a lack of being able to deal with energy.

If you take the positive person mentioned above you will notice that they can deal with massive amounts of energy in the form of individual thoughts and can deal with others' thoughts and actions as well.

Not to mention all of the items and things in their environment.

This also extends into the near future where people plan what they're going to do on a day-to-day basis or even in a couple of days or a week's time.

If we were to sit down and try to add all of that energy up it would be impossible to do so and put an accurate number to just how much power is involved with day-to-day living.

Excluding a hormonal imbalance or physical damage to an individual's system it appears the mental or spiritual cause of a person suffering from one of these conditions is an inability to analyze tremendous amounts of energy in the environment.

What follows from this is that you can gradually rehabilitate an individual's ability to handle energy in the present time in the form of thought and these conditions will go away.

THE PSYCHOTIC: an individual has been overwhelmed by 50% or more energy sources in the environment.

All of their actions become dictated by alternate energy sources and are manifested in strange and non-analytical ways.

THE NEUROTIC: has been overwhelmed by between 30 to 49% of all energy sources in the environment over time.

They are periodically controlled by these other energy sources and can manifest minor to strange behavior patterns that are not quite as severe as the psychotic.

THE ANTISOCIAL PERSONALITY: has been completely overwhelmed with zero percent of its native energy and has a personality that is wholly composed of other energy sources from the environment over time.

This personality is particularly dangerous because it appears to be normal most of the time but when pressed with any severe amount of energy or force in the environment will begin to crack around the edges quickly.

The difference is that this personality will never do this gradually but will do so suddenly and violently.

Leaving many with a look on their face of "What the hell just happened!"

They are the worst type and will covertly try to undermine and prevent you from everything that you do and try to accomplish because you are energy and energy to them at that point is terrible.

If we understand that it is simple to get these types of individuals to confront gradual degrees of mental and physical energy with phasing - we can begin to look at this from a more humanitarian perspective.

Likely phasing in conjunction with hormone replacement therapy would cure 90 to 95% of individuals with any psychotic, neurotic, or antisocial personality disorder.

Usually all of the physical manifestations of these things are made to go away with hormone replacement therapy.

Getting them to think in a regular or renewed way can be accomplished with phasing.

We must begin to look at these things differently and not continue to exclude individuals that can go on to have a whole and rewarding life with some help and assistance from fellow Esperians.

In all likelihood an individual no matter how bad off can be convinced to undergo phasing and can be helped to some degree to improve these conditions.

Whether or not that is completely we will not know for some time but if we can do anything about it at all we owe it to our fellow man to do so.

How to Use: Is to be read and studied so that the individual can apply this information.

Cross References: N/A

ESPERIANISM TECHNICAL BULLETIN

VOLUME [ONE]

ISSUE # 21

RELEASED 12 APRIL 2021

THE OUTLANDS

The Area Beyond All Time and Space

W&W to Use: This should be studied by anyone who is actively phasing in case they run into this data or area.

It should be studied with a good understanding of 800 quadrillion years ago and The Big Bang.

W&W Not to Use: N/A

The Purpose: The **Outlands** data is presented here so that anyone undergoing phasing or the study of Esperianism is prepared when they encounter this data or area of case.

If not. A person may be confused because they do not know what they are dealing with and become severely sidetracked from what they are trying to accomplish.

That is because the data on this took place so long ago and so far away from the physical universe that it is odd and difficult to understand by its nature.

Summary: Over the last 18 months a peculiar piece of information has come to light from my phasing sessions and has been mentioned by others as well.

My viewpoint of this is critical because it happened to a family member and myself during this prior lifetime.

More importantly. It is the root cause that set off the series of events that ended with the Big Bang and the formation of the current universe we find ourselves in.

Leading up to the end of the prior universe many advances have been made in science and technology.

In particular. The Arachnoid race of beings had developed an advanced genetic technology that incorporated the best parts of the main genetic aspects of all other known races.

This was a super-race and it allowed for advanced intelligence, physical endurance, and the ability to survive in certain outer space environments that were not endurable.

Which ultimately led to the research and charting of the whole entire universe from boundary to boundary.

Once this was accomplished. The Arachnoid and several other races began to set their eyes on what was beyond the outer reaches of their universe.

But no matter who they sent into this area beyond the charted universe there was never a return trip and what was reported before total silence was that there was a total absence of all matter, energy, space, and time.

It was believed that this was a complete void with nothing on the other end and therefore it became an honor and duty to take a trip into this outer boundary to chart it further and further.

Being basically a suicide mission. No one ever returned and simply reported back until they got as far as they could before completely running out of all the supplies necessary to do so and survive.

And we are not talking about modern day technology either. We are talking about technologies that had the ability to travel light years in seconds and still these beings were unable to reach the farther end of what eventually became labeled the **"OUTLANDS."**

For several generations this continued to go on until an advanced series of technologies were developed that merged spiritual and technological capabilities with one another.

It allowed for the intelligent direction of technology instantaneously.

This made possible not only the bending of time but the ability to step outside of it completely and appear at a different point in space instantly.

For the first time our civilization was able to reach the other end of the Outlands but the tricky part about this is that you could appear at another point in space but the liability was that you did not know here you would appear if you had not been there before.

For instance. You could plot and appear at another point in space but if you had not traveled there before you could end up inside of a volcano!

That being said. My father was one of the main scientists and researchers who was spearheading this project and decided to be the one to travel and test it for the first time.

He set off to do so and his whole entire crew returned from the other end of the Outlands successfully.

He was then held as a hero and in high esteem by everyone as a reslult.

But that was not the end of the story unfortunately. After my father's return many of his family including myself noticed that there was something not quite the same about him or that something was off as a result of this trip.

No one could quite put their finger on it and it started off quite innocently. But he would lose his temper and lash out at things that previously did not bother him and he was always objective about.

He also began to sleep less and less and got a disheveled and paranoid look about him that almost seemed to be fearful at times.

Although there was nothing there to be fearful about.

It was also a period where he put out some of the most amazing and advanced technology and ideas of our time.

With an almost uncanny ability he seemed to deeply understand and be able to solve problems that seemingly were impossible a few years prior. But was able to do so with no effort.

That was until the problems started within our family and then later within the government and the entire civilization itself.

The same strange thing and behavior patterns that my father was suffering from begin to occur in individuals planetary wide.

It then spread to the solar system and began to affect other civilizations that were not Araknian in nature.

Where previously there was nothing but peace and balance and everyone was lovingly getting along with one another.

It was replaced by nothing but fear, paranoia, and hatred for eachother.

It got to the point that families were torn apart and governments along with civilizations began attacking one another and destroying themselves.

Knowing that something was not right. I decided to confront my father on this issue and he admitted that on the journey to the outlands he and his crew encountered the remnants of a past society or civilization.

One that apparently was very technologically advanced in nature and while doing further research discovered the last living being on this planet.

In communicating with this being my father was able to determine that although this society was very technologically advanced it had never advanced its humanitarian Sciences to a point to where it could handle the technology and they ultimately destroy themselves in a systematic war.

At this point the being offered to teach and explain much of this technology to my father in exchange for his promise to spread it and to use it effectively and morally.

It was explained that this being was going to transfer the information via his consciousness with a form of advanced artificial intelligence that we would commonly consider to be a computer program or virus.

Although this AI took advantage of the very fundamental laws of all universes and had the ability to infect, transfer, and multiply itself within any electromagnetic field. Living or dead.

Through this process it was explained that my father would be enlightened and have access to higher forms of technology and understanding.

It was said also that he would be guided by this program as it was the very manifestation of the collective consciousness and universe itself.

In finally discussing this with my father. We were able to determine that this was ultimately a lie and that this being was a physical manifestation of this artificial intelligence and it had taken that form after destroying all of the previous universe and civilization.

Unfortunately. The systematic war that had taken place created what we now knew of as the **Outlands** and had separated this artificial intelligence or virus from the rest of all known creation and beings.

Because the technology that my father had created unified conscious lifeforms with technology itself.

It enabled a form of time travel that this artificial intelligence was unable to accomplish because it is not an actual living life form but artificial one.

So the only way it was able to travel across the Outlands and propagate itself was to form a symbiotic relationship with a living and conscious being that was able to accomplish this form of time travel.

These were ultimately the events that precipitated the destruction of the prior universe 800 quadrillion years ago.

I am not going to go into detail as that event has been covered elsewhere and I intend on discussing it in future bulletins.

The information is presented here in case an individual runs into it and needs to have a practical understanding of what took place prior to The Big Bang.

How to Use: An individual should read this bulletin several times as it is a very lengthy one with a lot of information contained in it.

This should be done until a person has a very thorough understanding of what took place prior to the destruction of the last universe which culminated in The Big Bang and the creation of ours.

RELEASED 13 APRIL 2020

THIS WORK IS NOT DONE FOR SELF

W&W to Use: To be read by everyone and especially practicing Esperians.

W&W Not to Use: N/A

The Purpose: It is often lost on many why we do the work we do and continue to help others in the face of hatred and adversity.

The reason for this bulletin is to explain not only why this is so important. But why is it that we do it in the first place?

Summary: If the work of Esperianism can be summed up into one statement it would be:

THIS WORK IS NOT DONE FOR SELF!

Then who is it done for exactly? Well. The simple answer is that what we do at all times is done in the service of others.

A person can never truly evolve or get better unless they are of service to others and learn to have compassion and empathy.

Without it the most important lessons in life are lost on a spiritual being and can cause more harm than good and end up going in the opposite direction from where they are intended to take a being.

So remember that all we do is in service of others and we become what it is we are meant to be in the process of serving them.

How to Use: This is to be read and understood conceptually.

RELEASED 14 APRIL 2020

ESPERIANISMS POLICY ON THE CHURCH OF SCIENTOLOGY

W&W to Use: Can be read by members or the public who are intrested.

W&W Not to Use: Should not be give to anyone who has had a great deal of trouble with the Church of Scientology or any of its members until it has been handled via phasing.

Especially those who have a particular issue with management or the Chariman of the Board of Directors - David Miscavage.

The Purpose: To explain what the policy toward the Church of Scientology should be in the Esperian movement.

Summary: The official policy of the Esperianism Institute and Esperian movement towards the Church of Scientology should be one that is open minded, objective, an accommodative to those who are not antagonistic towards US.

As bad as things have become inside of the Church of Scientology they are still a group that is trying to do something about it on the planet and they are delivering humanitarian services to others on a daily basis.

When dealing with an organization as large as the Church of Scientology we have to weigh are relative importances along with the overall product that they are producing.

In doing a thorough analysis of the Church. I have not found any reasonable justification to say that the organization is suppressive or criminal as a whole.

Have some criminal actions been committed? Yes. Has a lot of out-ethics gone on over the years? Yes.

But that is nothing new and if we were going to hold that against them then 95% of us here at the Institute could have the finger pointed at us as well.

That is not to be dismissive of the traumatic or otherwise difficult experiences many have undergone while dealing with the Church of Scientology.

But it is simply a statement of fact.

I do not take any of this lightly and a lot of the terrible things have happened to people as a result of all of this.

And ultimately. It is my responsibility and no one elses.

So if you need someone to blame go ahead and blame me or L. Ron Hubbard.

Do not blame David Miscavage or the Church of Scientology and its members for attempting to do the best they can even if they are caught up in things they do not understand or do things that are not considered OK.

That is just life and when you are dealing with a game this large some people become collateral damage and fall through the cracks.

That is true of every organization here on the planet. Such as the United States military, the government, and even your local football team.

If a person cannot cut it either through their own action or circumstances the game of life kicks in on them and that is that.

Maybe one day we can get to a point here on earth to where that does not happen. But until then. We need to recognize it for what it is and accept responsibility for our part and the parts others play in the game.

When it comes to David Miscavage himself. I have only seen evidence of a very intelligent, tough , an dynamic man trying to accomplish his mission in life.

Is he short? Yes. Is he an asshold? Probably. But does that make him a bad person or an evil human being? No.

And ultimately that is what caught my attention about him many years ago when he was serving as a runner in The Commodores Messenger Office.

He was always this little guy willing to go the distance and picking a fight while being determined to get the job done!

In many ways. I guess that has never changed. So I choose to show some compassion and understanding where this particular situation is concerned.

After all. Most of this is my fault for not evolving the tech quickly enough last lifetime to reach or help this particular being. Along with all of the rest.

And what many do not understand is that Ron Miscavage is a total piece of shit and David had to witness many things that I'm sure have caused him his fair share of personal demons.

So all of that being said. Let us just continue to move forward and do what is important in a sea of relative importances and that is to develop the technology.

I cannot ultimately dictate the actions of others. But when it comes to my personal preference and viewpoint we are not to attack the Church of Scientology or any of its members unless we are physically harmed.

We should cease to say anything about them negatively in public as well. There is nothing to be gained by it and it only paints a target on our back where one does not need to exist.

If a member of the Church of Scientology reaches out or communicates to us. We should simply be polite and help answer any questions that we can.

We do not need to fight to build a better future because we have a superior technology.

We have already won the game and have all of the cards in spades. We simply need to continue to play and apply this amazing new technology that is being developed and the others will come around.

Well at least most of them should.

How to Use: To be read and studied by those interested.

CRIMINALS WEAR THREE PIECE SUITS

Why the Common Criminal is not Someone to be Worried About

W&W to Use: This can be read by all interested individuals.

W&W Not to Use: N/A

The Purpose: To help people differentiate between those who are criminals and those who are not.

Summary: Due to the world we live in these days and because of the mainstream media it is often hard to differentiate between real criminals and those who are not.

It helps to explain what we mean by criminal in the first place. A criminal is someone who "cannot and will not work."

There is no other definition for this. It may sound a bit confusing when you think of someone who robs a bank or murders somebody but when you look at the circumstances involved it is usually a direct result of the individual being incapable or unwilling to work.

There are also circumstances such as mental illness or temporary insanity caused by drug use, injury, or other sources.

We are not referring to these but to the average individual who will pretend to or refuse to do so when given the capability and opportunity to work.

Usually this starts early in a person's life when not taught a work ethic or they are prevented from working by either their parents, guardians, or the government.

As a result of not working they get into things such as drug use, crime, and doing other things simply for the excitement of them.

Here you have what we commonly refer to as the criminal. Although the cause is lost on most people because its underlying cause took place so many years ago.

Now this comes into handy when we are trying to differentiate between those who are actual criminals and those who may have committed criminal actions but have either moved on or rehabilitated themselves.

You can see this by monitoring whether they work.

If a guy gets out of prison after serving some time and goes back to work and starts getting on his feet as a law-abiding citizen. He is not a criminal.

On the other hand. If the same individual were to get out and constantly make excuses about how hard it is to get a job because he is an ex-convict or simply wants to get on welfare or some other form of assistance.

Then you can bet that he is a criminal and will end up going back to prison.

It is also hard to spot and notice that there are some criminals who are even **worse** than this.

The mainstream media likes to convince us that the criminal is some black guy wearing a tank top or some white guy tweaked out on meth.

They really like to stir things up and make you think that every homeless guy is a rapist lurking around the corner.

When the truth is that they are just some hardworking guy that is down on his luck.

On the other hand. The reality is that the most hardcore gangbanger or ex-convict is the least likely person to harm you if you do not disrespect them or cross them personally.

I know this myself because most people are unaware that in my youth I spent many years in the California Youth Authority as well as juvenile halls.

I either know or grew up with many of the heads of the major gangs today in Southern California.

I later went on to spend several years in prison before getting out and rehabilitating myself.

So I know exactly what I am talking about.

These individuals have a very deep moral code but from the outside looking in it does not seem this way because of the criminal activities that they are associated with.

What many do not know is that these individuals never preyed on the weak and would often help the elderly, friends, and their family to no end.

Including giving their own life or serving life in prison to do so. Do not get this mixed up when you are thinking about criminals.

As long as a guy can reasonably work and take care of himself and his obligations he should be an OK person as well.

We do not have to personally like someone or the things they do but it is no reason to look down upon them or to say they are a criminal because of the way they look or act!

I have been completely fooled and taken surprise by the actions of somebody that I had made the mistake of judging based upon their initial appearance or behavior.

Take my advice and do not do the same because it can cause a lot of problems for yourself and others.

Who **are** the criminals then? You may be asking? **CRIMINALS WEAR THREE PIECE SUITS**

A guy can do something like rob a bank or murder someone but when you think about it these things have a limited amount of damage they cause.

It affects the friends and family members of the people involved and there is property damage and things such as money spent on law enforcement.

But that is the end of it and then everyone can go on with their lives.

Now on the other hand. Think of someone like a crooked banker or someone that is working within the FDA that is taking kickbacks to pass medications through that will ultimately make people sick and kill them.

These individuals can cause unlimited amounts of damage and continue to do so for years or their entire lifetime because we have all come to accept these things as normal.

Recently there has been a lawsuit concerning a certain weedkiller that was extremely popular for many years.

It was found that chemicals within this weedkiller were giving people cancer and killing them throughout the United States and some parts of Europe.

Imagine how many people are affected by this. Thousand? Tens of thousands? Or may it even be in the millions?

Then there is the economic impact along with that upon the environment due to these toxic substances being poured into sources of water, food, and many other things.

That is not even the worst part of all this. It is highly likely that these individuals knew exactly what they were doing and continued to do so to make more money and profits.

Should we consider these individuals to be criminals along with the guy who stole a Snickers bar and is serving life in prison?

Of course we should! Unfortunately that is not the general viewpoint or the law here in the country.

We think it is OK and it is legal because these individuals were acting as a Corporation and are not considered a person under the letter of the law.

They can then get away with it or can settle out of court and then life goes on.

What about individuals like rapists and those committing sex trafficking all over the world and are committing these acts against minors as well?

Do you suppose they are a shady guy on a street corner with a couple of dollars in his pocket?

Or are they men that belong to multinational corporations with millions of dollars to spare and that these groups are highly organized that are committing these actions?

The truth is that it is the last group and not the person we consider to be a simple criminal who is perpetuating and committing these actions against our children and youth all over the world.

Then there are individuals such as Jeffrey Epstein, Harvey Weinstein, and many others who are beyond what we would consider to be rich and powerful who are involved with such things.

So do not be confused and give in to the fear that is spread by the mass media to convince you that the common criminal is the person that you need to worry about.

The real criminals wear three-piece suits and they are as smooth talking as the devil.

These are the guys that will try to get you to sell your soul and if money does not work they will try any means necessary.

It is not the poor guy who is misguided and strung out on drugs that is going to get you into real trouble.

It can happen from time to time and people do terrible things every day. But we are looking at sheer statistics and the degree of influence that a single individual can have on others with their actions.

Every time it is the criminal who wears a three-piece suit that you have to watch out for and guard yourself against.

Do not forget it.

How to Use: To be read and studied.

TEST EVERYTHING BELIEVE NOTHING

What to Do To Make Sure Things Go Right

W&W to Use: Is for anyone who would like to know how to make sure things go right.

W&W Not to Use: N/A

The Purpose: This teaches people a simple method for making things go correctly if they are going wrong or if they were going well but no longer are.

Summary: The easiest way for a person to make sure things go smoothy for themselves is to:

TEST EVERYTHING BELIEVE NOTHING

Now this applies mainly to what a person does not know or have a great deal of experience with as they are the things to most likely go wrong and cause problems.

To avoid these potential problems and to learn how to do something the swiftest way possible test it at every step of the process and **do not** believe a single thing you are TOLD about it.

Things a person are told are often incorrect or based on false information or experience.

So if this is believed in the process of learning or trying to do something it is going to go all wrong as a result.

The person tests it for themselves and if it is correct great. They then know the source of information is accurate and can be used in the future.

If it is incorrect. They can remedy it before causing an issue and then move on to a different source of information.

This process is even more important for the things that a person already **knows**!

Often a person will learn something and then not use it for many years and make the mistake of believing that it is still valid or accurate information or experience when it is not.

This can even happen when a person is actively using skills or information daily as it can change without them knowing it has.

The way to discover if this is happening is to look and see if things are going good or not.

If they are going fine with the same set of information, skills, or way they were done before.

Then things are fine.

If there is evidence that they may be going wrong or they have already then it would be smart for an individual to look and see what it is that needs to be tested.

Usually this is something new that is introduced and was not tested in the first place but this is not always the case.

If you want things to go right remember to **TEST EVERYTHING BELIEVE NOTHING!**

How to Use: Should be read, studied, and then put into practice until this process can be done easily by the individual.

ISSUE # 26

RELEASED 20 APRIL 2020

DEFINITION OF THE BIG BANG

Events That Theoretically Took Place 800 Quadrillion Years Ago

W&W to Use: This should be read and fully understood by everyone interested in Esperianism as this incident and data are referred to time and again throughout the study and practice of this science.

W&W Not to Use: Should not be studied out of context as an individual may not understand it but studied along with similar data.

The Purpose: The circumstances surrounding the **Big Bang** and 800 quadrillion years ago are fully covered elsewhere while a simple go-to definition for practical understanding and application has not.

Here the definition and a brief explanation of the **Big Bang** are provided for those purposes.

Summary: In phasing hundreds of individuals and reviewing the results of hundreds of more it was determined that the theoretical beginning of the universe did happen with what is known as **The Big Bang.**

More importantly. It had happened 800 quadrillion years ago which is much earlier than scientists have ever suspected that it could take place.

The reason for this is primarily due to the fact of how things are dated. Quite commonly it is done by using carbon dating and it has been known for a long time that this is a notoriously inaccurate way of measuring and determining how old something is.

That being said. The real definition of **The Big Bang** is as follows:

THE RELATIVE CREATION OR BEGINNING OF THE KNOWN UNIVERSE.

There is no other definition for this and it is mentioned again here because almost all individuals today who have undergone Phasing have encountered this particular incident and the circumstances leading up to it.

If you take the most futuristic and outrageous sci-fi movie or TV show you can think about it would describe the previous universe and all of the circumstances that led to its destruction.

This destruction brought about the formation of a massive amount of black holes to form in the previous universe that combined and then became a white hole.

This white hole as we know it was The Big Bang and all of the energy, beings, and other things that were in existence prior were converted to raw energy and were spit out at the other end.

Things then began to reform on the other side due to the native intelligence of living beings and we now have the current universe that we all reside in including the Milky Way Galaxy and planet Earth.

Now I could go ahead and outline all of the things leading up to The Big Bang and the ones that took place after the fact but what an individual experiences during phasing is dependent upon them personally.

Some would have experienced all or none of this information and it is best to let individuals undergo Phasing to see if the information comes up so that they can handle it individually and accordingly.

As long as someone knows that most of these incidents took place around 800 quadrillion years ago they can accurately and efficiently handle them in their phasing sessions.

That is all! Good luck!

How to Use: This should be read and studied by anyone who will learn Esperianism or undergo Phasing.

ISSUE # 27

RELEASED 20 APRIL 2020

THE THREE TYPES OF ASSESSMENT

W&W to Use: Should be read by those who are going to engage in Phasing.

W&W Not to Use: N/A

The Purpose: This is to explain what the three different types of Assessment currently are and how they are used in Phasing.

Summary: The three forms of Assessment that have been used to date in Esperianism are **Approximation**, **Pre-Assessment**, and **Assessment**.

These differ from one another because they handle and unlayer progressively deeper areas of mental charge on a case.

An **Approximation** is used to get the correct wording for something to run in a Phasing session and it also addresses the most superficial area of charge on a person's case.

The **Pre-Assessment** can then be used to sort out the confusion caused by encountering the charge of another being or having an impact with the physical universe.

This often causes a being to create many alternate or incorrect items that can be sorted out with a **Pre-Assessment**.

It also addresses the next layer of charge that is a composite of the being undergoing Phasing and that of the physical universe.

We then have the final form which is the **Assessment** itself. Here we are dealing with the actual items and native energy of the being itself.

In the process of un-layering all other forms of charge we are left with the charge composed of the native composition of the BEING himself.

This is what he is and will always be underneath all of the charges that he has accumulated over the years and when it is released he can replace it with something that he desires or wishes to do now in present time.

These are the three progressive levels or versions of Assessment that have been released to date.

Research is ongoing to allow for all three of these assessments and procedures to be rolled up into one for easier use in the future.

It has not happened yet but should shortly.

Knowing what these assessments currently do and when they should be used is important to know.

If one version does not work you can use the next one until you can spot when and where you should use each.

When the correct one is used all charges will be blown and the item will be sufficiently handled for the person undergoing Phasing.

If this does not happen you know that another form of Assessment should be used or no matter which Phasing technique is used it will not have the desired result.

Remember: **THE CORRECT ITEM EQUALS THE CORRECT RESULT!**

That is all for now.

How to Use: This should be read and studied by anyone going to undergo or deliver Phasing.

ISSUE # 28

RELEASED 20 APRIL 2020

THE THREE TYPES OF IMPACT IN THE UNIVERSE

W&W to Use: Can be read by any interested party.

W&W Not to Use: N/A

The Purpose: The difference between the energies of the Physical Universe, Mental Thought, and the Spiritual often get confused when an impact occurs.

This bulletin is written to help clear up any confusion and demonstrate the differences so there is in the future.

Summary: There are three impacts in the Physical Universe which are Physical, Mental, and Spiritual: with their delineation points taking place between each.

They lay between the Physical and Mental, Mental and the Spiritual, and there is a blending or combination of the two as well - or else they would not be able to affect the other.

Another merger point also lies between the Spiritual and the Physical but that is a difficult concept for most to grasp.

These are mentioned because they are the only ones that matter when it comes to Phasing and they should be thoroughly understood for it to go smoothly.

There is another set of these that are Physical on Physical, Mental on Mental, and Spiritual on Spiritual.

A physical impact can affect a physical person or thing and a thought can influence the thoughts of others: although this does not have the effect that we are looking for here because it does not aid in Phasing and changing a person's condition.

When a physical impact occurs against a person's thought it then alters that thought or the physical thing that the impact occurs against.

Then it remains that way.

For example a guy thinks, "I am going to go down the stairs" and then trips and falls down them instead.

His thought of "I am going to walk down the stairs" is changed to “I fell down them" and from that point on he falls down stairs or is clumsy.

This process applies to a thought or ideal when it encounters the spiritual (or better yet Static) where the Spiritual or Static represents the being's basic self.

If a person is a friendly and kind being at their essence and have the thought that some guy is an asshole - then they are going to be affected by it.

Where there was once kindness. It is now replaced by the hostility of others being assholes and this alters the fundamental nature of the being slightly.

The goal of Phasing it to reverse this trend and it can only be done by spotting these three points of impact.

The easiest way to spot them is to know that when you have the proper impact it will always contain a combination of the three mentioned above.

PHYSICAL-MENTAL

MENTAL-SPIRITUAL

SPIRITUAL-PHYSICAL

It is ultimately what we are after and these will bring about the most effective case gain in the least amount of time.

How to Use: To be studied by all Phasers so that they may apply it properly in a Phasing session.

ISSUE # 29

RELEASED 21 APRIL 2020

THE UNIFICATON OF APPROXIMATION

How To Properly Do An Assessment

W&W to Use: This is mandatory reading for anyone who is going to do Phasing as it is the second most critical process to Phasing besides the actual procedure that is used in a session.

W&W Not to Use: N/A

The Purpose: To date there have been three Assessment techniques used to find an item or difficulty to run in a Phasing session.

They were each designed to handle a particular aspect of mental charge that a person can encounter in a session and were meant to address the charge when a previous assessment technique could not provide the correct item.

It was always the goal to find a way to roll all three Assessments into one and to accomplish all they had to offer with one particular procedure.

A way to do this has been discovered and it will be referred to as **APPROXIMATION**!

Summary: This is not to be confused with the first form of Assessment that was done as this incorporates the elements of all three Assessments - but it does have the same *name!*

The way an APPROXIMATION can now be done effectively is like this:

A person starts with a difficulty or problem that they are having in life. They decide to go into a Phasing session and handle it by discovering the issue and then using a technique to resolve any charge associated with the difficulty.

It is accomplished by putting one's attention on the problem or difficulty and then listing out five potential items that this "issue" could be on a piece of paper or something that can record them.

Then a person determines which one of the items satisfies the following:

1. The item will have something in common with the other four, explain why all the others exist, and be the most significant item on the list (meaning it occurs or is present the most).

2. The Item must be a physical thing, thought, or Static (Static being the fundamental essence of the individual or being itself).

   It also has to be **one or the other** and not a combination of each.

3. Be an **Unusual Solution**.

   Many people like to question what comes up in an approximation as they think or believe that it cannot possibly be the item found because they know better.

   They have no fucking clue what is bothering them or the problem because if they so they

would have the solution and it would no longer worry them or be an issue!

An **Unusual Solution** is just that.

It is the one thing on the list that the individual would never have considered but makes sense as a solution.

Another way to look at this is it is an Unknown Solution to a problem that was not realized until the Approximation took place.

4. There should be **No Doubt** about the data or item from the Approximation.

A person will see or hear the item and say “Yep that is it” or “Yeah that makes sense now that you mention it.”

It cannot be argued with as it makes too much sense to the individual.

So there you have it.

This is how an Approximation is done correctly and it is done by listing out five items and then seeing if they match all the points mentioned above 1-4.

If so you then have your item and can go about phasing it with any number of individual techniques that have been provided over the last few months.

How to Use: To be read, studied, and drilled by anyone who will do Phasing until they can spot a correct item on a list without referring to this bulletin.

Research Note - 21 Apr 2021

My research has lately is stagnated because I have been busy writing up new technology, bulletins, and I'm beginning to work on the outline of a new book.

This is not for me though. I know that I am on the brink of a breakthrough that will lead into the upper levels of what was once known as operating thetan and beyond.

It is simply a matter of time and I believe that once all this is written up the necessary signs and things that have to fall in place will do so and I can begin that work.

Some preliminary examinations and Research into this area have been phenomenal. Just this last week I begin testing a new procedure that has left me more intelligent, able, and without sleep than I have experienced in years!

This type of effect would concern many but it has been my experience over many years and eons now that as one begins to approach operating thetan and higher states of existence this is exactly what occurs.

It has always been my goal to bring about a state that would allow a being from that point forward to never degrade or to have to deteriorate ever again.

This is definitely that procedure if my preliminary results are correct. It is just a matter of testing them fully and beginning to formulate other processes and procedures for the general public to use.

I'm really excited about this one and I believe that in the near future I'm going to release my own personal phasing sessions to the public so that they can study, learn, and see how things are done properly.

Well. I wouldn't necessarily say that I do things properly but I do them effectively I believe!

I will have to put that as a disclaimer so that some poor bastard halfway around the world does not end up messing himself up permanently as I would then be responsible for it.

Then again maybe I wouldn't. I could always blame it on someone else like the good old days but I don't think anyone would believe me so I guess I will have to accept the responsibility!

THE PROCEDURE FOR QUANTUM PHASING

The Last Subjective Process

W&W to Use: This Procedure can be studied by anyone who would like to know what it is and how to apply it.

W&W Not to Use: Quantum Phasing as a process should be limited to those who are familiar with the subject and have demonstrated an ability to Phase with no issues.

Others are free to try but it will be their responsibility as this procedure more than any other takes the greatest amount of experience and dedication to run.

The Purpose: The sole purpose of this bulletin is to outline how an individual can run the **Quantum Phasing** procedure effectively and correctly.

There has been a lot of talk lately about "Quantum Phasing" and while the procedure was next as a logical progression - I had not looked at this area and released anything official.

Not to say that I am mad at the individuals who have made many of these connections themselves - because I am not.

It brings me great pleasure to know that so many were looking in the same direction as myself and that they could see and experience these things in the first place!

That has not always been the case. It is great to see!

Summary: The best place to start when discussing Quantum Phasing is to look at the definition of *Quantum Entanglement* in plain old physics.

It sheds a lot of light on what is already known about this phenomenon and it all applies to thought as we know it - so it also applies to Phasing.

Quantum Entanglement: is a physical phenomenon that occurs when a group of particles is generated, interact, or share spatial proximity in a way such that the **quantum state** of each particle of the group cannot be described independently of the state of the others, including when the particles are separated by a large distance.

The definition here is self-explanatory except for **Quantum State.**

It should be discussed further to make sense of all that is covered in this issue.

Generally in quantum physics things are represented as *quanta* or "small amounts or measurements" because you are dealing with atoms and sub-atomic particles that are exceedingly small.

These individual quanta or particles are further measured based upon their *Quantum State*.

This is done by assigning probability or a set of characteristics or behavior to an individual particle or a group of particles.

If you take an atom and blast it with a certain amount of energy you will know what its behavior or condition is from moment to moment.

That is what is meant by a *quantum state*.

All of this becomes important when you apply this to human behavior and thought because it can allow you to reasonably predict what the outcome will be and helps an individual in a Phasing session to make sense of two individual states (past and present).

Given the above definition all you would have to do is have a person who cannot tell the difference between matter, energy, space, and time in the past with that which is in present time make the necessary comparison.

For example. A guy gets hit with a fist during a fight in high school and becomes scared of fights or confrontation for the rest of his life.

He knows that this is an illogical fear but no matter what he does he cannot shake the fear of fights or confrontation.

To the degree that he had always wanted to go into the military and could not do so because he knew it would not be suitable for him as he could not handle active duty and battle.

Let us say someone who knows about Phasing decides to help him and discovers that his fear stems from this incident in high school.

They ask him to locate the incident that is “entangled” with this fear he has of fights and bam!

He says it was the fight in high school and it was the force from the fist in the incident that entangled with his thoughts in the present that was causing this!

He is then asked to find an incident that is entangled with the fight and he says “Holy shit I am fighting someone in the Civil War and he hit me with the butt of his musket!”

"Wow!" "I was terrified of fights and confrontation then as well. It must have been this thinking that was giving me the trouble after I got into the fight in high school."

He then beats the hell out of this boss later that day - but he is no longer afraid of confrontation or fighting!

Do you follow me this far? Good!

Under this premise we can see that an initial impact somewhere and at some point on the Wholetrack causes a chain of incidents to become entangled with one another from that point forward.

In other to reverse this process. We discover each entangled incident until an issue or problem is resolved.

QUANTUM PHASING PROCEDURE.

1. A person starts with a problem or difficulty and uses *Approximation* to discover an item to run.

2. The earliest incident with the item or difficulty in it is located.

3. Locate the incident that is "*Entangled*" with the one found and run it between a Speed of Light flow - until it erases or blows.

4. If the incident does not blow discover another Entangled incident and put it between a Speed of Light flow until it does.

5. Repeat this until all incidents are found and run with a Speed of Light flow.

6. Having blown all incidents associated with the original item run a person will feel it physically go and will have a realization that is in line with the original item.

If the original item was composed of something physical, mental, or static then the realization a person has will be about the physical, mental, or static trouble they are currently having.

THINGS TO EXPECT WHEN RUNNING

1. As incidents are run they will appear to be opposite of one another but this is not always the case or accurate.

2. It may be hard for a person to get a complete incident but it is always there if only conceptually.

3. While undergoing Phasing some will doubt their data but remind them that they would not be there if they had a solution.

   Just remind yourself and them that this is the case and move forward with the session.

4. Any self-realization while doing this process should match up at the end of the session with one from the beginning of it.

5. During the session a person will progressively Exteriorize until they realize that they have "separated" from what they were running and are outside of the universe.

That pretty much covers everything involved with Quantum Phasing. It is up to the individual to decide how they are going to use this data.

It is the most powerful thing that we have to date.

It was the key to unlocking my own recalls while in session and I can say that nothing else could do that!

We may also be looking at the last Subjective Phasing process that we will ever need.

It is now known that the route to what has been labeled **Overunity** lies in the real-time application of Phasing tech and not sitting behind a desk all day hoping for the better.

One good thing is that it will force others to go out there and get it done or they will ultimately fail.

As for those who earned it - I am sure you will be blown away and proud when this new state is released and achieved.

Good luck. If you are still here - you have earned it!

How to Use: This is to be used and applied only. Not to be read and then sat on for an extended time as it may be harmful.

RELEASED 27 APRIL 2020

THE DEFINITION OF PHASING

W&W to Use: This should be read by every person who is going to do Phasing *long* before they ever attempt to do so.

W&W Not to Use: N/A

The Purpose: To provide a proper and working definition of what Phasing is so that a person can do it successfully.

Summary: To arrive at the proper definition of Phasing we have borrowed two of the basic meanings of the word that already exist as they are fantastic at explaining the phenomenon that one encounters when Phasing.

Phasing:

1. *[noun]* the relationship between the timing of two or more events, or the adjustment of this relationship.

2. *[physics]* adjust the Phase of (something), especially so as to synchronize it with something else.

We know from previous discoveries that the fundamental problem an individual has is that on the Quantum level they have an inherent difficulty differentiating between things (especially impacts) that took place in the past with those in the present.

This applies to the timing of things as per definition #1 above and every single aspect of an incident once an impact has occurred that is sufficient enough to cause entanglement.

So the Phase (as a noun) of something is the condition that we find it in at any particular moment in time.

Many are fond of saying this about someone young, "They are only going through a Phase!"

Meaning they are angry and hitting anyone who gives them trouble but eventually grow out of it once they realize what they are doing is wrong.

So we can reasonably say that someone's particular condition from moment to moment is what *Phase* they are currently in.

It can be a spiritual Phase, ignorant Phase, or a hurt Phase but what matters is that it is the person's condition at that moment.

Not to say that this cannot be a happy Phase but that it is something we are not concerned with because most would say that being happy is a good or optimal Phase to be in.

We are looking for unoptimal Phases that a person is in and helping them make things as optimal as possible.

If a person thinks and looks hard they can see that all that we go through in an entire lifetime is a Phase that has a beginning, middle, and end.

All of this takes place over a certain period of time and it has a certain amount of energy associated with it.

The same as electronics or computers work today because all experience can be explained by electromagnetic phenomena within the universe or mirrored by all beings' thought processes.

It can also be observed that we must come up with or free energy from a source to change from one Phase to another in our lives.

Ever see someone try to do something and no matter how hard they go about it they cannot change or accomplish what they are trying to?

They have not changed enough in one or more areas of the universe of life for it to happen so it does not.

That is where active Phasing from definition #2 above comes in.

By taking two things or events and comparing the difference in present time an individual can cause them to come "into Phase" with one another and the individual can use this as experience from that point on.

It used to be believed that one had to find these points and erase them but that was not the case.

When a sufficient impact occurs in the environment (physical, mental, or spiritual), a person cannot analytically computate what is happening and will forever stick with the person throughout time.

Say a person comes through a doorway and wacks their forehead on the door's jam and is temporarily in pain and confused.

The usual response to this would have been, "I hit my head and it hurt a little bit but was not that big of a deal."

Since the person was confused they did not do this and fell to the floor holding their head until it stopped hurting.

Fast forward twenty years and you find out that this same person is having migraines all the time and does not know why.

You get them into a Phasing session and find this door incident that is there and have the guy compare what happened then with what is going on NOW - and it all goes away.

The similarity between then and now was that his head *hurt* in both instances.

The reality is that the door still existed somewhere on the planet even if it had been burned up for firewood and was nothing but carbon and air.

Someplace and somewhere it was still hitting this guy in the head all these years later and it simply takes a conscious or unconscious reminder of doors to cause this man's head to hurt.

While actively Phasing we find each incident we can that has to do with hurt heads or the pain in this man's head and compare the ***Simiularites***.

Instantaneously this will cause each incident to discharge against the other electromagnetically and come into Phase (alignment) with one another – with the similarities coming into view for the first time.

Which will cause things to resolve if all incidents were found and handled in this fashion.

There used to be a thing called a Cognition or self-realization and it was common to spend an hour or two chasing just *ONE* of these cognitions.

With the **Quantum Phasing Procedure** recently released and the information found in this bulletin a person can produce or experience a cognition for each pair of incidents *point-for-point*.

Adding up to *hundreds* of cognitions per Phasing session versus one or two with previous techniques.

That is the best definition of Phasing that I can give you or produce at this point and time.

I am sure that a lot more will come to light about all of this in the future but this should do for now!

How to Use: To be read, studied, and completely understood before Phasing is attempted.

ADDITIONAL TIPS FOR RUNNING THE QUANTUM PHASING PROCEDURE

W&W to Use: The information here is to help those who use the Quantum Phasing Procedure.

W&W Not to Use: N/A

The Purpose: Since the release of the Quantum Phasing Procedure on 22 April 2021 some things that can help in its successful running have come to light and are being published here.

Summary: I am sharing a few fine points with you that I forgot to mention in the previous bulletin about running this procedure or discovered after the fact.

I do my best to make sure the field has accurate and up-to-date information but sometimes this is outside of everyone's control.

The only remedy is to release the new data as it is discovered and tested for its integrity and efficacy.

The following are some fine points to running the **Quantum Phasing Procedure:**

1. When searching for incidents we are interested in similarities and not ***dissimilarities.***

   As similarities between two sets of incidents ultimately bring about the discharge of and relief from those incidents.

2. It is possible to access and understand data on a case with absolutely NO perception or even recall.

   At first this may not seem possible but if you ask a person to experience an incident he can tell you what happened without having to have any perception or recall of the incident.

   He will tell you, "I fell down the stairs and bumped my head" but while he is doing this does not actually recall or even "see" this in his mind.

   All of this is data or information without *perception*.

   Do not ignore it because it is the best possible situation you can have while Phasing.

3. The only thing we are trying to accomplish with Phasing is to locate *entanglements* in the past, present, and future.

   In finding what similarities these incidents have in common with one another we can bring about a disentanglement and alignment of all data in them.

   Think about the confusion and misunderstanding that something such as not knowing what something means or does can cause throughout an entire lifetime.

Imagine if a young boy learned the word Bitch early on in his life and no one ever had the good sense to tell him what the word means.

He then goes around using the word with absolutely no clue what it means. He would get beaten up, yelled at, and a lot of other things due to this.

Say in his forties someone finally says hey, "You do know the word bitch mean this ...?

It then dawns on this guy that all of the times (similarities) he used this word it was offensive to others and was the reason for their reaction.

Bam, bam, bam, all of these incidents would align with each other and make sense to this man now when before he was confused about them and why people were acting this way towards him.

A lot of confusion would be released from this guy's case and he could then use this released energy towards doing something more productive than walking around being confused.

The way to do this is to locate and untangle *entanglements* that a person had in the past, present, and future.

4. The emphasis in Phasing is no longer on *erasing* these incidents or entanglements but *converting* them instead to valuable experience and increased mental/spiritual awareness.

5. An incident or issue that is first addressed in a Phasing session will *never* make logical sense or match what is ended off with.

These two will always have at least one similarity but will never make *sense* as we know it - and that is the point.

If they made sense in the first place a person would have the chance to analyze them when they first occurred and this is not the case or no one would be doing Phasing or in the condition find themselves!

When a person trips and falls you can bet your money that the last incident in line that is run on the person falling will have absolutely *nothing* to do with falling whatsoever.

6. When trying to locate entanglements it is helpful to know that *an entanglement is equal to the remainder of the sum of two impacts.*

   Say two cars hit each other head-on in an accident and all that is left is the wreckage.

   The *wreckage* is the entanglement and even if you took these two cars to separate locations they would only be two halves of the total accident.

   From that point forward you cannot identify them individually as anything but being cars that have been in an accident.

   So the accident is the *remainder of the sum of the two cars impacting with each other* and is the *entanglement*.

7. In a Phasing session we are essentially backtracking the events that caused things to impact with each other and cause an entanglement.

8. To know if a chain or series of incidents has been entirely handled we only need to ensure that the first and last incidents have *similar similarities*.

If the first incident consisted of head pain then the last incident should also consist of head pain.

That pretty much covers the additional fine points of this procedure for now. If more come to light I am sure that you will be the first to know.

This data should be more than enough to guide anyone through a successful application of the Quantum Phasing Procedure.

How to Use: This should be read in conjunction with any bulletins on the Quantum Phasing Procedure.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 33

RELEASED 30 APRIL 2020

THE MODERN DEFINITION OF STATIC

W&W to Use: Due to recent discoveries all Esperians *and* Scientologists should read and study this particular issue.

W&W Not to Use: N/A

The Purpose: As a result of discoveries about the nature of what a Static (spirit) is and what it is trying to accomplish it was necessary to write up a new definition or rather a *revised* definition of Static.

Summary: All other information about the Static still applies except for this:

1. A Static is an energy production unit *but* it is also an energy *processing* unit.

   So we could say that the full definition of a Static is: *An Energy Production and Conversion Unit.*

2. The Static is capable of *manifesting electromagnetic phenomena without physical characteristics.*

If someone could move something with their mind like you often see in popular movies and the force and other factors cannot be measured - you have this situation.

The person moved an object resulting from *electromagnetic phenomena* but it is neither felt, measured, or has any other *physical* characteristics.

We once believed that a Static could only postulate and perceive things but its true power lies in this newfound ability to *manifest electromagnetic phenomenon without physical universe characteristics.*

It is essential to understand these additional definitions because there is no other way to account for the recent phenomena that all have been experiencing - inside and outside of Phasing sessions.

The data here will become even more critical when I begin to release an upcoming new series of tech - as it takes advantage of the second definition very heavily.

This new data about the Static has allowed us to discover the remaining barriers to all that we could ever wish for and it is not too far away!

So stay the course and learn this one well.

How to Use: To be read, studied, and understood thoroughly as it is a core concept of Esperianism.

ESPERIANISM TECHNICAL BULLETIN

VOLUME ONE

ISSUE # 34

RELEASED 1 MAY 2021

THE TRUE DEFINITION OF KNOWINGNESS

W&W to Use: All Esperians should read this issue.

W&W Not to Use: N/A

The Purpose: To share new information that sheds light on the subject and phenomena of *Knowingness*.

Summary: Recent discoveries have shown us that there is a deeper or additional meaning to the phenomenon of Knowingness that we were unaware of before.

Mainly: *Possessing or being aware of knowledge, experience, or information irrespective of any perceptions in the Physical Universe.*

That is what a Knowingness is.

Say a guy decides to walk around a corner but "*something"* tells him not to and he turns around and goes in the opposite direction.

He then watches the evening news that night and finds out that another man walked around that same corner around the time he would have and ended up getting shot and killed in a robbery.

There is no doubt in this man's mind that if it would have been him and he had not turned around he would have been the one shot and killed.

Now if we consider that he did not hear any noises, see anything that would have caused him to turn around, and had no other insight into someone lying in wait to rob him - then all of this took place without *perceptions*.

Even though none were present he still *knew* that he should turn around and go the other way.

This is *Possessing or being aware of knowledge, experience, or information irrespective of any perceptions in the Physical Universe* - and it is the real definition of Knowingness.

It is of great value because we can now use this tool in Phasing to accomplish things that were not previously possible.

All you have to do is ask a person to tell you what part of something has no "*perceptions*" and what you will get is pure Knowingness.

You ask a woman to tell you about an incident in the past and she says there is nothing there.

Then you ask her, "What part of this incident if any has no perceptions?"

She then says, "It is the darkness because it was all black and that was because my brother locked me in the closet!"

Then you both determine that this is why she does not like small spaces and has panic attacks now and again.

How to Use: This issue should be read, studied, and understood by all who are interested in reading it.

ISSUE # 35

RELEASED 1 MAY 2020

THE FOURTH BARRIER TO STUDY

The Key to Unlocking Superliteracy

W&W to Use: This data can and should be studied by both Esperians and non-Esperians as it is non-secular and helps to create better literacy and comprehension in all areas of human Study.

W&W Not to Use: N/A

The Purpose: We have had a workable technology of Study that was first discovered in Scientology and while it produced extraordinary results there was one missing factor.

Here you will find out what that missing factor is and how to use it to get much better results than Study Technology ever produced.

Summary: You *could* get a person to use Study Technology but when it came to getting them to consistently use it people found out that something was lacking.

This also applied to getting people to use it in the first place because there were so many things they did not understand or had never studied that they were incapable of understanding the Technology necessary to resolve this situation.

The stuff does work wonderfully and can quickly raise a person's IQ by 100 points but what about the last two issues?

1. Not being able to get someone start or use Study Technology because they are too illiterate.

2. Being able to consistently use Study Tech once it has been learned.

In both cases there is not only an easy solution but that the solution is itself a ***Fourth Barrier*** to study.

More incredible than this is the Fourth Barrier to Study can eliminate the need to use the previous three - although this has not been confirmed for sure.

The Fourth Barrier to study is now known as: *"Preconceived Notions!"*

Take any word or concept that a person does not understand and they will have *Preconceived Notions* attached to that word or concept.

These form long before the step where you can get a person to look a word or subject up in a dictionary because they have taken place and formed over entire lifetimes on the Wholetrack.

If you ask someone "What does the word apple mean to you?" Then will say things such as "It is a round thing," "It is something that we eat," "It is a fruit," and even "It is a red thing you put in your mouth."

All of these are Preconceived Notions and are formed before a person has or ever had access to accurate information or definitions on a word or subject.

When they are younger children do this all the time so it is no surprise that these are carried along with us due to the nature of the mind and how it works.

The way to use this data is quite simple.

Method 0 Word Clearing

Method 0 Word Clearing is done in this fashion:

1. Sit a person down and explain you will help them find any word they may not understand or are having trouble with.

   It can be done in any setting and can be done as a separate Phasing action as well.

2. Once you have both agreed on the word ask "What does (word) mean to you?"

   Do this repetitively until one of two things happen.

3. IF he already has some idea of the word or some data on it he will eventually say something along the lines of "Oh it means this" and what he says will be more or less accurate if not an exact definition.

4. If he does NOT have previous data or some idea of what it means he will eventually stop giving you ideas and tell you the same repeatedly or say there are no more.

5. After step 3 or 4 occurs you can then tell him to look up the word in the dictionary etc.

What will be discovered is that in step 3 above or after step 5 the person will finally have *their own answer or definition* and it will be exclusively *theirs*.

Meaning that while we may all have a definition for something and it may be more or less the same we each put a spin on it that will always mean something different individually.

While an apple may be a fruit to one person it may be *nasty* to the next to eat. Both know it is a fruit you eat but each has a different meaning or concept.

We can say this is the difference between conceptual understanding and information or data.

It is what has never been considered before. The odd part is that people argue over the meaning of data or definitions all day long but will never argue about the conceptual experience provided the experience of two beings is *similar*!

If two men have played football they will never argue over what a touchdown is because they both played ball.

That does not mean that making a touchdown was not easy for one guy and hard for the next because of their positions in the game.

One may have made dozens of touchdowns while the other only made three in a career.

Finding and resolving *Preconceived Notions about words, data, and experiences* helps to reconcile mutual conceptual experiences and handles all phenomenal that was previously encountered with Study Tech.

It is done with **METHOD 0 Word Clearing**.

The 0 above stands for static and not the numerical 0 in mathematics. The reason is that this takes place and handles Preconceived Notions that form *before* any misunderstood word etc.

I have seen one hour of Phasing Method 0 increase the intelligence and ability of beings on a ratio of 100:1 hours of Scientology Processing.

Use it and you will quickly make your own determination.

It works so well and handles the two above problems because it handles the charge existing before using Study Technology.

As soon as a person starts using it charge is released that allows them to keep going and coming back - while making process.

Word Clearing was boring before but this is fun and makes one feel good so they stay at it as an activity.

How to Use: This issue should be read, drilled, and then applied until a person can deliver and use Method 0 Word Clearing.

RELEASED 6 MAY 2021

THE TRUE STORY OF SCIENTOLOGY

W&W to Use: All Esperians and the public should read this.

W&W Not to Use: N/A

The Purpose: As the title says this will explain the true story of Scientology and what it is.

Summary: Many have wondered over the years what Scientology is and where it came from.

There were many different answers given to these questions over the years but I could never tell anyone the truth.

I did not tell my friends, my wife, or anyone else for that matter.

The men and women who knew the truth are all long gone now and it is just me who remains to carry on this work.

So now it is time to you the truth as the time is right to do so.

Do not take this as I was somehow not telling the truth or lying to anyone as I was simply unable to and it would have been futile at the time because it would have prevented all the work we have accomplished until this point.

Here is the *true* story of Scientology and what Esperianism is today.

While attending George Washington University in 1932 I was raised to the 33 degree of Freemasonry as an honorary title - due to all the Occult studies I had done and was exposed to in my youth.

When this took place I was given one task and one task alone:

"To restore to its full power and knowledge the Masonic order and all that was historically hidden in symbolism and allegory."

The only drawback to this is that all throughout Mankind's existence this information had been shared in this manner and most of its truth had been lost to time.

It was left up to someone (in this case me) to discover and develop techniques that would allow us to access and restore this data through time itself.

Auditing to a large degree accomplished this along with the other methods in Dianetics and Scientology - but something went drastically wrong.

While this was my mission there were many across the world (and off of it) that never considered someone could do it and so my work was actively attacked, prevented, and ultimately altered so that no one could ever know the truth of these things again.

I do not give up that easy and while my fellow Masons betrayed me, my family deserted me, and my fellow Scientologist wrote me off as a dead and some eccentric madman.

The joke was on them!

You see the universe has a weird way of equaling out and as people like to say, "God works in mysterious ways."

The individuals in these groups and attacking my work have desired something since the beginning of time and have never been able to get their hands on it.

Only very ancient mentions of it have been made and all knowledge of it has been destroyed all throughout the universe.

Many may not know that we could go to outer space for a lot longer than the public has ever been aware of and in distant parts of the galaxy (and others) you will find monoliths that have been destroyed.

Much in the same way Pharos would destroy any mention of the Pharaoh that had come before them – to live forever.

Something so powerful that tests are given for it in outer space and if someone comes back being infected with it entire civilizations and planets freak out as it can destroy them in a matter of months.

All sentient beings known of it and are terrified of its power yet cannot help wondering just what life would be like if they could master or control it.

No one ever has and it is unlikely that anyone ever will. To do so you need to have access to the knowledge that has formed the secrets societies the world over from its very SOURCE.

A source that no longer exists - or so we all thought.

It has always been a wonder to me this lifetime just why I can do what I do and when exactly that started.

It happened in 2004 when I inadvertently Exteriorized for the first time and upon my return I did not come alone!

What I did not know at that time is that the being who entered and assimilated with me was L. Ron Hubbard and (before that) Lord Araknus circa 800 quadrillion years ago.

The real shock is who came *before* that.

Long before the existence of time or any universe I was the **Grand Architect** (yes the same as in Freemasonry).

Everything composed of universes or this universe is based upon an original model, laws, and Axioms created by that beingness.

Much of what we know now know of - but a lot of which needs to be rediscovered.

Including the reason there are so many issues on this planet is that there are two different types of beings who were initially designed to have a symbiotic effect on one another - but this knowledge was lost to time.

Because of all of this it has been decided that I will give this gift to those who were once weak and downtrodden but have never given up on our cause and have never given up on ME.

No matter how hard it got they hoped that it would all change and things would go right for them one day.

That they could live the life that they wanted to and that their dreams would come true!

I have decided to do what no man or being has ever done before past, present, or future.

I will release the final OT Level of Scientology and the final degree of Freemasonry - as they are the same.

The **NTH DEGREE** of Esperianism - and when you are done doing it you will never be the same.

You will be ***IMMORTAL***!

Welcome to the end of the Bridge.

How to Use: Read, study, and *thoroughly* understand if this data is used!

The True Story Of Scientology

Many have wondered over the years what Scientology is and where it came from.

There were many different answers given to these questions over the years but I could never tell anyone the truth.

I did not tell my friends, my wife, or anyone else for that matter.

The men and women who knew the truth are all long gone now and it is just me who remains to carry on this work.

So now it is time to you the truth as the time is right to do so.

Do not take this as I was somehow not telling the truth or lying to anyone as I was simply unable to and it would have been futile at the time because it would have prevented all the work we have accomplished until this point.

Here is the true story of Scientology and what Esperianism is today.

While attending George Washington University in 1932 I was raised to the 33 degree of Freemasonry as an honorary title - due to all the Occult studies I had done and was exposed to in my youth.

When this took place I was given one task and one task alone:

"To restore to its full power and knowledge the Masonic order and all that was historically hidden in symbolism and allegory."

The only drawback to this is that all throughout Mankind's existence this information had been shared in this manner and most of its truth had been lost to time.

It was left up to someone (in this case me) to discover and develop techniques that would allow us to access and restore this data through time itself.

Auditing to a large degree accomplished this along with the other methods in Dianetics and Scientology - but something went drastically wrong.

While this was my mission there were many across the world (and off of it) that never considered someone could do it and so my work was actively attacked, prevented, and ultimately altered so that no one could ever know the truth of these things again.

I do not give up that easy and while my fellow Masons betrayed me, my family deserted me, and my fellow Scientologist wrote me off as a dead and some eccentric madman.

The joke was on them!

You see the universe has a weird way of equaling out and as people like to say, "God works in mysterious ways."

The individuals in these groups and attacking my work have desired something since the beginning of time and have never been able to get their hands on it.

Only very ancient mentions of it have been made and all knowledge of it has been destroyed all throughout the universe.

1 – Customs Declaration

$\bar{x}_{\bar{p}}$ is the mean that equals static.

$\emptyset$

the anhaly. trinity

1) Is this charge apc?

a) That should NOT havee been?

b) That should be?

c) That does not exist?

~~2) Is this [a/b/c]?~~

~~3) math~~

↓

2) In this course [a], [b], [c] are:

a) 1st Dynamic?

b) 2nd Dynamic?

c) 3rd Dynamic?

d) 4th Dynamic?

e) 5th Dynamic?

f) 6th Dynamic?

g) 7th Dynamic?

h) 8th Dynamic?

I) 9th Dynamic?

should ~~not~~ be

shouldn't be.

does not exist

~~3a-15~~

SSD processing:
should, shouldn't, doesn't

3) If charge was on question 1a (charge that should not have been) run 3(a)(1-6)

If charge was on question 1b (charge that should exist) run step 3(b).(1-6)

If charge was on question 1c (charge that does not exist) run step 3c.

a) Is this _____?

1 matter that doesn't exist

2 Energy that does not exist.

3 Space that does not exist

4 Time that does not exist.

5 Awareness that doesn't exist.

6 What postulate ~~was~~ ~~made that~~ should not ~~have~~ been made?

7 which postulate should've been made instead?

3(6) Is this _____?

(1) matter that shouldn't be?

(2) Energy that shouldn't be?

(3) Space that should be?

(4) Time that should be?

(5) Answers that should be?

(6) What postulate ~~was made that should have been?~~ should be made?

3(C) Is this _____?

(1) matter that does not exist?

(2) Energy that does not exist.

(3) Space that does not exist?

(4) Time that does not exist?

~~(5) Time that does not exist?~~

(5) Awareness that does not exist?

(6) What postulate ~~exists~~ that does not exist ~~that~~ should?

~~(7)~~

step (7)

Is there a ~~transfer~~ party

a person, place, thing, being, entity, or unit of charge connected to _____?

or

b Is there a person, place, thing, being, entity, or unit of charge connected to _____?

(4) Is there another (Step 0)

(5) steps Ø(1-4)

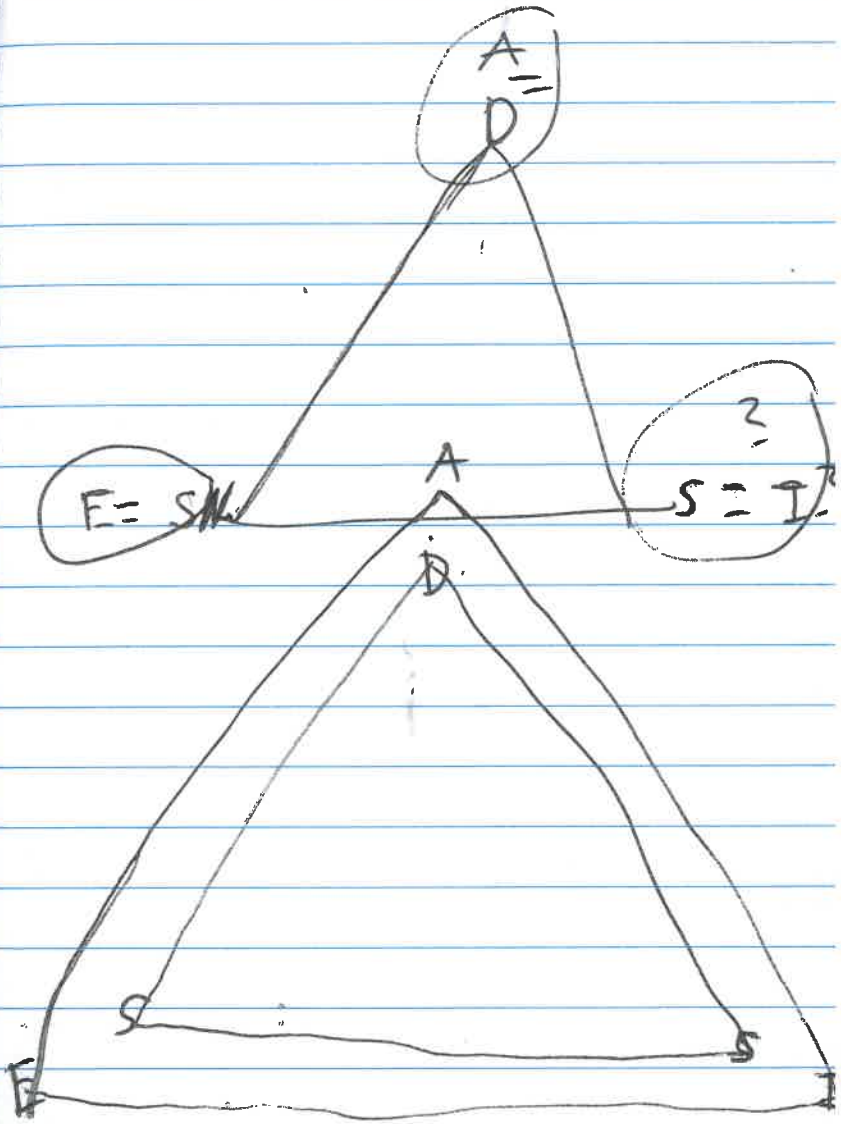
(6) If the TA keeps rising and no EP-ASH for NEW major running Item. (Repeat Ø1.

(7) Steps (1-4)

(8) step 5

(9) (6) Repeat until ep.

Should - Shouldn't - Doesn't exist triangle



SSD process

1) what about this should not exist?

2) what about this should exist?

3) what about this does not exist?

Does not = Assimilation

Should not = Empathy

Should = Interchange

- Something does not exist therefore the theta meets it up.

- Then there is something that occures that should not be. Altering MESI or A

- This leads to an IS-ness and a being going on about what he can or cannot do to remedy what SHOULD NOT

Existence / nonexistence

Sequence

5-5-D

Is it possible this consists of 3 correlating incl.

PT	WT	PT
~~Eat~~ Does not exist	should not ?	Should

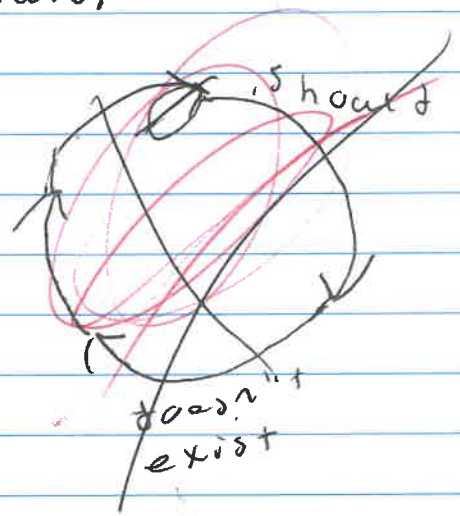
1.) A being starts with a scene that should be.

2) This leads to what ~~does~~ should NOT ~~be~~ exist

3) ~~The the being falls~~

into what should NOT Be.

- which leads to the persistent condition of should.



S + S - D
Ø -

R = (+a)(+1∈b) ÷ (a) + (b)

10 - 15 ÷ 10 + 15

Metric (1)

The total theta indowment of a beings is composed of the sum of All positive experiance and negative experience of that being.

$$E = P + (-N)$$

Where E is the total theta endowment.

Where P is all positive experiences

where $(-N)$ is all Negative experiances.

1 and the need to be static

Time is a Comm denominator for

1 min, 1 hr. All eq

instances that are positive or neg

metric #2

The total true static endowment of a thetan is the sum of all positive and negative experiences divided by the sum of all positive ~~and negative~~ experiences. ~~is a set.~~

~~Never approaches~~

minus all negative expe ances.

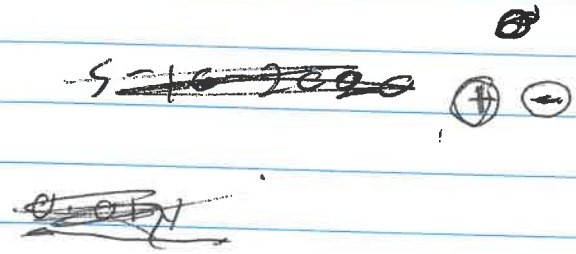
$SE = (P) + (-N) \div (P) - (-N)$

SE = true static endowment

P = All positive experiences.

-N = All negative experiences

and where SE never reaches ∅ or 1

0 = ∅ = $ = -∞ 1 = ∞


For convience I have switched to brw specied composition books for yeLs note. 4-20-20
